Enzymes in the Environment Richard G. Burns, Richard P. Dick, 2002-01-29 The need to understand the biological processes that are important for essential aquatic and terrestrial ecosystem function has prompted much research into the field of ecological enzymology This book presents the two broad areas of application in a compilation of reviews by 21 international experts in their respective fields The first explores enzymatic activities to assess the processes or mechanisms that operate in a given system such as the rhizosphere plant leaves and shoots soil surfaces and biofilms The second considers enzymes or microbial cells as sensors to detect microbial activity and stresses due to pollution management or climatic change in both aquatic and terrestrial ecosystems Plant Toxin Analysis Hans F. Linskens, John F. Jackson, 2013-03-09 Chemical defence by means of toxins poisonous to other organisms be they animals or plants is widespread amongst the plant kingdom including microorganisms as well This book embraces the analysis of a wide range of plant toxins and this fills a gap in the plant pathology and ecological biochemistry fields The topics covered include toxic extracellular enzymes host selective toxins elicitors phototoxins aflatoxins mycotoxins and ecotoxic substance tests by pollen germination and growth The analytical procedures which are used to evaluate the toxins are covered in such a way that the reader is able to carry them out mostly solely by following the detailed descriptions **Growing Fungus** N.A.
