Extinction Of Dinosaurs:

The Great Dinosaur Extinction Controversy Charles Officer, Jake Page, 1996-06-30 In 1980 Nobel Laureate Luis Alvarez announced his theory of the dinosaurs final demise a gigantic meteorite crashed into the earth and raised a cloud of dust that caused darkness for years suppressing photosynthesis which impeded plant growth and eventually starved the dinosaurs This idea exploded into common awareness with almost unprecedented speed and was instantly embraced by the media and the public Almost without question it quickly became the hottest scientific fact Unfortunately for Alvarez many in the scientific community did to support this theory and in fact later research showed the impossibility of such an idea The Great Dinosaur Extinction Controversy chronicles the fantastic story of how this hypothesis became so widespread the way it became common knowledge from the pages of Science to The New York Times to Parade Magazine the controversy it caused and the ample scientific research that proves the theory wrong Officer and Page also present an attractive and carefully investigated alternative explanation for the mass extinctions that occurred at the end of the Cretaceous period Through this account they show the ways that sound science should be performed and the findings transmitted Extinction and Radiation J. David Archibald, 2011-03-15 This study identifies the fall of dinosaurs as the factor that allowed mammals to evolve into the dominant tetrapod form It refutes the single cause impact theory for dinosaur extinction and demonstrates that multiple factors massive volcanic eruptions loss of shallow seas and extraterrestrial impact likely led to their demise While their avian relatives ultimately survived and thrived terrestrial dinosaurs did not Taking their place as the dominant land and sea tetrapods were mammals whose radiation was explosive following nonavian dinosaur extinction The author argues that because of dinosaurs Mesozoic mammals changed relatively slowly for 145 million years compared to the prodigious Cenozoic radiation that followed Finally out from under the shadow of the giant reptiles Cenozoic mammals evolved into the forms we recognize today in a mere ten million years after dinosaur extinction **Dinosaur Extinction and the End of an Era** J. David Archibald, 1996 Broadening the basis of information on the topic of the Cretaceous extinction this book particularly highlights evidence that points away from the global catastrophic scenario towards a fossil based theory suggesting that a multitude of factors resulted in the period s radical changes The Dinosaur Extinction Megan Cooley Peterson, 2019 Uncover the mystery of the dinosaur extinction with diagrams strong photos and hi lo text *The Extinction of the Dinosaurs* Don Nardo, 2002 Discusses the extinction of these ancient creatures and the scientific research used **The Evolution and Extinction of the Dinosaurs** David E.
