Fabric Of Gender:

Textiles and Gender in Antiquity Mary Harlow, Cecile Michel, Louise Quillien, 2020-11-12 This volume looks at how the issues of textiles and gender intertwine across three millennia in antiquity and examines continuities and differences across time and space with surprising resonances for the modern world The interplay of gender identity textile production and use is notable on many levels from the question of who was involved in the transformation of raw materials into fabric at one end to the wearing of garments and the construction of identity at the other Textile production has often been considered to follow a linear trajectory from a domestic female activity to a more commercial or industrial male centred mode of production In reality many modes of production co existed and the making of textiles is not so easily grafted onto the labour of one sex or the other Similarly textiles once transformed into garments are often of unisex shape but worn to express the gender of the wearer As shown by the detailed textual source material and the rich illustrations in this volume dress and gender are intimately linked in the visual and written records of antiquity The contributors show how it is common practice in both art and literature not only to use particular garments to characterize one sex or the other but also to undermine characterizations by suggesting that they display features usually associated with the opposite gender *Crossdressing in Context, Vol. 1 Dress & Gender* Gregory G. Consumption and Gender in the Early Seventeenth-Century Household Jane Whittle, Elizabeth Griffiths, 2012-03-01 Lady Alice Le Strange of Hunstanton in Norfolk kept a continuous series of household accounts from 1610 1654 Jane Whittle and Elizabeth Griffiths have used the Le Stranges rich archive to reconstruct the material aspects of family life This involves looking not only at purchases but also at home production and gifts and not only at the luxurious but at the everyday consumption of food and medical care Consumption is viewed not just as a set of objects owned but as a process involving household management acquisition and appropriation a process that created and reinforced social links with craftsmen servants labourers and the local community It is argued that the county gentry provide a missing link in histories of consumption connecting the fashions of London and the royal court with those of middling strata of rural England Recent writing has focused upon the transformation of consumption patterns in the eighteenth century Here the earlier context is illuminated and instead of tradition and stability we find constant change and innovation Issues of gender permeate the study Consumption is often viewed as a female activity and the book looks in detail at who managed the provisioning purchases and work within the household how spending on sons and daughters differed and whether men and women attached different cultural values to household goods This single household s economy provides a window into some of most significant cultural and economic issues of early modern England innovations in trade retail and production the basis of gentry power social relations in the countryside and the gendering of family life
