Orr,2019-11-28 The book builds an original argument for the department store as a significant site of design production and therefore offers an alternative interpretation to the mainstream focus on consumption within retail history Emily M Orr presents a fresh perspective on the rise of modern urban consumer culture of which the department store was a key feature By investigating the production processes of display as well as fascinating information about display making's tools and technologies the skills of the displayman and the meaning and context of design decisions which shaped the final visual effect are revealed In addition the book identifies and isolates display as a distinct moment in the life of the commodity and understands it as an influential channel of mediation in the shopping experience The assembly and interpretation of a diverse range of previously unexplored primary resources and archives yields fascinating new evidence showing how display achieved an agency which transformed everyday objects into commodities and made consumers out of passersby Nabokov in Motion Yuri Leving,2022-02-10 Adopting the modernist master Vladimir Nabokov as its guide Nabokov in Motion Modernity and Movement is an exploration of the radically changing social historical technological and literary culture of the early 20th century a time when modes of communication and transportation especially were changing society in drastic and profound ways Across seventy microchapters that are by turn serious ironic informative and playful and which take on topics such as automobiles trains airplanes electricity elevators advertisements telegraphs and telephones Yuri Leving offers new ways to understand Nabokov Russian literature and technology modernism and world material culture Nabokov's writings are analyzed against a broad context of prose and poetry and from the point of view of what Leving calls the poetics of urbanism in literature Nabokov in Motion is a ground breaking exploration of urban and material themes in literature and creates a complex and vibrant cultural fabric of which Nabokov is the master weaver Rethinking the Roman City Dunia Filippi,2022-03-30 The spatial turn has brought forward new analytical imperatives about the importance of space in the relationship between physical and social networks of meaning This volume explores this in relation to approaches and methodologies in the study of urban space in Roman Italy As a consequence of these new imperatives sociological studies on ancient Roman cities are flourishing demonstrating a new set of approaches that have developed separately from traditional historical and topographical analyses Rethinking the Roman City represents a convergence of these different approaches to propose a new interpretive model looking at the Roman city and one of its key elements the forum After an introductory discussion of methodological issues internationally known specialists consider three key sites of the Roman world Rome Ostia and Pompeii Chapters focus on physical space and or the use of those spaces to inter relate these different approaches The focus then moves to the Forum Romanum considering the possible analytical trajectories available historical topographical literary comparative and sociological and the diversity of

The Urban Department Store in America, 1850-1930 Dr Louisa Iarocci, 2014-12-28 In the late nineteenth century the urban department store arose as a built artifact and as a social institution in the United States While the physical building type is the foundation of this comprehensive architectural study Iarocci reaches beyond the analysis of the brick and mortar to reconsider how the spaces of selling were culturally produced spaces as well as the product of interrelated economic social technological and aesthetic forces

"The Urban Department Store in America, 1850-1930" Louisa Iarocci, 2017-07-05 In the late nineteenth century the urban department store arose as a built artifact and as a social institution in the United States While the physical building type is the foundation of this comprehensive architectural study Louisa Iarocci reaches beyond the analysis of the bricks and mortar to reconsider how the spaces of selling were culturally produced spaces as well as the product of interrelated economic social technological and aesthetic forces The agenda of the book is three fold to address the lack of a comprehensive architectural study of the nineteenth century department store in the United States to expand the analysis of the commercial city as a built and represented entity and to continue recent scholarly efforts that seek to understand commercial space as a historically specific and a conceptually perceived construct The Urban Department Store in America 1850 1930 acts as a corrective to a current imbalance in the historiography of this retailing institution that tends to privilege its role as an autonomous modern building type Instead Iarocci documents the development of the department store as an urban institution that grew out of the built space of the city and the lived spaces of its occupants
