## **Eye In Primary Care A Symptom Based Approach:**

*Symptom-Based Approach to Pediatric Neurology* Deepak M. Kamat, Lalitha Sivaswamy, 2023-01-01 Primary health care providers such as pediatricians and family medicine physicians commonly encounter children with neurologic symptoms such as headache double vision facial weakness etc Most books currently available in the specialty of pediatric neurology are condition or disorder based and most of them are geared towards pediatric neurologists not generalists who take care of children A common thread amongst most currently available books in Pediatric Neurology is that the practitioner already knows what condition or disorder the child is suffering from This book focuses on symptoms to a large extent However children with chronic neurological conditions will follow up with their primary care physicians after their visit with the sub specialists They may have questions or ongoing concerns regarding the diagnosis that has been made or being considered This book attempts to provide information to the primary care physician regarding management and follow up of such children as well This book serves as a guide for busy clinicians who take care of children presenting with neurological symptoms with special emphasis on symptoms that are commonly encountered in clinical practice For each symptom a brief introduction is given as well as a definition and epidemiologic information for the given symptom Readers are also instructed on what historical features and physical examinations are essential in narrowing the differential diagnosis A recommendation on the management of the condition is then established Instructions on when one should refer the patient to subspecialists for further evaluation and management are clearly laid out Finally a list of appropriate resources is provided for families as well as clinical pearls that can be quickly scanned when one is pressed for time The overarching goal of this book is to enable the primary care physician to make a confident diagnosis triage efficiently and initiate treatment if need be Written by experts in the field *Symptom Based Approach to Pediatric Neurology* is a valuable resource for evaluation and management of children presenting with neurologic symptoms for primary care providers who take care of children *The Eye in Primary Care* Hunter Maclean, 2002 Taking a very practical approach looking at how the patient presents and addressing each sign separately this book gives the GP a summary of what to look for and what diagnosis to consider in cases of common eye conditions *DHEW Publication* ,1976 *Current Directions in Family Nurse Practitioner Curricula* ,1977 *Advanced Approaches in the Diagnosis and Treatment of Diabetes Mellitus and Secondary Complications* Pranav Kumar Prabhakar, Ram Prasad, Ponnurengam Malliappan Sivakumar, 2023-10-23 As we know diabetes mellitus is the most common metabolic endocrine disorder According to the WHO and American Diabetes Mellitus diabetes mellitus is the 3rd leading cause of death if we were to include all secondary complications However without including secondary complications it is 7th place in mortality and morbidity The point to be considered in the case of diabetes mellitus is the secondary complications caused in this condition Almost all organs affected by diabetes and results in a potentially worse condition The major secondary complications are neuropathy nephropathy retinopathy and diabetes foot microvascular and macrovascular complications

The long term complications grow slowly in the case of diabetes As the time living with diabetes becomes longer controlled glucose levels will be more difficult to achieve meaning there there will be more long term complications The aim of the current Research Topic on the secondary complications of diabetes and their management is to publish good quality research articles as well as reviews which should address the management of diabetes abnormalities of secondary complications and other disease involved in diabetes Potential Topics includes but not restricted to Secondary complications of diabetes mellitus Microvascular and macrovascular complications The role of oxidative stress in the diabetes burden New insights in glycemic control New strategies approaches to manage secondary complications such as Stearoyl CoA dismutase Acetyl CoA Carboxylase Adiponectin Adipocyte complement related protein 30 Hormone Sensitive Lipase HSL Inhibitors Recent development in the therapeutic approaches for glucose management such as Protein tyrosine phosphatase 1B PTP1B inhibitors Glycogen synthase kinase 3 GSK3 inhibitors 3 Adrenergic receptor agonist Retinoid X receptor PPAR agonist AMP activated protein kinase Development of new target as a target for antihyperglycemic drug designing
