Dialogue, Science and Academic Writing Zohar Livnat, 2012-01-01 This book investigates the dialogic nature of research articles from the perspective of discourse analysis based on theories of dialogicity It proposes a theoretical and applied framework for the understanding and exploration of scientific dialogicity Focusing on some dialogic components among them citations concession inclusive we and interrogatives a combined model of scientific dialogicity is proposed that reflects the place and role of various linguistic structures against the background of various theoretical approaches to dialogicity Taking this combined model as a basis the analysis demonstrates how scientific dialogicity is realized in an actual scientific dispute and how a scientific project is constructed step by step by means of a dialogue with its readers and discourse community A number of different patterns of scientific dialogicity are offered characterized by the different levels of the polemic held with the research world and other specific researchers from the classic moderate and polite dialogicity to a direct and personal confrontation between scientists

the Move Douglas Biber,Ulla Connor,Thomas A. Upton,2007-09-19 Discourse on the Move is the first book length exploration of how corpus based methods can be used for discourse analysis applied to the description of discourse organization The primary goal is to bring these two analytical perspectives together undertaking a detailed discourse analysis of each individual text but doing so in terms that can be generalized across all texts of a corpus The book explores two major approaches to this task top down and bottom up In the top down approach the functional components of a genre

are determined first and then all texts in a corpus are analyzed in terms of those components. In contrast, textual components emerge from the corpus analysis in the bottom up approach and the discourse organization of individual texts is then analyzed in terms of linguistically defined textual categories. Both approaches are illustrated through case studies of discourse structure in particular genres: fund raising letters, biology/biochemistry research articles, and university classroom teaching.

Perspectives on the Introductory Phase of Empirical Research Articles (Kathy) Ling Lin, 2019-10-22. Combining English for Specific Purposes (ESP), genre based analysis, corpus based language studies, and semi structured interviews, this book represents the first multi faceted project on the macro structure of empirical research articles (ERAs) from both synchronic and diachronic perspectives and on the I LR patterned introductory phase comprising two introductory sections: the Introduction and the Literature Review in RAs drawn from civil engineering and applied linguistics journals regarding their rhetorical organization, use of citation and structural and functional links and variations. The project comprises three logically interconnected studies using a multi perspective, the cross disciplinary cross generic, emic and published advice vs actual expert practices perspectives approach. It will make a significant contribution to our understanding of the genre evolution, rhetorical organization and citation features of ERAs, enrich English for Academic Purposes (EAP) theories and facilitate the development of EAP pedagogy and materials.

Also available separately as a paperback.

A Systemic Functional Grammar of English David Banks, 2019-01-03. Providing a simple but not simplistic introduction to the Systemic Functional Grammar (SFG) of English, this book serves as a launching pad for the beginning student and a review for the more seasoned linguist. With an introduction to SFG through lexicogrammar and the concept of rankshift, this book is the first introduction to SFG including Appraisal with examples exclusively sourced from twenty first century texts. Written for those learning English and English linguistics as a foreign language, this serves as an easy to read introduction or refresher course for Systemic Functional Linguistics.

Corpus Linguistics Beyond the Word, 2015-07-14. This volume will be of particular interest to readers interested in expanding the applications of corpus linguistics techniques through new tools and approaches. The text includes selected papers from the Fifth North American Symposium hosted by the Linguistics Department at Montclair State University in Montclair, New Jersey in May 2004. The symposium papers represented several areas of corpus studies including language development, syntactic analysis, pragmatics and discourse, language change, register variation, corpus creation and annotation.

and practical applications of corpus work primarily in language teaching but also in medical training and machine translation. A common thread through most of the papers was the use of corpora to study domains longer than the word. Not surprisingly, fully half of the papers deal with the computational tools and linguistic strategies needed to search for and analyze these longer spans of language while most of the remaining papers examine particular syntactic and rhetorical properties of one or more corpora.

Register, Genre, and Style Douglas Biber, Susan Conrad, 2019-05-16 A brand new edition of this flagship work that provides detailed descriptions of important text varieties in English along with methodological techniques to carry out analyses.

Investigating English Legal Genres in Academic and Professional Contexts Girolamo Tessuto, 2013-01-11 This volume contributes to the latest studies in legal discourse studies by presenting a descriptive and interpretive analysis of English legal genres used in academic and professional writing contexts. The results of corpora driven data are discussed through meta-discourse, genre and other theoretical perspectives and offer insights into the ways the writers' discursive practices and meanings shape their membership of the legal community and discipline. The volume attempts to show these id.

Academic Writing Maggie Charles, Susan Hunston, Diane Pecorari, 2011-10-20 Contemporary research into written academic discourse has become increasingly polarised between two approaches: corpus linguistics and discourse analysis. This volume presents a selection of recent work by experts in academic written discourse and illustrates how corpus linguistics and discourse analysis can work as complementary approaches. The overall introduction sets the volume against the backdrop of current work in English for Academic Purposes and introductions to each section draw out connections between the chapters and put them into context. The contributors are experts in the field and they cover both novice and expert examples of EAP. The book ends with an afterword that provides an agenda setting closing perspective on the future of EAP research. It will appeal to researchers and postgraduates in applied linguistics, corpus linguistics, discourse analysis and EAP.

Biomedical Engineering Sylwia Olsztyńska, Małgorzata Komorowska, 2011-01-08 This book is addressed to scientists and professionals working in the wide area of biomedical engineering from biochemistry and pharmacy to medicine and clinical engineering. A Practical Guide to Scientific Writing in Chemistry Andrew Terhemen Tyowua, 2023-03-31 Successful completion of postgraduate studies especially PhD and career advancement in academia strongly depend on the ability to publish scientific papers or books and attract research grants. However many chemical scientists find preparing scientific papers and research grant and book proposals difficult partly because of insufficient training in writing and partly because there are few practical books to enable them to learn the art. This step by step practical guide is intended mainly for postgraduate students and early career researchers in chemical science and the libraries that serve them but will also be useful to other scientists. Key Features Improves the reader's chances of getting their manuscript published in chemistry journals. Increases the likelihood of winning research grants in chemistry. Takes a lead by the hand approach. Contains chapters on the preparation of graphical abstracts and research highlights. Uses sketches and other illustration styles to aid mental visualization of concepts. Contains practical examples taken from published papers and successful research grant proposals.

Key Issues in English for Specific Purposes in Higher Education Yasemin Kırkgöz, Kenan Dikilitaş, 2018-01-08 This volume offers research based studies on English for Specific Purposes in higher education from across the world. By drawing on international studies the book brings together diverse ESP practices and aspects of relevant issues in the development of ESP programs teachers and learners in a coherent fashion. There is a growing need for undergraduate students to develop their proficiency of ESP skills and knowledge in the increasingly globalized world. Knowledge of ESP is an important factor in subject matter learning by students and also closely related to the performance of university graduates in the relevant sectors. Careful planning and efficient implementation are essential to ensure the quality of the language learning process. For a variety of reasons it proves difficult to maintain ESP instruction in higher education. These reasons include the incompetence of teachers lack of materials for that specific context as well as lack of opportunities for ESP teachers to develop their skills. The chapters in this book taken from a wide variety of countries shed light on the diversity of current practices and issues surrounding ESP.

Constructing Interpersonality Enrique Lafuente-Millán, Rosa Lorés-Sanz, Pilar Mur-Dueñas, 2010-02-19 The view that academic discourse is by definition impersonal has long been superseded. It seems unquestionable now that the interpersonal component of texts that is the ways in which the writers project themselves and their audience in the discourse is an essential factor determining the success of scholarly communication and has become a fundamental issue in the field of English for Academic Purposes. EAP Interpersonality is the key issue around which the articles in this edited book focus on. The eighteen contributions included in this volume provide a wide exploratory view of the many academic genres in which interpersonal is manifested and the various analytical approaches from which the textual manifestation of that interpersonal can be studied. The varied origin of the contributors is also representative of the global interest that the issue of interpersonal arouses in the field of

academic discourse analysis at an international level The present volume constitutes a highly valuable tool for applied linguists and discourse analysts with an interest in EAP as well as for students instructors and language teachers interested in academic discourse The book may also be of interest to other agents intervening in the research publication process such as translators proofreaders reviewers and editors
