Fagan, 2013-06-11 The past fifteen thousand years the entire span of human civilization have witnessed dramatic sea level changes which began with rapid global warming at the end of the Ice Age when coastlines were more than seven hundred feet below modern levels Over the next ten millennia the oceans climbed in fits and starts These rapid changes had little effect on those humans who experienced them partly because there were so few people on earth and also because those people were able to adjust readily to new coastlines Global sea levels stabilized about six thousand years ago except for local adjustments that caused often significant changes to places such as the Nile Delta The curve of inexorably rising seas flattened out as urban civilizations developed in Egypt Mesopotamia and South Asia The earth s population boomed quintupling from the time of Christ to the Industrial Revolution The threat from the oceans increased with our crowding along shores to live fish and trade Since 1860 the world has warmed significantly and the ocean s climb has accelerated The sea level changes are cumulative and gradual no one knows when they will end *The Attacking Ocean* from celebrated author Brian Fagan tells a tale of the rising complexity of the relationship between humans and the sea at their doorsteps a complexity created not by the oceans which have changed little What has changed is us and the number of us on earth

Managing Archaeological Resources Francis P McManamon, Andrew Stout, Jodi A Barnes, 2016-06-03 Original research articles show the range of activities issues and solutions undertaken by contemporary managers of heritage sites around the world **The Aesthetics of Ruins** Robert Ginsberg, 2021-08-04 This book constructs a theory of ruins that celebrates their vitality and unity in aesthetic experience Its argument draws upon over 100 illustrations prepared in 40 countries Ruins flourish as matter form function incongruity site and symbol Ruin underlies cultural values in cinema literature and philosophy Finally ruin guides meditations upon our mortality and endangered world Race Denise Eileen

McCoskey, 2021-03-25 How do different cultures think about race In the modern era racial distinctiveness has been assessed primarily in terms of a person's physical appearance But it was not always so As Denise McCoskey shows the ancient Greeks and Romans did not use skin colour as the basis for categorising ethnic disparity The colour of one's skin lies at the foundation of racial variability today because it was used during the heyday of European exploration and colonialism to construct a hierarchy of civilizations and then justify slavery and other forms of economic exploitation Assumptions about race thus have to take into account factors other than mere physiognomy This is particularly true in relation to the classical world In fifth century Athens racial theory during the Persian Wars produced the categories Greek and Barbarian and set them in brutal opposition to one another a process that could be as intense and destructive as black and white in our own age Ideas about race in antiquity were therefore completely distinct but as closely bound to political and historical contexts as those that came later This provocative book boldly explores the complex matrices of race and the differing interpretations of ancient and modern across epic tragedy and the novel Ranging from Theocritus to Toni Morrison and from Tacitus and Pliny to Bernal's seminal study *Black Athena* this is a powerful and original new assessment **Digging Deeper** Eric H.

Cline, 2020-11-03 A brief accessible primer explaining the basics of archaeology from How do you know where to dig to Do you get keep what you find *African Re-Genesis* Jay B Haviser, Kevin C MacDonald, 2016-07-01 Ripped from motherland and family ethnically mixed to quell the potential of uprisings and brutalized by regimes of hard labor the heart the spirit of Africa did not stop beating in the New World Rather it survived and has re-emerged changed by contacts with new cultures and environments but still part of the continuum of African tradition an African Re Genesis This is the first volume in its field to emphasize the interdisciplinary temporal and geographic comparative research of Archaeology Anthropology History and Linguistics to allow us to form unique perspectives on broader trends in the transformation and re-emergence of African Diaspora cultures African Re Genesis confirms that regardless of discipline from continental Africa to Europe the Western

Hemisphere and Indian Ocean all Diaspora research requires a relevance to modern communities and sensitivity to the interplay with contemporary cultural identities Matters concerning race and cultural diversity though ostensibly defused by the vocabulary of political correctness remain contentious Indeed the topic of racial relations has become to the twenty first century what sex was to the nineteenth century something best not discussed in public and better talked around than confronted directly African Re Genesis strikes at the nerve of urgency that the past present and future globalization of African cultures is a cornerstone of the entire human experience and it thus deserves recognition as such

afterword notes appendices and more than forty images to tell the fascinating story of the sculptures and their legacy from excavation to the present day *Anglo-Saxon England: Volume 32* Michael Lapidge, Malcolm Godden, Simon Keynes, 2004-07-05 Throughout the centuries of its existence Anglo Saxon society was highly if not widely literate it was a society the functioning of which depended very largely on the written word All the essays in this volume throw light on the literacy of Anglo Saxon England from the writs which were used as the instruments of government from the eleventh century onwards to the normative texts which regulated the lives of Benedictine monks and nuns to the runes stamped on an Anglo Saxon coin to the pseudorunes which deliver the coded message of a man to his lover in a well known Old English poem to the mysterious writing on an amulet which was apparently worn by a religious for a personal protection from the devil The usual comprehensive bibliography of the previous year's publications in all branches of Anglo Saxon studies rounds off the book
