Thinking Through Twentieth-Century Architecture Nicholas Ray,2023-02-08 Shortlisted for the Architectural Book Awards 2024 Thinking Through Twentieth Century Architecture connects the practice of architecture with its recent history and its theoretical origins those philosophical ideas that lay behind modernism and its aftermath By analyzing in straightforward and jargon free language the genesis of modernism and the complex reactions to it the book clarifies a continuing debate It has been specifically written to connect issues of theory history and contemporary practice and to allow students to make these connections easily This is a history of twentieth century architecture written with close critical attention to the theories that lie behind the works described Importantly unlike other historical accounts it does not take sides and urge the reader to identify with one strand of thinking or style of architecture at the expense of others but it presents a dispassionate view with persuasive arguments on behalf of different positions It pursues the history of European and American architecture chronologically but the history is interwoven with the philosophical ideas that informed both writers and architects and are essential for its understanding The book is relevant to current issues of contemporary practice and education showing that philosophical issues are fundamental and those relating to design decisions never go away It includes 200 illustrations and will appeal to all those interested in twentieth century architecture and to architectural students

Constructing a Place of Critical Architecture in China Guanghui Ding, 2016-03-09 For the past 30 years The Chinese journal Time Architecture Shidai Jianzhu has focused on publishing innovative and exploratory work by emerging architects based in private design firms who were committed to new material theoretical and pedagogical practices In doing so this book argues that the journal has engaged in the presentation and production of a particular form of critical architecture described as an intermediate criticality as a response to the particular constraints of the Chinese cultural and political context The journal s publications displayed a dual critique a resistant attitude to the dominant modes of commercial building practice characterised by rapid and large scale urban expansion and an alternative publishing practice focusing on emerging independent architectural practitioners through the active integration of theoretical debates architectural projects and criticisms This dual critique is illustrated through a careful review and analysis of the history and programme of the journal By showing how the work of emerging architects

including Yung Ho Chang Wang Shu Liu Jiakun and Urbanus are situated within the context of the journal's special thematic editions on experimental architecture exhibition group design new urban space and professional system the book assesses the contribution the journal has made to the emergence of a critical architecture in China in the context of how it was articulated debated presented and perhaps even produced within the pages of the publication itself The protagonists of critical architecture have endeavoured to construct an alternative mode of form and space with strong aesthetic and socio-political implications to the predominant production of architecture under the current Chinese socialist market economy To rebel against certain forms of domination and suppression by capital and power is by no means to completely reject them rather it is to use those

data for design solutions and sociologists were courted by the most prestigious design schools to lecture and teach Twenty years later at the height of postmodernism it was passe to be concerned with the sociological aspects of architecture Currently the rising importance of sustainability in building not to mention an economical crisis brought on in part by a real estate bubble have forced architects to consider themselves in a less autonomous way perhaps bringing the profession full circle back to a close relationship with sociology Through all these rises and dips Robert Gutman was a strong and steady voice for both architecture and sociology Gutman a sociologist by training infiltrated architecture s ranks in the mid 1960s and never looked back A teacher for over four decades at Princeton s School of Architecture Gutman wrote about architecture and taught generations of future architects all while maintaining an outsider status that allowed him to see the architectural profession in an insightful unique way
