Extimate Technology Ciano Aydin, 2021-01-21 This book investigates how we should form ourselves in a world saturated with technologies that are profoundly intruding in the very fabric of our selfhood New and emerging technologies such as smart technological environments imaging technologies and smart drugs are increasingly shaping who and what we are and influencing who we ought to be How should we adequately understand evaluate and appreciate this development Tackling this question requires going beyond the persistent and stubborn inside outside dualism and recognizing that what we consider our inside self is to a

great extent shaped by our outside world Inspired by various philosophers especially Nietzsche Peirce and Lacan this book shows how the values goals and ideals that humans encounter in their environments not only shape their identities but also enable them to critically relate to their present state The author argues against understanding technological self formation in terms of making ourselves better stronger and smarter Rather we should conceive it in terms of technological sublimation which redefines the very notion of human enhancement In this respect the author introduces an alternative more suitable theory namely Technological Sublimation Theory TST Estimate Technology will be of interest to scholars and advanced students working in philosophy of technology philosophy of the self phenomenology pragmatism and history of philosophy The Open Access version of this book available at <http://www.taylorfrancis.com/books/9781003139409> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license Reports of Explorations and Surveys United States.
