*Other Others* Sergey Dolgopolski,2018-06-05 Denying recognition or even existence to certain others while still tolerating diversity stabilizes a political order or does it Revisiting this classical question of political theory the book turns to the Talmud That late ancient body of text and thought displays a new concept of the political and thus a new take on the question of excluded others Philosophy and theology driven approaches to the concept of the political have tacitly elided a concept of the political which the Talmud displays yet that elision becomes noticeable only by a methodical rereading of the pages of the Talmud through and despite the lens of contemporary competing theological and philosophical theories of the political The book commits such rereading of the Talmud which at the same time is a reconsideration of contemporary political theory In that way The Political intervenes both to the study of the Talmud and Jewish Thought in its aftermath and to political theory in general The question of the political for the excluded others or for those who programmatically do not claim any original belonging to a particular territory comes at the forefront of analysis in the book Other Others approaches this question by moving from a modern political figure of Jew as such an other other to the late ancient texts of the Talmud The pages of the Talmud emerge in the book as a disappearing display of the interpersonal rather than intersubjective political The argument in the book arrives at the end to a demand to think earth anew now beyond the notions of territory land nationalism or internationalism or even beyond the notion of universe that have defined the thinking of earth so far      *The Making of Lebanese Foreign Policy* Henrietta Wilkins,2013-05-29 Seeking to explain Lebanon s behavior in the international arena during the 2006 war between Hezbollah and Israel this book offers a critique of both systemic and sub state factors in determining foreign policy decisions The Making of Lebanese Foreign Policy illustrates how systemic theories are limited in terms of explaining foreign policy decisions because they largely ignore the role of internal or sub state factors Within

Lebanon foreign policy is split between the interests of different internal Lebanese groups working in alliance with external actors. The competing interests of these internal groups compromise the cohesion of the Lebanese state and its capacity to promote its own interests above those of the different internal groups. The example of Lebanon during the 2006 war thus demonstrates the importance of these sub state factors in influencing state behaviour on an international level. Arguing that a more pluralistic approach is necessary in order to understand the conditions that affect the foreign policy making of the Lebanese state, this book fills an important gap in the literature on the topic and will be of interest to students of International Relations, Middle East Studies and Islamic Studies amongst others.
