From Memory to Written Record Michael T. Clanchy, 1987      Margery Kempe and Translations of the Flesh Karma Lochrie, 2012-07-24 Selected by Choice magazine as an Outstanding Academic Book for 1999 Karma Lochrie demonstrates that women were associated not with the body but rather with the flesh that disruptive aspect of body and soul which Augustine claimed was fissured with the Fall of Man It is within this framework that she reads The Book of Margery Kempe demonstrating the ways in which Kempe exploited the gendered ideologies of flesh and text through her controversial practices of writing her inappropriate seeming laughter and the most notorious aspect of her mysticism her hysterical weeping expressions of religious desire Lochrie challenges prevailing scholarly assumptions of Kempe's illiteracy her role in the writing of her book her misunderstanding of mystical concepts and the failure of her book to influence a reading community In her work and her life Kempe consistently crossed the barriers of those cultural taboos designed to exclude and silence her Instead of viewing Kempe as marginal to the great mystical and literary traditions of the late Middle Ages this study takes her seriously as a woman responding to the cultural constraints and exclusions of her time Margery Kempe and Translations of the Flesh will be of interest to students and scholars of medieval studies intellectual history and feminist theory

Cultures of Forgery Judith Ryan, Alfred Thomas, 2013-05-13 In Cultures of Forgery leading literary studies and cultural studies scholars examine the double meaning of the word forge to create or to form on the one hand and to make falsely on the other

Coding Literacy Annette Vee, 2017-07-28 How the theoretical tools of literacy help us understand programming in its historical social and conceptual contexts The message from educators the tech community and even politicians is clear everyone should learn to code To emphasize the universality and importance of computer programming promoters of coding for everyone often invoke the concept of literacy drawing parallels between reading and writing code and reading and writing text In this book Annette Vee examines the coding as literacy analogy and argues that it can be an apt rhetorical frame The theoretical tools of literacy help us understand programming beyond a technical level and in its historical social and conceptual contexts Viewing programming from the perspective of literacy and literacy from the perspective of programming she argues shifts our understandings of both Computer programming becomes part of an array of communication skills important in everyday life and literacy augmented by programming becomes more capacious Vee

examines the ways that programming is linked with literacy in coding literacy campaigns considering the ideologies that accompany this coupling and she looks at how both writing and programming encode and distribute information She explores historical parallels between writing and programming using the evolution of mass textual literacy to shed light on the trajectory of code from military and government infrastructure to large scale businesses to personal use Writing and coding were institutionalized domesticated and then established as a basis for literacy Just as societies demonstrated a literate mentality regardless of the literate status of individuals Vee argues a computational mentality is now emerging even though coding is still a specialized skill **From Memory to Written Record in England, 1066-1307** M. T. Clanchy, 1979

Identifying the English Edward Higgs, 2011-10-06 Personal identification is very much a live political issue in Britain and this book looks at why this is the case and why paradoxically the theft of identity has become ever more common as the means of identification have multiplied Identifying the English looks not only at how criminals have been identified branding fingerprinting DNA but also at the identification of the individual with seals and signatures of the citizen by means of passports and ID cards and of the corpse Beginning his history in the medieval period Edward Higgs reveals how it was not the Industrial Revolution that brought the most radical changes in identification techniques as many have assumed but rather the changing nature of the State and commerce and their relationship with citizens and customers In the twentieth century the very different historical techniques have converged on the holding of information on databases and increasingly on biometrics and the multiplication of these external databases outside the control of individuals has continued to undermine personal identity security **Forensic Medicine and Death Investigation in Medieval England** Sara M.

Butler, 2014-08-21 England has traditionally been understood as a latecomer to the use of forensic medicine in death investigation lagging nearly two hundred years behind other European authorities Using the coroner's inquest as a lens this book hopes to offer a fresh perspective on the process of death investigation in medieval England The central premise of this book is that medical practitioners did participate in death investigation although not in every inquest or even most and not necessarily in those investigations where we today would deem their advice most pertinent The medieval relationship with death and disease in particular shaped coroners and their jurors understanding of the inquest's medical needs and led them to conclusions that can only be understood in context of the medieval world's holistic approach to health and medicine Moreover while the English resisted Southern Europe's penchant for autopsies at times their findings reveal a solid understanding of internal medicine By studying cause of death in the coroners reports this study sheds new light on subjects such as abortion by assault bubonic plague cruentation epilepsy insanity senescence and unnatural death Memory, Print, and Gender in England, 1653-1759 H. Weber, 2016-04-30 This book surveys the genesis of the modern conception of memory where gender becomes crucial to the processes of memorialization and suggests ways in which technology opens a new chapter in the history of memory History and the Written Word Henry Bainton, 2020-01-24 A thought provoking look at

the Angevin aristocracy's literary practices and historical record. Coming upon the text of a document such as a charter or a letter inserted into the fabric of a medieval chronicle and quoted in full or at length, modern readers might well assume that the chronicler is simply doing what good historians have always done: that is, citing his source as evidence. Such documentary insertions are not ubiquitous in medieval historiography, however, and are in fact particularly characteristic of the history writing produced by the Angevins in England and Northern France in the later twelfth century. In *History and the Written Word*, Henry Bainton puts these documentary gestures center stage in an attempt to understand what the chroniclers were doing historiographically, socially, and culturally when they transcribed a document into a work of history. Where earlier scholars who have looked at the phenomenon have explained this increased use of documents by considering the growing bureaucratic state and an increasing historiographical concern for documentary evidence, Bainton seeks to resituate these histories together with their authors and users within literate but sub-state networks of political power. Proposing a new category, he designates *literate lordship* to describe the form of power with which documentary history writing was especially concerned; he shows how important the vernacular was in recording the social lives of these literate lords and how they found it a particularly appropriate medium through which to record their roles in history. Drawing on the perspectives of modern and medieval narratology, medieval multilingualism, and cultural memory, *History and the Written Word* argues that members of an administrative elite demonstrated their mastery of the rules of literate political behavior by producing and consuming history writing and its documents.

**Childhood in Medieval Poland (1050-1300)** Matthew Koval, 2021-03-15 This volume analyses the constructions and realities of childhood in Poland c. 1050-1300 CE by examining a range of texts and considering the ways in which children fit within textual frameworks and genres. These texts include two major chronicles, monastic sources, and hagiography related to five major saints. The textual sources are put into conversation with findings from archaeology. The author argues that certain common themes, such as assumed care for children, the need for education, and the *puer senex* trope, do feature through most texts of any genre, and the book also explores how Poland was similar to and different from the situation in western Europe. See inside the book.

[The Origins of Value](#) William N. Goetzmann, K. Geert Rouwenhorst, 2005 The analysis of original documents is a means for economists to focus on the primary text to analyze and interpret the object and to move to interpretation and understanding of its relationship to modern financial instruments and markets. The result is a collection of interdisciplinary studies of the key innovations in finance from the Old Babylonian loan tablets to the 1953 London Debt Agreement that span regions in Asia, Africa, North America, and Europe.

**Writing the History of Memory** Stefan Berger, Bill Niven, 2014-02-13 How objective are our history books? This addition to the *Writing History* series examines the critical role that memory plays in the writing of history. This book includes essays from an international team of historians bringing together analysis of forms of public history, such as museums, exhibitions, memorials, and speeches. Coverage of the ancient world to the present on topics such as oral history and generational and collective

memory Two key case studies on Holocaust memorialisation and the memory of Communism

**Reconsidering Gender, Time and Memory in Medieval Culture** Elizabeth Cox, Liz Herbert McAvoy, Roberta Magnani, 2015 A consideration of the ways in which the past was framed and remembered in the pre modern world The training and use of memory was crucial in medieval culture given the limited literacy at the time but to date very little thought has been given to the complex and disparate ways in which the theory and practices of memory interacted with the inherently unstable concepts of time and gender at the time The essays in this volume drawing on approaches from applied poststructural and queer theory among others reassess those ideologies meanings and responses generated by the workings of memory within and over time Ultimately they argue for the inherent instability of the traditional gender time memory matrix within which men are configured as the recorders of history and women as the repositories of a more inchoate familial and communal knowledge showing the Middle Ages as a locus for a far more fluid conceptualization of time and memory than has previously been considered Elizabeth Cox is Lecturer in Old English at Swansea University Roberta Magnani is Lecturer in Medieval Literature at Swansea University Liz Herbert McAvoy is Professor of Medieval Literature at Swansea University Contributors Anne E Bailey Daisy Black Elizabeth Cox Fiona Harris Stoertz Ayoush Lazikani Liz Herbert McAvoy Pamela E Morgan William Rogers Patricia Skinner Victoria Turner

**Gender, Memory and Documentary Culture, C. 900-1300** Laura L. Gathagan, Charles Insley, 2025-01-14 Considers the role gender played in the production use and preservation of documents How was the world of medieval documentation and memory creation affected by gender This question is central to the essays collected here which bring together aspects of gender and documentary culture that are usually studied only in isolation Covering the tenth to the thirteenth centuries the volume offers a broad geographical reach England France Flanders Germany Spain and an array of sources from charters letters and court proceedings to seals iconography and illumination There is a particular focus on lay female communities including women's collective legal action in pre Conquest England documentary initiatives of Castilian peasant widows and urban Flemish women's sealing practices Re examinations of noblewomen's centrality and erasure in charters focus on Ermengarde of Brittany Mathilda of Boulogne and Berengaria of Navarre Contributions on gender and historical writing explore their development in Ottonian courts tenth century English coronation portraits Orderic Vitalis Historia Ecclesiastica and French chroniclers rhetorical strategies for writing noblewomen's rage Further chapters consider monastic spaces including women's houses at Auxerre and Marcigny and at Holy Trinity Caen and explore women's memory preservation efforts at Spanish houses San Salvador de O a and Santa Mar a de Piasca and a community at Bouxi res This volume demonstrates the new insights that can be gleaned by viewing various processes such as legal disputes and monastic narratives and foundation through a gendered lens

**The Memory of the People** Andy Wood, 2013-08-15 Did ordinary people in early modern England have any coherent sense of the past Andy Wood's pioneering new book charts how popular memory generated a kind of usable past that legitimated claims to rights space

and resources He explores the genesis of customary law in the medieval period the politics of popular memory local identities and traditions gender and custom literacy orality and memory landscape space and memory and the legacy of this cultural world for later generations Drawing from a wealth of sources ranging from legal proceedings and parochial writings to proverbs and estate papers he shows how custom formed a body of ideas built up generation after generation from localized patterns of cooperation and conflict This is a unique account of the intimate connection between landscape place and identity and of how the poorer and middling sort felt about the world around them **A Companion to the Medieval World** Carol Lansing, Edward D. English, 2012-12-26 Drawing on the expertise of 26 distinguished scholars this important volume covers the major issues in the study of medieval Europe highlighting the significant impact the time period had on cultural forms and institutions central to European identity Examines changing approaches to the study of medieval Europe its periodization and central themes Includes coverage of important questions such as identity and the self sexuality and gender emotionality and ethnicity as well as more traditional topics such as economic and demographic expansion kingship and the rise of the West Explores Europe's understanding of the wider world to place the study of the medieval society in a global context

**The Theology of Debt in Late Medieval English Literature** Anne Schuurman, 2024-01-18 Exploring debt's permutations in Middle English texts Anne Schuurman makes the bold claim that the capitalist spirit has its roots in Christian penitential theology Her argument challenges the longstanding belief that faith and theological doctrine in the Middle Ages were inimical to the development of market economies showing that the same idea of debt is in fact intrinsic to both The double penitential financial meaning of debt and the spiritual paradoxes it creates is a linchpin of scholastic and vernacular theology and of the imaginative literature of late medieval England Focusing on the doubleness of debt this book traces the dynamic by which the Christian ascetic ideal in its rejection of material profit and wealth acquisition ends up producing precisely what it condemns This title is part of the Flip it Open Programme and may also be available Open Access Check our website Cambridge Core for details *Talking Democracy* Benedetto Fontana, Cary J. Nederman, 2010-11-01 While emphasising discursive and historical dimensions of democracy the resources available in the history of rhetorical theory and practice tend to be ignored This book aims to resurrect this history and show how attention to rhetoric can help lead to a better understanding of the strengths and limitations of theories of deliberative democracy
