Jere Whiting,1977 p B J Whiting savors proverbial expressions and has devoted much of his lifetime to studying and
collecting them no one knows more about British and American proverbs than he The present volume based upon writings in
British North America from the earliest settlements to approximately 1820 complements his and Archer Taylor s Dictionary
of American Proverbs and Proverbial Phrases 1820 1880 It differs from that work and from other standard collections
however in that its sources are primarily not literary but instead workaday writings letters diaries histories travel books
political pamphlets and the like The authors represent a wide cross section of the populace from scholars and statesmen to
farmers shopkeepers sailors and hunters Mr Whiting has combed all the obvious sources and hundreds of out of the way
publications of local journals and historical societies This body of material because it covers territory that has not been
extracted and compiled in a scholarly way before can justly be said to be the most valuable of all those that Whiting has
brought together according to Albert B Friedman What makes the work important is Whiting s authority a proverb or

no divining rod his tact feel experience determine what s the real thing and what is spurious Metaphor and Metonymy in
Comparison and Contrast René Dirven,Ralf Pörings,2003 The book elaborates one of Roman Jakobson s many brilliant ideas i
e his insight that the two cognitive strategies of the metaphoric and the metonymic are the end points on a continuum of
conceptualization processes This elaboration is achieved on the background of Lakoff and Johnson s twodomain approach i e
the mapping of a source onto a target domain of conceptualization Further approaches dwell on different stretches of this
metaphor metonymy continuum Still other papers probe into the specialized conceptual division of labor associated with both
modes of thought Two new breakthroughs in the cognitive linguistics approach to metaphor and metonymy have recently

been developed one is the three domain approach which concentrates on the new blends that become possible after the integration or the blending of source and target domain elements the other is the approach in terms of primary scenes and subscenes which often determine the way source and target domains interact
