Fabulous Geographies Catastrophic Histori:

The Lost Land of Lemuria Sumathi Ramaswamy, 2004-09-27 During the nineteenth century Lemuria was imagined as a land that once bridged India and Africa but disappeared into the ocean millennia ago much like Atlantis A sustained meditation on a lost place from a lost time this elegantly written book is the first to explore Lemuria's incarnations across cultures from Victorian era science to Euro American occultism to colonial and postcolonial India The Lost Land of Lemuria widens into a provocative exploration of the poetics and politics of loss to consider how this sentiment manifests itself in a fascination with vanished homelands hidden civilizations and forgotten peoples More than a consideration of nostalgia it shows how ideas once entertained but later discarded in the metropole can travel to the periphery and can be appropriated by those seeking to construct a meaningful world within the disenchantment of modernity Sumathi Ramaswamy ultimately reveals how loss itself has become a condition of modernity compelling us to rethink the politics of imagination and creativity in our day

A Cultural History of Race in the Age of Empire and Nation State Marina B. Mogilner, 2023-06-01 This volume covers the cultural history of race in the long 19th century the age of empire and nation state a transformative period during which a modern world had been forged and complex and hierarchical imperial formations were challenged by the emerging national norm The concept of race emerged as a dominant epistemology in the context of the conflicting entanglement of empire and nation as two alternative but quite compatible forms of social imaginary It penetrated all spheres of life under the novel conditions of the emerging mass culture and mass society and with the sanction of anthropocentric and positivistic science Allegedly primeval and parasocial race was seen as a uniquely stable constant in a society in flux amid transforming institutions economies and political regimes But contrary to this perception there was nothing stable or natural about race The spread of racializing social and political imagination only reinforced the need for constant renegotiation and readjustment of racial boundaries Therefore avoiding any structuralist simplifications this volume looks at specific imperial nationalizing and hybrid contexts framing the semantics and politics of race in the course of the long 19th century In different parts of the globalizing world various actors were applying their own notions of race to others and to themselves embracing it simultaneously as a language of othering and personal subjectivity Consequently the cultural history of race as told in this volume unfolds on many levels in multiple loci and in different genres thus reflecting the qualities of race as an omnipresent and all embracing discourse of the time

Contesting Earth's History in Transatlantic Literary Culture, 1860-1935 Richard Fallon, 2025-02-14 By the mid nineteenth century geologists and palaeontologists had reconstructed an authoritative narrative of Earth's deep history from the planet's molten origins to the rise of humanity Many figures in transatlantic science across subsequent decades however had problems with this narrative it was too secular inhuman and evolutionary or controlled too exclusively by elite scientists Speaking from palaeoscience's unevenly professionalized and controversy racked borders Christian fundamentalists charismatic psychics and respected scholars alike voiced their objections Until now no study has brought their work together for detailed comparative analysis Spanning from the 1860s to the interwar decades Contesting Earth's History examines the fascinating stories of five significant examples of fringe or borderline palaeoscience old and young earth creationism hollow earth theory clairvoyant time travel and sunken continent catastrophism Innovatively combining methods from literary studies with the history of science this book attends not just to the conceptual content of these strange sciences but also to their proponents communication of truth claims through diverse genres ranging from the scientific textbook and the technical monograph to the lost world romance and the epic poem By paying close attention to the hitherto overlooked textual forms and literary strategies of these works of pseudoscience this volume throws into relief the variant conceptions of audience evidence and method that jostled and competed in wider scientific culture during this period It also demonstrates that for all their diversity authors of borderline palaeoscience shared the desire to shift the balance of power creating textual spaces where exclusive hierarchies of scientific expertise could be levelled away These conjurors of lost worlds often captivated wide audiences and many of their bizarre astonishing and iconoclastic ideas remain with us to this day Some even inspired early science fiction by the likes of H P Lovecraft and Edgar Rice Burroughs Hijacking geologists and palaeontologists longstanding effort at making the prehistoric past visible authors on the borderlines of palaeoscience asserted their right to scientific authority and encouraged readers to gaze into time's abyss with bold new eyes

Reassembling the Strange Thomas Anderson, 2018-10-15 This book examines how Westerners understood and processed Madagascar and its environment during the nineteenth century Madagascar's unique ecosystem crafted its reputation as a strange place full of unusual species Westerners however often minimized Madagascar's peculiar features to stress the commonality of its fauna and flora with the world The attempt to understand the island through science led to a domestication of its environment that created the image of a tame and known world capable of being controlled and used by Western powers At the heart of the exploration of Madagascar and its transformation in Western eyes from a strange world to a cash crop colony were missionaries and naturalists who relied upon global experiences to master the island by normalizing the peculiar qualities of Madagascar's environment This book reveals how the environment played a dominant role in understanding the island and its people and how current environmental debates have evolved from earlier policies and discussions about the environment **Hidden History (Volume 2 of 2) (EasyRead Super Large 20pt Edition)** ,
