Exterminism And Cold War:

Exterminism and Cold War Edward Palmer Thompson, 1982 What is the nature of the arms race and how did it come about Exterminism and cold war ,1979 Exterminism and Cold War Edward P. Thompson, 1982 **Mother Jones Magazine** ,1983-02 Mother Jones is an award winning national magazine widely respected for its groundbreaking investigative reporting and coverage of sustainability and environmental issues **Perry Anderson** Gregory Elliott, 1998 This first full reconstruction of Perry Anderson's distinguished career provides an overview of the evolution of the British New Left since 1956 and reveals a great deal about the vicissitudes of Marxist theory and political practice in the era of post-Stalinist communism Gregory Elliott ultimately argues that notwithstanding significant discontinuities in his intellectual development Anderson remains a critically engaged thinker of the intransigent Left a contemporary historian whose commitment to the long view renders him an indispensable commentator on our times Elliott also sketches the collective career of New Left Review one of the most influential international journals of the postwar period BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved **Theory and History** Gerard McCann, 2019-05-23 First published in 1997 the aim of this book is to look at the historical materialism of E P Thompson while introducing him as a political thinker of distinction The study examines many aspects of Thompson's life and work to give a comprehensive statement on his theory of historical change It surveys the intellectual background from which he emerged the core values of socialist humanism as understood by his generation of the Left his contribution to history from below his critique of structuralist Marxism and his practical input to political dissent The scope of this study covers fifty years of socialist polemics and offers an insight into the battles which were fought out between the old and new Left until the collapse of command economy communism in 1989 Throughout the work of Thompson is presented as a testimony to a lineage of social thinkers as well as to the ideal of the common weal much cherished by radical practitioners of the past

E.P. Thompson Harvey J. Kaye, Keith McClelland, 1990 A discussion of the historical theoretical and political problems that have been central to the work of Thompson as an historian socialist and peace activist A key focus is the relationship between determination and agency the central thesis of The making of the English working class in particular reference to historical theory and practice Paper edition unseen 15 95 Annotation copyrighted by Book News Inc Portland OR Cities Under Siege Stephen Graham, 2011-11-01 Cities are the new battleground of our increasingly urban world From the slums of the global South to the wealthy financial centers of the West Cities Under Siege traces the spread of political violence through the sites spaces infrastructure and symbols of the world's rapidly expanding metropolitan areas Drawing on a wealth of original research Stephen Graham shows how Western militaries and security forces now perceive all urban terrain as a conflict zone inhabited by lurking shadow enemies Urban inhabitants have become targets that need to be continually tracked scanned and controlled Graham examines the transformation of Western armies into high tech urban counter

insurgency forces He looks at the militarization and surveillance of international borders the use of security concerns to suppress democratic dissent and the enacting of legislation to suspend civilian law In doing so he reveals how the New Military Urbanism permeates the entire fabric of urban life from subway and transport networks hardwired with high tech command and control systems to the insidious militarization of a popular culture corrupted by the all pervasive discourse of terrorism

In the Tracks of Historical Materialism Perry Anderson, 2016-02-23 What have been the major changes in the intellectual landscape of the left since the mid seventies Have they on balance represented an emancipation or a retreat for socialist culture as a whole In the Tracks of Historical Materialism looks at some of the paradoxes in the evolution of Marxist thought in this period It starts by considering the remarkable and variegated growth of historical materialism in the Anglo American world spreading across a broad field from history to economics politics to literature sociology to philosophy By contrast the same years have seen a drastic recession of Marxist influences in the Latin cultures where it was traditionally strong France or Italy Its main theoretical challengers there proved to be successive forms of structuralism and post structuralism The common coordinates of these tracing the outer bounds of the work of Levi Strauss or Lacan Foucault or Derrida are surveyed and criticized in the light of the inherent limitations of the language model from which they derived In Germany on the other hand the theoretical scene has been largely dominated by the accumulating work of Habermas with its roots in the Frankfurt School Yet Habermas s philosophy also reveals unexpected affinities with the trend of prevalent Parisian concerns in its unifying emphasis on communication while at the same time diverging from them in the constancy of its political commitments The historical background of international class struggles against which these variant fates of Marxism in the west were played out is then explored with special attention to the interconnection between the destinies of Maoism and Eurocommunism What finally is the nature of the relationship between Marxism as a theory and socialism as a goal A conclusion reviews the wider issues posed for the labour movement by the rise of the peace movement and the women s movement and suggests a range of priorities for the further development of Marxist thought in the eighties

The New Left, National Identity, and the Break-up of Britain Wade Matthews, 2013-08-08 In The New Left National Identity and the Break Up of Britain Wade Matthews charts the nexus between socialism and national identity in the work of key New Left intellectuals E P Thompson Raymond Williams Stuart Hall Perry Anderson and Tom Nairn Matthews considers these New Left thinkers response to Britain s various national questions including decolonization and the End of Empire the rise of European integration and separatist nationalisms in Scotland and Wales and to the national and nationalist implications of Thatcherism Cold War and the fall of communism Matthews establishes a contestatory dialogue around these issues throughout the book based around different New Left perspectives on what has been called the break up of Britain He demonstrates that national questions were crucial to New Left debates

Realism, Utopia, and the Mushroom Cloud Michael Bess, 1993-12 Two world wars concentration camps the obliteration of Hiroshima and Nagasaki and continued

preparations for nuclear war illustrate the modern world's propensity for mass destruction. Yet there have been important signs of resistance to this trend. These have included not only the emergence of mass based peace and disarmament movements but activist intellectuals grappling with the growing problem posed by mass violence among nation states. Bess examines the lives and ideas of four of these intellectuals: Leo Szilard of Hungary and later the United States; E. P. Thompson of England; Danilo Dolci of Italy; and Louise Weiss of France. *Realism, Utopia and the Mushroom Cloud* is a powerful, important scholarly work casting new light upon some of the great issues of modern times. Readers will learn much from it. Lawrence S. Wittner, *Peace and Change*. Bess seeks to understand the way in which the creation of the atomic bomb has changed the social and political situation of humankind. Are we to be held hostage by military forces or can we transform our situation? He describes the lives of four very different activists, each with different views on what causes conflict and how best to address conflict. Overall, this book offers an interesting perspective on life after the atomic bomb. In asking ourselves what the possibilities of our future are, we can turn to these lives for some guidance. This book is informative, provocative, and encourages one to consider carefully how s/he chooses to live. Erin McKenna, *Utopian Studies*. These four lives researched and skillfully presented by historian Michael Bess make fascinating stories in themselves. They also serve as useful vehicles for examining major cross currents of Cold War resistance. From Weiss, the cynical pragmatist, to Szilard, the high level fixer, to Thompson, the social reformer, to Dolci, the spiritual street organizer, Michael Bess has woven an illuminating tapestry of human efforts to cope with life under the mushroom cloud. Samuel H. Day Jr., *The Progressive*. Unparalleled catastrophe Rhys Crilly, 2023-09-12. After the first use of nuclear weapons in 1945, Albert Einstein warned that we thus drift towards unparalleled catastrophe. Today we are no longer drifting but racing toward catastrophe at breakneck speed. This book analyses recent events that have brought about a dangerous Third Nuclear Age. From the collapse of arms control treaties and the development of hypersonic missiles to the pop culture that shapes how we think about nuclear weapons, via how nuclear weapons intersect with the global threats posed by pandemics, populism, climate change, corruption, militarism, and racism, this book explores the nuclear zeitgeist of today. It presents the case for critical nuclear studies and provides an important intervention into debates about nuclear weapons and international security. Today the planet stands on the brink of catastrophe. This book tells you why and what we can do about it. **The Many Lives of Galileo** Dougal McNeill, 2005. *The Many Lives of Galileo* is a Marxist study of the development of Bertolt Brecht's great play *Galileo* on the English stage. Tracing various translations of Brecht's original and the historical and political moments surrounding these translations, Dougal McNeill examines how across the distances of culture, history, and language, *The Life of Galileo* has come to figure so prominently in the life of English language theatre. The translations and productions of *Galileo* by Charles Laughton, Howard Brenton, and David Hare are examined in a method combining close reading with an attention to broader social contexts, with an eye to uncovering their implications for drama in performance. Brecht valued re-creation, re-invention, and re-telling as

much as creation itself In this book the author applies Brecht's aesthetic to translations of his own work following Laughton Brenton and Hare as they set themselves the task of rewriting Brecht and in the process use him to comment on their own eras

Animals and War Ryan Hediger, 2012-11-01 *Animals and War* is the first collection of essays to explore its important yet neglected topic Scholars from sociology history anthropology and literary and cultural studies investigate the presence of animals in human wars The essays analyze a wide range of phenomena including the new militarization of bees zoo animals during war war dogs Finish horses in World War II Canadian war literature and the effort to memorialize nonhuman war animals Although animals are often forced to participate in human wars their presence also signals human vulnerability and dependence Several chapters demonstrate that in the frequently horrible circumstances of war powerful sympathies nonetheless flourish between humans and animals *Animals and War* thus exposes the often paradoxical contours of human animal relationships

Grateful Nation Ellen Moore, 2017-10-26 In today's volunteer military many recruits enlist for the educational benefits yet a significant number of veterans struggle in the classroom and many drop out The difficulties faced by student veterans have been attributed to various factors poor academic preparation PTSD and other postwar ailments and allegedly antimilitary sentiments on college campuses In *Grateful Nation* Ellen Moore challenges these narratives by tracing the experiences of Iraq and Afghanistan war veterans at two California college campuses Drawing on interviews with dozens of veterans classroom observations and assessments of the work of veteran support organizations Moore finds that veterans' academic struggles result from their military training and combat experience which complicate their ability to function in civilian schools While there is little evidence of antimilitary bias on college campuses Moore demonstrates the ways in which college programs that conflate support for veterans with support for the institutional military lead to suppression of campus debate about the wars discourage antiwar activism and encourage a growing militarization

Farewell to Reason Paul Feyerabend, 2020-05-05 *Farewell to Reason* offers a vigorous challenge to the scientific rationalism that underlies Western ideals of progress and development whose damaging social and ecological consequences are now widely recognized For all their variety in theme and occasion the essays in this book share a consistent philosophical purpose Whether discussing Greek art and thought vindicating the church's battle with Galileo exploring the development of quantum physics or exposing the dogmatism of Karl Popper Feyerabend defends a relativist and historicist notion of the sciences The appeal to reason he insists is empty and must be replaced by a notion of science that subordinates it to the needs of citizens and communities Provocative polemical and rigorously argued *Farewell to Reason* will infuriate Feyerabend's critics and delight his many admirers

Capitalist Imperialism, Crisis and the State J. Willoughby, 2013-07-04 How valid is the Marxian theory of imperialism This book traces the historical development of the theory of imperialism the internationalisation of capital and theories of capitalist nation state formation
