From Discourse Process To Grammatical Construction:

From Discourse Process to Grammatical Construction Ronald Geluykens, 1992 This study deals with interactional processes in conversational discourse and the way they may get syntacticized into grammatical constructions It investigates the link between discourse function and syntactic form and the ways in which grammatical form is a reflection on communicative function through examining the communicative functions of Left Dislocation in English The investigation is corpus based and focuses on spontaneous conversation but other discourse types are also taken into account The overall perspective is resolutely empirical and preconceptions about the possible functions of Left Dislocation are avoided Contents 1 Theoretical preliminaries 2 Referent introduction 1 interaction 3 Referent introduction 2 recoverability 4 Referent introduction 3 topicality 5 Other functions of LD 6 Prosodic aspects of LD 7 LD in other discourse types 8 A broader perspective 9 General conclusion Notes Appendices References Subject and author indices **Discourse and Pragmatics**

Studies in Interactional Linguistics Margret Selting, Elizabeth Couper-Kuhlen, 2001-01-01 Current interactional linguistic research appears to be crystallizing around systematic themes which are all represented in this collection of papers In the first section where the relation between language and interaction is viewed from the perspective of language structure several articles deal with the potential of a single structure for both turn and sequence construction revealing a play off between planned and occasioned syntax with potentially far reaching consequences for language development Other articles deal with lexical expressions as resources for the conduct of interaction showing how they are heavily dependent on turn position and sequential context for their meaning potential In the second section with a view from the perspective of the interactional order a systematic focus of interest lies on three different conversational tasks projecting turn and turn unit completion starting up turns with non beginnings and self repairing The cross linguistic studies here all agree that common interactional tasks may well be carried out by quite different linguistic practices and that these practices are dependent to a

certain extent on language features which are typologically distinct

Grammar and Interaction Emma Betz, 2008 This monograph provides a micro analytic description of the structure and communicative use of syntactic pivot constructions in German Using the methodology of Conversation Analysis this work shows that pivots emerge in interaction in response to local communicative needs Exclusively found in spoken German pivots allow a speaker to extend an utterance beyond a possible completion point in a syntactically and prosodically unobtrusive way Speakers utilize this basic property to promote context specific actions managing boundaries of speakership bridging sequential and topical junctures and dealing with different types of interactional trouble Through a close examination of syntactic pivots as an interactional resource this work shows that spoken linguistic structures can only be fully understood if we acknowledge the temporality of language and view grammar as usage based and negotiable This book thus contributes to a growing body of research at the intersection of grammar and interaction

Information Structure and Syntactic Change in the History of English Anneli Meurman-Solin, Maria Jose Lopez-Couso, Bettelou Los, 2012-08-02 The unifying topic of this

This monograph contains the first systematic investigation of the Japanese dative subject construction across time and space It demonstrates that in order to capture what speakers writers know about how to put an utterance or a clause together it is necessary to pay attention to what they do in actual language use and in different discourse types The work also shows the importance of diachronic perspectives to help us better understand the ways in which a particular grammatical structure is represented synchronically By utilizing modern Japanese conversation contemporary Japanese novels and a pre modern and modern Japanese literature corpus the study highlights the role of dative subjects at the semantic and discourse pragmatic levels Specifically it demonstrates that what has been considered to be a most grammatical aspect of Japanese actually turns out to be rather pragmatically oriented

Radical Construction Grammar William Croft,2001-10-25 This book is based on the results of research in language typology and motivated by the need for a theory to explain them The essence of the approach is a that almost all aspects of grammatical structure are language specific and b that language universals are to be found in conceptual structure and in the mapping of conceptual structure on to linguistic form It proposes intimate links between syntactic and semantic structures and argues that the basic elements of any language are not syntactic but syntactic semantic Gestalts Professor Croft puts forward a new approach to syntactic representation and a new model of how language and languages work He covers a wide range of syntactic phenomena illustrating these with examples that show the varied grammatical structures of the world s languages The book will be accessible all linguists at graduate level and beyond

Grammar and Inference in Conversation Michael C. Ewing,2005-12-21 This study analyzes how morphosyntactic structures and information flow characteristics are used by interlocutors in producing and understanding clauses in conversational Javanese focusing on the Cirebon variety of the language While some clauses display grammatical mechanisms used to code their structure explicitly and redundantly many other clauses include few if any of these grammatical resources These extremes mark a cline between the morphosyntactic and paratactic expression of clauses The situation is thrown into relief by the frequency of unexpressed referents and conversationalists heavy reliance on shared experience and cultural knowledge In all cases pragmatic inference grounded in the interactional context is essential for establishing not only the discourse functions but indeed also the very structure of clauses in conversational Javanese This study contributes to our understanding of transitivity emergent constituency prosodic organization and the co construction of meaning and structure by conversational interlocutors

Structural-functional Studies in English Grammar Michael Hannay, Gerard Steen,2007-01-01 This collection presents a number of studies in the lexico grammar of English which focus on the one hand on close reading of language in context and on the other hand on current functional theoretical concerns The various contributions represent distinct functionalist models of language including Functional Grammar and Functional

Language Form and Language Function Frederick J. Newmeyer, 2000 The two basic approaches to linguistics are the formalist and the functionalist approaches In this engaging monograph Frederick J Newmeyer a formalist argues that both approaches are valid However because formal and functional linguists have avoided direct confrontation they remain unaware of the compatibility of their results One of the author's goals is to make each side accessible to the other While remaining an ardent formalist Newmeyer stresses the limitations of a narrow formalist outlook that refuses to consider that anything of interest might have been discovered in the course of functionalist oriented research He argues that the basic principles of generative grammar in interaction with principles in other linguistic domains provide compelling accounts of phenomena that functionalists have used to try to refute the generative approach

Task-based grammar teaching of English Susanne Niemeier,2017-10-23 The focus on communication in TBLT often comes at the expense of form In this book the task based approach is enhanced and coupled with insights into cognitive grammar an approach which sees grammar as meaningful The book shows how grammar teaching can be integrated into a communicative lesson in a non explicit way i e by the backdoor The learners are involved in situations that they may also encounter outside their classrooms and they are given communicative tasks they are to work on and solve usually with a partner or in small groups What teachers need to invest for preparing such lessons is their own creativity as they have to come up with communicative situations which guide the learners into using a specific grammatical structure The book first discusses the didactic and the linguistic theories involved and then translates these theoretical perspectives into actual teaching practice focusing on the following grammatical phenomena tense aspect modality conditionals passive voice prepositions phrasal verbs verb complementation pronouns and articles
