Theories of Design, by Alf Bøe Alf Bøe,1957

Nineteenth-Century Design Clive Edwards,2021-03-30 This is volume four in

a four volume edition of primary source materials that document the histories of design across the long nineteenth century Each volume is arranged by appropriate sub themes and it is the first set of primary sources to be gathered together in this comprehensive and accessible format Design refers to more than simply products and personalities or even cultural ideas it involves consideration of ways of design thinking and applications as well as the philosophies and the other disciplines that impinge upon it Here the final volume looks at consumption and uses of design as a part of the wider cultures of the period

The volumes will be of interest to a range of scholars and students including those in art and design history visual culture and nineteenth century material culture They will also be of interest to a broad range of scholars working in areas including aesthetics gender politics and philosophy *The Battle of the Styles* Bernard Porter,2011-03-17 The present day Foreign

Office in Whitehall is an imposing building whose genesis is bizarre In 1857 a competition was held to pick an architect which provoked a huge row between the rival Classical and Gothic schools which a Goth George Gilbert Scott won but was then forced to re design in Classical The circumstances surrounding this fiasco furnish the starting point for this book which then goes on to analyse the debate that preceded this decision for the light it sheds on the complex nature of British culture and society then Among issues raise were contemporary and conflicting understandings of Britain s or England s national and imperial identities of religion and morality of history modernity and progress and of class and gender The debate offers an unusual insight into the relationship between all these matters and high culture generally This account of it should be of great value to cultural and social historians as well as to any architectural historians interested in the broader historical context surrounding this and other great monuments of the time *Art Botany in British Design Reform, 1835-1865* Sarah

Alford,2024-11-14 Drawing on the fields of design history and the history of science this book examines the important role that botanical science played in the emergence of Victorian design theory In early 19th century Britain a rapid influx of

plants from other countries began to confuse the orders of classification As these new specimens arrived in nurseries and conservatories botanists revised and promoted a new taxonomy the Natural System In parallel in 1835 British manufacturers faced a government inquiry in order to improve the output of the British design industry They needed a nationally identifiable design aesthetic and the inquiry led to the creation of the Government Schools of Design and the Design Reform movement This book explores how whilst botanists used drawings to clarify new systems of plant classification designers learnt art botany the practice of basing decorative form and ornament on the hidden natural laws that govern plant growth and structure Design reformers used botany as a model for how to create and identify what is new and incorporate it into what

was already familiar and meaningful all within the purview of developing a professional field of practice Sarah Alford provides a rich interdisciplinary study of how the fields of design and botanical science came together Through a framework of material culture Alford sheds new light on the work of leading botanists designers and illustrators such as Sarah Drake John Lindley Richard Redgrave Owen Jones and Christopher Dresser This book reveals how the designation of what design reformers deemed appropriate for the surface decoration of material structures as varied as carpets jugs wallpaper and furniture was an embrace of botanical science as a source of fantasy and imagination *Ornament, the Novel, and the Victorian Real* Irena Yamboliev, 2025-07-07 All real art wrote William Morris is ornamental If Morris is right then ornament is not as some would have it a triviality a sign of want or a crime Instead Ornament the Novel and the Victorian Real argues for the many and varied ways in which the novel is indebted to ornament Victorians and Victorianist scholars have compared the novel to fine arts such as Dutch genre painting or to photography emphasizing these visual forms investment in gritty particularity and exhaustive detailing of appearance But this story loses sight of a key fact that this book recovers ornament represents a distinct describable Victorian method of realism a method for boiling down essentials and making palpable the invisible fundamental laws that govern form in nature This book grounds itself historically in Victorian theories and practices of decoration developed in the middle of the nineteenth century a moment when Victorian designers overhauled the reigning principles of decorative art and shows the rise of the newly developed theory of ornament to have explanatory power for contemporary novelistic practice too The compositional principles in ornament far from trivial extraneous or deceptive furnish a new theory of form a new concept of the real and a new method for reading novelistic prose Ornament is at work churning away at the heart of the Victorian novel Wallpaper patterns hinge work stained glass these visual forms articulate principles of form such contrast symmetry flatness and stylization And novelists turn these design principles into literary principles importing them into their narratives as syntax word by word and phrase by phrase This book proceeds by way of very close readings that focus on the scale of the sentence and analyzes the rhythm meter and repetition of prose This method allows an appreciation of how in the hands of George Eliot Thomas Hardy A C Swinburne Oscar Wilde and D H Lawrence ornamental prose opens up representational possibilities not otherwise available Ornament allows novelists to render the patterning of human minds the dynamics of relationship and the intense realities of the more than human world

In Pursuit of Beauty Metropolitan Museum of Art (New York, N.Y.), 1986 This project is the first comprehensive study of a phenomenon that not only dominated the American arts of the 1870s and 1880s but also helped set the course of such later developments in the United States as the Arts and Crafts movement the indigenous interpretation of Art Nouveau and even the rise of modernism In fact the early history of the Metropolitan its founding its sponsorship of a school of industrial design and its display of decorative works is inextricably tied to the Aesthetic movement and its educational goals In Pursuit of Beauty Americans and the Aesthetic Movement comprised some 175 objects including furniture metalwork stained glass

ceramics textiles wallpaper painting and sculpture Some of these had rarely been displayed others although familiar were being shown in new and even startling contexts The exhibition and catalogue are arranged thematically to illustrate both the major styles of a visually rich movement and the ideas that generated its diversity From publisher s description

"Iron, Ornament and Architecture in Victorian Britain " Paul Dobraszczyk, 2017-07-05 Vilified by leading architectural modernists and Victorian critics alike mass produced architectural ornament in iron has received little sustained study since the 1960s yet it proliferated in Britain in the half century after the building of the Crystal Palace in 1851 a time when some architects engineers manufacturers and theorists believed that the fusion of iron and ornament would reconcile art and technology and create a new modern architectural language Comprehensively illustrated and richly researched *Iron Ornament and Architecture in Victorian Britain* presents the most sustained study to date of the development of mechanised architectural ornament in iron in nineteenth century architecture its reception and theorisation by architects critics and engineers and the contexts in which it flourished including industrial buildings retail and seaside architecture railway stations buildings for export and exhibition and street furniture Appealing to architects conservationists historians and students of nineteenth century visual culture and the built environment this book offers new ways of understanding the notion of modernity in Victorian architecture by questioning and re evaluating both Victorian and modernist understandings of the ideological split between historicism and functionalism and ornament and structure

From Gothic Revival to Functional Form Alf Bøe, 1979-01-01 *Routledge Library Editions: Historiography* Various, 2021-06-23 The greatest problem in historical scholarship theoretically and practically is the relation between historians and their subject matter The past is gone and historians can only study its remnants On what basis do scholars select certain facts from the mass of data left from the past How do they explain the interrelationship of the facts they select What criteria do they use to evaluate their subject The 35 volumes in this set originally published between 1926 and 1990 discuss and answer these essential questions faced by historians The development of historical understanding during the 18th and 19th centuries was one of the most striking features of Western culture Both historiography and historical thinking advanced as never before The historical movement of the 19th century was perhaps second only to the scientific revolution of the seventeenth century in transforming Western thought One consequence was extensive organisation and professionalization of research which the volumes in this set reflect

History and Community Florence S. Boos, 2016-04-14 The essays in this volume originally published in 1992 examine some of the pervasive implications of Victorian medievalism and assess its creative manifestations and dual capacities for expression of reformist anger and escapist retreat Some of the emotional and intellectual reasons for the strong Victorian attraction to medieval history and literature are discussed and emblematic responses to this attraction are examined

Reassessing Nikolaus Pevsner Peter Draper, 2017-07-05 Nikolaus Pevsner was one of the most important and influential art historians of the twentieth century He opened up new areas of enquiry in the history of art revolutionising architectural studies in England and playing a key role in establishing the discipline of design history Through his lectures and broadcasts as well as the remarkable volumes in The Buildings of England series which made him a household name he did much to encourage greater interest in and understanding of art and architecture among a wide public This wide ranging collection of essays based on papers delivered at the conference held at Birkbeck in celebration of the centenary of Pevsner's birth offers the first sustained critical assessment of Pevsner's achievements With contributions by leading international scholars the volume brings together a wealth of new material on Pevsner and his intellectual background both in Germany in the late 1920s and 1930s

and in England particularly in the 1940s and 1950s *Oscar Wilde's America* Mary Warner Blanchard, 1998-01-01 In 1882 Oscar Wilde toured America as the Apostle of Aestheticism The nation was still shaken by the Civil War and Wilde's message of regeneration through art and beauty seemed to open new horizons In this first cultural history of the aesthetic movement in the U S Mary Blanchard provides an imaginative account of a neglected dimension of our history 221 illustrations
