The book details a proven process that helps readers deliver Web projects on time, within budget, and with fewer defects.

*Extreme Programming and Agile Methods - XP/Agile Universe 2003* Frank Maurer, Don Wells, 2011-04-08 XP/Agile Universe 2003 is the third conference in a series running in North America and attracting participants from all over the world who are interested in the research, development, and application of agile software processes. Agile approaches value people and interaction over processes and tools, moving software engineering from the process-oriented software development approaches of the 1990s towards people-oriented approaches that we are starting to see more and more in this decade. Agile approaches stress a holistic view of software developers as being involved in analysis, design, implementation, and testing activities, while more traditional Tayloristic approaches separate these tasks and assign them to different resources. Tayloristic approaches create knowledge-sharing problems as information gathered by one person needs to be handed over, usually in the form of documentation, to the next person in the chain. Agile approaches reduce the number of hand-offs and thus decrease the amount of required documentation for knowledge sharing. While deemed a novelty only a few years ago, agile methods are now becoming established in the software industry and are being applied in more and more application domains. While agile approaches move into the mainstream of software organizations, we are only now beginning to understand their benefits, areas of applicability, and also their dangers. This year's conference will increase this understanding and provide a better base for industry practitioners as they assess the effectiveness of agile methods in their environment.

**Extreme Programming Refactored** Don Rosenberg, Matt Stephens, 2008-01-01 *Extreme*

Programming Refactored The Case Against XP featuring Songs of the Extremos takes a satirical look at the increasingly hyped extreme programming XP methodology It explores some quite astonishing Extremo quotes that have typified the XP approach quotes such as XPers are not afraid of oral documentation Schedule is the customer s problem Dependencies between requirements are more a matter of fear than reality and Concentration is the enemy In between the chuckles though there is a serious analysis of XP s many flaws The authors also examine C3 the first XP project whose team most of whom went on to get XP book deals shortly before C3 s cancellation described themselves as the best team on the face of the Earth In a later chapter the authors also note that one problem which can affect pair programmers is overconfidence or is that eXcessive courage The authors examine whether the problems that led to C3 s inexplicable cancellation could also afflict present day XP projects In the final chapter Refactoring XP Matt and Doug suggest some ways of achieving the agile goals of XP using some XP practices used in moderation combined with other less risk laden methods

**Extreme Programming and Agile Processes in Software Engineering** Pekka Abrahamsson, Michele Marchesi, Giancarlo Succi, 2006-06-10 This book constitutes the refereed proceedings of the 7th International Conference on Extreme Programming and Agile Processes in Software Engineering XP 2006 held in Oulu Finland June 2006 The book presents 16 revised full papers together with 6 experience papers 12 poster papers and panel summaries organized in topical sections on foundation and rationale for agile methods effects of pair programming quality in agile software development and more

**Extreme Programming and Agile Processes in Software Engineering** Hubert Baumeister, Michele Marchesi, Mike Holcombe, 2005-06-13 Extreme Programming has come a long way since its rst use in the C3 project almost 10 years ago Agile methods have found their way into the mainstream and at the end of last year we saw the second edition of Kent Beck s book on Extreme Programming containing a major refactoring of XP This year the 6th International Conference on Extreme Programming and Agile Processes in Software Engineering took place June 18 23 in She eld As in the years before XP 2005 provided a unique forum for industry and academic professionals to discuss their needs and ideas on Extreme Programming and ile methodologies These proceedings re ect the activities during the conference which ranged from presentation of research papers invited talks posters and demonstrations panels and activity sessions to tutorials and workshops cluded are also papers from the Ph D and Master s Symposium which provided a forum for young researchers to present their results and to get feedback As varied as the activities were the topics of the conference which covered the presentation of new and improved practices empirical studies experience reports and case studies and last but not least the social aspects of agile methods The papers and the activities went through a rigorous reviewing process Each paper was reviewed by at least three Program Committee members and was discussed carefully among the Program Committee Of 62 papers submitted only 22 were accepted as full papers

**Extreme Programming and Agile Processes in Software Engineering** Jutta Eckstein, Hubert Baumeister, 2004-05-14 Software development is being revolutionized The heavy weight processes of the 1980s and 1990s are being replaced by light

weight so called agile processes Agile processes move the focus of software development back to what really matters running software This is only made possible by accepting that software development is a creative job done by with and for individual human beings For this reason agile software development encourages interaction communication and fun This was the focus of the Fifth International Conference on Extreme P

gramming and Agile Processes in Software Engineering which took place between June 6 and June 10 2004 at the conference center in Garmisch Partenkirchen at the foot of the Bavarian Alps near Munich Germany In this way the conference provided a unique forum for industry and academic professionals to discuss their needs and ideas for incorporating Extreme Programming and Agile Methodologies into their professional life under consideration of the human factor We celebrated this year's conference by reflecting on what we had achieved in the last half decade and we also focused on the challenges we will face in the near future

*Agile Processes in Software Engineering and Extreme Programming* Pekka Abrahamsson, Richard Baskerville, Kieran Conboy, Brian Fitzgerald, Lorraine Morgan, Xiaofeng Wang, 2008-06-10 The XP conference series established in 2000 was the first conference dedicated to agile processes in software engineering The idea of the conference is to offer a unique setting for advancing the state of the art in the research and practice of agile processes This year's conference was the ninth consecutive edition of this international event The conference has grown to be the largest conference on agile software development outside North America The XP conference enjoys being one of those conferences that truly brings practitioners and academics together About 70% of XP participants come from industry and the number of academics has grown steadily over the years XP is more of an experience rather than a regular conference It

offers several different ways to interact and strives to create a truly collaborative environment where new ideas and exciting findings can be presented and shared For example this year's open space session which was a conference within a conference was larger than ever before Agile software development is a unique phenomenon from several perspectives

*Extreme Programming and Agile Processes in Software Engineering* Michele Marchesi, Giancarlo Succi, 2003-05-13 The LNCS series reports state of the art results in computer science research development and education at a high level and in both printed and electronic form Enjoying tight cooperation with the R D community with numerous individuals as well as with prestigious organizations and societies LNCS has grown into the most comprehensive computer science research forum available The scope of LNCS including its subseries LNAI spans the whole range of computer science and information technology including interdisciplinary topics in a variety of application fields Book jacket *Extreme Programming and Agile Methods - XP/Agile Universe 2002* Don Wells, Lauris Williams, 2003-08-02 The second XP Universe and first Agile Universe brought together many people interested in building software in a new way Held in Chicago August 4-7 2002 it attracted software experts educators and developers Unlike most conferences the venue was very dynamic Many activities were not even well defined in advance All discussions were encouraged to be spontaneous Even so there were some written words available and you are holding all of them now We have collected as much material as possible together into this small volume It is just the tip of the iceberg of course A reminder to us of what we learned the people we met and the ideas we expressed The conference papers including research and experience papers are reproduced in these proceedings Forty one 41 papers were submitted Each submitted paper received three reviews by program committee members The program committee consisted of 40 members Papers submitted by program committee members were refereed separately This ensured that reviewers could provide an honest feedback not seen by the paper submitters In many cases the program committee shepherded authors to significantly improve their initial submission prior to completing the version contained in these proceedings In the end the program committee chose 25 papers for publication 60% acceptance *Professional Java Tools for Extreme Programming* Richard Hightower, Warner Onstine, Paul Visan, Damon Payne, Joseph D.
