The Semiotics of X Jamin Pelkey, 2017-02-23 The X figure is ubiquitous in contemporary culture but attempts to explain our fixation with X are rare This book argues that the origins and meanings of X go far beyond alphabets and archetypes to remembered feelings of body movements movements best typified in the performance of spread eagle as a posture or gesture These body memories are then projected onto other patterns and dynamics to help us make sense of the world The argument is accomplished using a blend of insights from linguistic anthropology cognitive linguistics rhetoric culture and process semiotics to bring together revealing clues from languages cultures and thinkers around the world Chief among the uses and experiences of X are its tendencies to involve us in surprising reversals and blends In ancient times the X pattern was discussed as chiasmus a figure which according to Maurice Merleau Ponty informs the most basic elements of our bodily experience calling into question polarized dichotomies such as subject versus object Pushed to extremes presumed opposites like these tend to reverse suddenly Likewise blended experiences of our bodily extremities arms and legs toes and fingers hands and feet provide a plausible source of grounding for unique human abilities like analogy and double scope conceptual integration The book illustrates these dynamics by drawing attention to uses of X in history prehistory and daily life from sports and advertising to world mythology and languages around the world The Semiotics of X is the first step towards developing a larger argument on the important but neglected role that chiasmus plays in cognition It aims to inspire continued exploration on the figure with the full expectation that chiasmus will become for the 21st century what metaphor became for the 20th century a revolution in thinking about the way we think

Digital Culture & Society (DCS) Pablo Abend, Mathias Fuchs, Karin Wenz, 2022-03-07 This double issue of Digital Culture Society addresses the dialectics of play and labour taking a closer look at the problem of play and work from two overlapping albeit not mutually exclusive perspectives After the first issue explored the notion of laborious play this second one studies the concept of playful work The contributions feature critical inquiries into various phenomena of playful work ranging from interfaces of play and work in the BDSM subculture over labour in digital gaming to high frequency trading Alongside the articles the issue features an interview with Fred Turner Chair of the Department of Communication at Stanford University He talks about the Bauhaus in the US countercultural cybernetics technology and consciousness and work in the Silicon Valley
