Vakoch,2021-04-29 Caught as we are in a grave climate crisis that seems more irreversible with every passing year our literary portrayals of the future often feature the dystopian collapse of the world as we know it Science fiction explores how we got here while pointing toward a more hopeful path forward From an ecofeminist perspective a core cause of our current ecological catastrophe is the patriarchal domination of nature playing out in parallel with the oppression of women As an alternative to dystopian futures that seem increasingly inevitable ecofeminist science fiction helps us conjure utopias that promote environmental sustainability based on more egalitarian human relationships *Dystopias and Utopias on Earth and Beyond* Feminist Ecocriticism of Science Fiction explores the fictional worlds of such canonical novelists as Margaret Atwood Octavia Butler Ursula K Le Guin Doris Lessing and Joan Slonczewski as well as those of lesser known science fiction writers as they collectively probe humanity's greatest existential threats Contributors from five continents provide compelling analyses of far future dystopias on Earth that are all too easy to imagine becoming reality if humankind's current trajectory continues as well as provocative insights into science fiction utopias set on idyllic planets orbiting distant stars which offer liberatory alternatives that might someday be actualized in the real world By examining the links between the destruction of the environment and the domination of women *Dystopias and Utopias on Earth and Beyond* provides the tools to counteract those intertwined oppressions helping create a foundation for a truly habitable world **Invisible Forces** J. The Book of Becoming Ronald Alan Meakin, 2015-12-11 Why is there something rather than nothing From the ancient text found on The Emerald Tablet the motion implicit in achieving higher levels of consciousness is explored through questions surrounding whether evolution proceeds through natural selection or by controlled design and whether the nature of evolution itself is changing Along our journey we ask whether Gaia theory can be extended beyond an earthly arena whether science and religion are really incompatible and how do paranormal experiences such as clairvoyance actually arise Considerations of free will choice the nature of time and virtue will lead us to identify the obstacles to be found in the way of our survival and whether or not we are capable of developing the means to prevent the extinction of the human race

When the Asteroid Hits Allen A. Debus, 2024-10-04 The incomprehensible notion of a very large chunk of ice or rock from outer space smashing into the Earth has only become mainstream within the past two centuries Though early writers imagined the utterly fantastic consequences of comet collisions and speculated on the devastation they might wreak it was not until the 1980s when scientists finally resolved that dinosaurs were extinguished by an asteroid 66 million years ago This startling announcement captivated the media and tilted the science fiction world but in reality history may have been punctuated repeatedly by such events This book collects and analyzes ideas of asteroid comet and planetary impacts with Earth spanning two centuries from the first realization of extinctions in fossil records to the new millennium reflected in scores of sci fi stories films and televised science documentaries The author examines social and geopolitical fears tied to the prospect of a cosmic borne catastrophe Science fiction and speculation are artfully melded *The Early Evolutionary*

Imagination Emelie Jonsson, 2021-09-29 Darwinian evolution is an imaginative problem that has been passed down to us unsolved It is our most powerful explanation of humanity's place in nature but it is also more cognitively demanding and less emotionally satisfying than any myth From the publication of the Origin of Species in 1859 evolution has pushed our capacity for storytelling into overdrive sparking fairy tales adventure stories political allegories utopias dystopias social realist novels and existential meditations Though this influence on literature has been widely studied it has not been explained psychologically This book argues for the adaptive function of storytelling integrates traditional humanist scholarship with current knowledge about the evolved and adapted human mind and calls for literary scholars to reframe their interpretation of the first authors who responded to Darwin Asteroid Impact Amelia Khatri, AI, 2025-02-15 Asteroid Impact explores the Earth shattering event that led to the Cretaceous Paleogene extinction forever altering life on our planet This book examines the geological and paleontological evidence surrounding the asteroid impact that occurred roughly 66 million years ago The

book highlights how the discovery of iridium anomalies and shocked quartz were initial key pieces of evidence that supported the asteroid impact theory. It also shows how this single event drastically altered the environment leading to widespread species extinction and influencing the course of evolution. The book progresses by first establishing a historical context followed by an examination of physical evidence including the Chicxulub crater and impact debris. It then synthesizes data from various scientific disciplines such as Earth sciences and planetary science to provide a comprehensive overview. The book explains how the Chicxulub impact served as the primary catalyst for the extinction event causing long lasting changes in Earth's biodiversity and geological structures. Through visualizations and accessible explanations it offers a fresh perspective on this pivotal moment in Earth's history.

The Power of Bridging John A. Powell, 2024-12-03 A bold guide for connecting across differences even those that seem impossible. Wise and visionary Powell helps us find the courage to forge connections with others, the earth, and ourselves in order to transform the world from the inside out. Valarie Kaur, bestselling author of *See No Stranger* and *Sage Warrior*. We don't want to live in a society in turmoil. In fact, 93 percent of people in the US want to reduce divisiveness and 86 percent believe it's possible to disagree in a healthy way. Yet with increasing political and social fragmentation, many of us don't know how to move past our differences. Civil rights scholar John A. Powell presents an actionable path through bridging that helps us communicate, coexist, and imagine a new story for our shared future where we all belong. With inimitable warmth and vision, Powell offers a framework for building cohesion and solidarity between disparate beliefs and backgrounds. Bridging is more than a discrete list of actions to follow; it's a mindset we can develop to help us foster belonging and connection. Key elements of the bridging mindset include: Understanding how deeply othering shapes our world, priming us to see difference of any kind (race, gender, political orientation, etc.) as a threat; Identifying where breaking happens when people are excluded or treated differently for being perceived as other; Embracing belonging as one of our core human needs; we all want to feel seen, valued, and appreciated just as we are; Committing ourselves to treat all people like they belong; Allowing ourselves grace when we inevitably fall short and resolving to try again. Throughout the book, Powell shares personal reflections as well as practices to help you begin bridging wherever you are: in your community, friendships, family, workplace, even with those whom you might never have imagined you could find common ground. Bridging is a salve for our fractured world, Powell says. We can overcome the illusion of separateness by honoring our differences, transcending the notion that difference divides us, and instead co-create a world where everyone belongs.
