This Special Issue entitled Transmucosal Absorption Enhancers in the Drug Delivery Field aims to present the current state of the art in the application of PEs to improve drug absorption. Emphasis is placed on identification of novel permeation enhancers, mechanisms of barrier alteration, physicochemical properties of PEs that contribute to optimal enhancement, action, new delivery models to assess PEs, studies assessing safety of PEs, approaches to assist translation of PEs into effective oral, nasal, ocular and vaginal dosage forms, and combining PEs with other delivery strategies.
