From Mobilization to Revolution Charles Tilly, 1978 Theories and descriptions of collective action Interests organization and mobilization The opportunity to act together Changing forms of collective action Collective violence Revolution and rebellion Conclusions and new beginnings Vision and Method in Historical Sociology Theda Skocpol, 1984-09-28 Examines the careers and contributions of nine major scholars who have been influential in the development of historical sociology Covers the work of Marc Bloch Karl Polanyi S N Eisenstadt Reinhard Bendix Perry Anderson E P Thompson Charles Tilly Immanuel Wallerstein and Barrington Moore Jr The Origins of the Civil Rights Movement Aldon D. Morris, 1984 An account of the origins development and personalities of the Civil Rights movement from 1953 1963 **States and Social Revolutions** Theda Skocpol, 1979-02-28 Theda Skocpol shows how all three combine to explain the origins and accomplishments of social revolutionary transformations **States and Social Movements** Hank Johnston, 2011 States and Social Movements cuts to the core of how social movements interact with all types of state system to produce variable outcomes such as democracy policy reform repression insurrection and revolution **Contemporary Sociological Theory** Jonathan H. Turner, 2012-09-20 Written by award winning scholar Jonathan Turner Contemporary Sociological Theory covers the range of diversity of theory in nine theoretical traditions and variants of theoretical approaches in these traditions The result is a comprehensive review of present day theorizing in sociology covering functional evolutionary ecological conflict interactionist exchange structuralist cultural and critical theories and the major proponents of these theories Moreover for each theoretical tradition its origins are examined in a separate chapter with an eye to how classical theorists influenced the work of key contemporary scholars This book will serve as a valuable resource for those readers seeking in depth and comprehensive coverage of contemporary traditions in their historical contexts Unlike many texts coverage is comprehensive and deep The theories and their origins are examined in detail so that readers can fully understand the origins and present profile of theories in present day sociology Unlike many texts that skim over theories on the surface this book seeks to unlock for the reader their underlying structure of each theory The book is written in a modular format so that theories and traditions can be examined in any order and in many diverse combinations If desired only the contemporary theories can be read without attention to their historical contexts or the reverse is true if readers want to understand the historical origins of a particular theoretical tradition Since Jonathan Turner is an active theorist in his own right he brings to the book an appreciation of how theories are created as an insider rather than as only a commentator on theory As such he is able to bring out the underlying assumptions structure and form of a theory in new and interesting ways for casual readers and scholars alike **From Revolution to War** Patrick J. Conge, 2010-05-25 In the history of international relations few events command as much attention as revolution and war Over the centuries revolutionary transformations have produced some of the most ruinous and bloody wars Nevertheless the breakdown of peace in time of revolution is poorly understood Patrick

Conge offers a groundbreaking study of the relationship between war and revolution. How can we best understand the effect of revolutionary transformations on the politics of war and peace? Conge argues that it is only by bringing in first the organizational capacity of revolutionary regimes to extract resources and convert them into military strength and second the power of transformative ideas to transcend national boundaries and undermine the ability of opposing regimes to compromise that we are best able to understand the effect of revolution on the origins and persistence of war. By incorporating such key elements, this book provides a new, more comprehensive explanation of the relationship between revolution, war, and peace. Conditions that lead to and sustain wars in general are identified and placed in the light of revolutionary transformations. Once the argument is presented, historical case studies are used to test its plausibility. Conge demonstrates the importance of the effect of revolutionary organization and ideas on the outcome of conflicts. Political scientists, historians, sociologists, and the general reader interested in the politics of war and peace in revolutionary times are given new perspectives on the relationship between revolution and war, as well as on the implications of political organization for military power and the process of consolidation of new regimes. Patrick J. Conge is Assistant Professor of Political Science, University of Arkansas.

From Nationalism to Revolutionary Islam Said Amir Arjomand, 1984-06-18

From Deficit to Deluge Dale Van Kley, 2011

Seven authorities in their respective fields come together to offer a new interpretation of the French Revolution. They show how the French monarchy's clumsy efforts to solve a fiscal crisis politicized long-standing structural problems, metastasizing an apparently fairly normal fiscal crisis into a revolution.

Exploring Revolution Timothy P. Wickham-Crowley, 2019-07-26

This series of essays on insurgency and revolution focuses on events in Latin America since 1956. The contributors discuss revolutionary theory, the nature of social movements, and models of social action. Topics raised include terror, guerilla regimes, mobilizing peasants, and the vulnerability of regimes to revolution.

The Ethiopian Revolution 1974-1987 Andargachew Tiruneh, 1993-04-08

This book is a comprehensive account of the Ethiopian revolution, dealing with the entire span of the revolutionary government's life. Particular emphasis is placed on effectively isolating and articulating the causes and outcomes of the revolution. The author traces the revolution's roots in the weaknesses of the autocratic regime of Haile Selassie, examines the formative years of the revolution in the mid-seventies when the ideology of scientific socialism was espoused by the ruling military council, and finally charts the consolidation of Mengistu Haile Miriam's power from 1977 to the adoption of a new constitution in 1987. In examining these events, Dr. Tiruneh makes extensive use of primary sources written in the national official language. He was also the first Ethiopian nation to write a book on this subject. This book is thus a unique account of a fascinating period, capturing the mood of the revolution as never before, yet firmly grounded in scholarship.

Encyclopedia of Historians and Historical Writing Kelly Boyd, 2019-10-09

The Encyclopedia of Historians and Historical Writing contains over 800 entries ranging from Lord Acton and Anna Comnena to Howard Zinn and from Herodotus to Simon Schama. Over 300 contributors from around the

world have composed critical assessments of historians from the beginning of historical writing to the present day including individuals from related disciplines like Jürgen Habermas and Clifford Geertz whose theoretical contributions have informed historical debate. Additionally, the Encyclopedia includes some 200 essays treating the development of national, regional, and topical historiographies from the Ancient Near East to the history of sexuality. In addition to the Western tradition, it includes substantial assessments of African, Asian, and Latin American historians and debates on gender and subaltern studies.

The Anatomy of Revolution Revisited Bailey Stone, 2014. This study aims to update a classic of comparative revolutionary analysis, Crane Brinton's 1938 study *The Anatomy of Revolution*. It invokes the latest research and theoretical writing in history, political science, and political sociology to compare and contrast in their successive phases the English Revolution of 1640–60, the French Revolution of 1789–99, and the Russian Revolution of 1917–29. This book intends to do what no other comparative analysis of revolutionary change has yet adequately done. It not only progresses beyond Marxian socioeconomic class analysis and early revisionist stresses on short-term accidental factors involved in revolutionary causation and process; it also finds ways to reconcile state-centered structuralist accounts of the three major European revolutions with postmodernist explanations of those upheavals that play up the centrality of human agency, revolutionary discourse, mentalities, ideology, and political culture.

Regarding Tilly María J. Funes, 2016-10-17. Studying Charles Tilly (1929–2008), American sociologist, historian, and political scientist, is essential for understanding political change and social conflict. His research focuses on how grassroots populations, through different forms of collective action, influence historical events by trying to improve the conditions of people's lives. This book is not only an homage to Tilly but is also aimed at understanding and applying his thought. In each chapter, the authors, experts on Tilly's work, examine his concepts, theories, and methodological contributions, providing a richer understanding of them. In addition, this book is very contemporary. From the beginning of this century, mainly from 2011, important popular mobilizations such as the Arab Spring and 15 M or los indignados, the indignant movement in Spain, gradually spread to other countries: the US, Yemen, Israel, etc., in successive Occupy movements. The political mobilization of the grassroots movements are undergoing a resurgence, a process that Tilly would have wanted to study. This book can be a good guide for analyzing and understanding these movements.

Modern Latin American Revolutions Eric Selbin, 2018-02-07. In contrast to previous studies that have centered on the institutionalization of revolution in Latin America and the Caribbean, *Modern Latin American Revolutions*, Second Edition, introduces the concept of consolidation of the revolutionary process, the efforts of revolutionary leaders to transform society, and the acceptance by a significant majority of the population of the core of the social revolutionary project. As a result, the spotlight is on people, not structures, and transformation, not simply revolutionary transition. The second edition of this acclaimed book has been revised to include new information on the cases of Bolivia, Cuba, Nicaragua, and Grenada, assessing the extent to which each revolution was both institutionalized and consolidated. This edition also boasts expanded coverage on Che Guevara's visionary

leadership and an all new section that addresses the future of revolution in Latin America and the Caribbean Dr Selbin argues that there is a strong link between organizational leadership and the institutionalization process on the one hand and visionary leadership and the consolidation process on the other Particular attention is given to the ongoing revolutionary process in Nicaragua with an emphasis on the implications and ramifications of the 1990 electoral process A final chapter includes brief analyses of the still unfolding revolutionary processes in El Salvador and Peru

Revolutions as Organizational Change Baohui Zhan, 2015-09-01 By comparing peasant revolutions in Hunan and Jiangxi between 1926 and 1934 *Revolutions as Organizational Change* offers a new organizational perspective on peasant revolutions Utilizing newly available historical materials in the People's Republic of China in the reform era it challenges the established view that the great Chinese revolution of the twentieth century was a revolution made by the Chinese Communist Party the CCP The book begins with a puzzle presented by the two peasant revolutions While outside mobilization by the CCP was largely absent in Hunan peasant revolutionary behaviors were spontaneous and radical In Jiangxi however despite intense mobilization by the CCP peasants remained passive and conservative This study seeks to resolve the puzzle by examining the roles of communal cooperative institutions in the making of peasant revolutions Historically peasant communities in many parts of the world were regulated by powerful cooperative institutions to confront environmental challenges This book argues that different communal organizational principles affect peasants' perceptions of the legitimacy of their communal orders Agrarian rebellions can be caused by peasants' attempts to restructure unjust and illegitimate communal organizational orders while legitimate communal organizational orders can powerfully constrain the mobilization by outside revolutionary agents such as the CCP In this thorough comparative account of the peasant risings in Hunan and Jiangxi and the role of the Communist Party Professor Zhang casts new light on both the risings themselves and what they can tell us about peasant risings in general This work is strong in both theory and detailed historical research Richard Rigby professor China Institute Australian National University Professor Zhang has beautifully crafted a comparative study of divergent peasant revolutions in two Chinese regions during Mao's long revolutionary war He brings to this task a broad and deep knowledge about revolutionary theory and also a razor-like analytical sensibility which enables him to examine the pros and cons of existing perspectives Timothy P Wickham Crowley associate professor of sociology Georgetown University

From Contention to Democracy Marco Giugni, Doug McAdam, Charles Tilly, 1998 *From Contention to Democracy* addresses a crucial aspect of contemporary societies the role of social movements for political and social change The volume gathers together essays written by prominent social theorists who have been asked to reflect on the relationship between movements and processes of social political and cultural change Three broad types of movement change nexus are distinguished and discussed incorporation transformation and democratization The chapters in this book all point to the place of social movements in relation to these three processes of change while discussing the history and well known events of social movements Individual occurrences

such as the protest of French students in 1968 or Chilean shantytown dwellers are examined The final essay looks ahead wondering what is the future of social movements

States and Collective Action Pierre Birnbaum,1988 An analysis of the influence of each type of state upon the development of various collective action and mobilization processes The author aims to establish the crucial importance of the state as a quasi independent variable

Brazil's Long Revolution Anthony Pahnke,2018-09-11 The book analyzes the origins and development of the Brazilian Landless Workers Movement one of the largest and most innovative current social movements Provided by publisher

Urban Activism in Western Europe from the 1950s to the 1980s Tim Verlaan,Christian Wicke,2024-07-23 Bringing together contributions from social political and urban historians this collection examines social movements in Western European cities from the 1950s to the 1980s Since their post war recovery and reconstruction cities in this part of the world underwent far reaching societal transitions such as deindustrialisation and the rise of the service economy the expansion and decline of local welfare regimes suburbanisation and urban redevelopment and the democratisation of urban politics Indeed the sources for urban activism have been manifold and the rehistoricization of this era through an urban lens is therefore valuable The authors of this volume seek to provide a comprehensive and multifaceted understanding of how structural socio economic political and cultural changes ideological shifts and urban spaces were intertwined in various place dependent ways By doing so they offer fresh comparative and conceptual perspectives on urban activism The book focuses on the long 1970s a structural break in time across the industrial West which corresponded with the emergence of new social movements and an urban crisis that left a wasteland of abandoned factories dilapidated workers housing and stalling redevelopment schemes in its wake Addressing how the post industrial revolution socially ideologically and physically manifested itself in the urban environment this book provides useful insights for colleagues in the fields of urban history social history political history and social movement studies
