disease process in humans with devastating health and financial consequences for the individual and society at large In  
humans drug and alcohol use disorders i e abuse and dependence are defined by clusters of behavioral symptoms that can be  
modeled to various degrees in animals Hallmark behavioral symptoms associated with drug and alcohol dependence are  
compulsive drug use loss of control during episodes of drug use the emergence of a negative emotional state in the absence  
of the drug and chronic relapse vulnerability during drug abstinence The transition to drug dependence is defined by  
neuroadaptations in brain circuits that in the absence of drugs mediate a variety of critical behavioral and physiological  
processes including natural reward positive and negative emotional states nociception and feeding Chronic drug exposure  
during the transition to dependence spurs 1 within systems changes in neural circuits that contribute to the acute rewarding  
effects of the drug and 2 recruitment of brain stress systems neuroendocrine and extra hypothalamic There are substantial  
genetic contributions to the propensity to use and abuse drugs and drug abuse is highly co morbid with various other  
psychiatric conditions e g anxiety disorders major depressive disorder that may precede or follow the development of drug  
use problems Across drugs of abuse there are overlapping and dissociable aspects of the behavioral and neural changes that  
define the transition to dependence Even within a single drug people abuse drugs for a variety of reasons The picture is  
further complicated by the fact that humans often abuse more than one drug concurrently Even in the face of these  
challenges pre clinical and clinical research is making exponential gains into understanding the neurobiology of drug  
addiction With the advent of new technologies and their combination with traditional approaches the field is able to ask and  
answer addiction related research questions in increasingly sophisticated ways Here we hope to assemble a collection of
