guide for anyone living a sober life who wants to develop a healthy body mind and spirit Zero to Hero Nathaniel Bryce Wilson,2019-01-09 This book is my memoir of my journey through hardcore drug addiction and drug induced psychosis into a life of success and triumph It starts from early childhood in a small town called Woodland Park in the front range of Colorado We grew up with great curiosity and not a lot of options for our over ambitious minds Most youth from Woodland Park found themselves partying every weekend out in the woods and rebelling against our conservative town s reputation As time went on many found themselves addicted to hard drugs at a very early age As more time passed our town experienced tragedy after tragedy of young and loving youth from the community dying from suicide or substance abuse related incidents This book encapsulates the crazy stories my friend s and I lived through and conveys the insane perspectives of a young teenage drug addict This story describes the necessary changes one must go through to experience a full transformation from living a life of pain into a life of success and love Everything from suicide attempts IV drug use surviving sexual trauma trips to jail and more This life has seen more in 21 years than most do in a lifetime and contains a happy ending communicating hope to all it s readers and all of the ones still lost on the streets to drug addiction Living with Alcoholism and Drug Addiction Nicholas Lessa,Sara D. Gilbert,2009 Explores the factors that lead to addiction how to recognize it and how to treat it an cope with its aftermath Drug Use, Recovery, and Maternal Instinct Bias Caitlyn D. Placek,2024-01-26 Drug Use Recovery and Maternal Instinct Bias A Biocultural and Social Ecological Approach draws upon theoretical perspectives in anthropology and public health to provide insight into the barriers women experience when seeking treatment for substance use disorders In both theoretical perspectives in biological anthropology and social discourse within the United States there is an emphasis on explaining why women avoid or should avoid using psychoactive substances during their reproductive years especially during pregnancy Theories of women s drug avoidance during the childbearing years rely on statistics to show that women are less likely to use all types of illicit drugs than their male counterparts This gender gap however is closing in high income countries HICs calling for more research on the biocultural and social ecological factors contributing to women s drug use and the barriers to their recovery The book uses qualitative data from participants in Indiana to illustrate women s struggles along the pathway to recovery The overarching conclusion is that internalized models of maternal instinct a topic inherent in theoretical and public discourse can often impede efforts for women seeking treatment and recovery is only possible when proper social and structural supports are in place **Brain and Cognition for Addiction Medicine: From Prevention to Recovery** Hamed Ekhtiari,Antonio Verdejo-García,Scott J.
