McLane,2024-04-29 This new collection from the acclaimed poet and critic Maureen McLane works in an innovative register of essayistic writing conversable yet grounded in scholarship close readerly but far seeing McLane s encounters with poems and modellings of poetry illuminate her own poetics and suggest more generally all that poetics can encompass With characteristic brilliance McLane pursues a number of open questions How do poems shape our condition and conditioning as sentient creatures How do they generate modes for thinking How does rhyme help us measure out thought What is the relation of poetry to its surround to the environment and how do specific poems activate that relation What is the difference between a poetry of finding rather than of inspiration And how should we understand poetries invested in the notational and others committed to projects as many contemporary poets are as Wordsworth was in his Prelude As these questions suggest My Poetics does not offer a brief for or against a position on poetry Instead its artful arrangement of readings and divagations and even occasionally verse show us a way to be with poems and poetics     **Imagery and Related Mnemonic Processes** Mark A. McDaniel,Michael Pressley,2012-12-06 Scientific work on mnemonics and imagery conducted in the 1960s and early 1970s was directed at testing enthusiastic claims of the efficacy of memory techniques developed by the ancient Greeks and further refined in the popular literature by professional mnemonists The early research on imagery and mnemonics confirmed many of these claims and also illuminated the limitations of some techniques e g bizarre imagery As such these seminal studies clearly were valuable in providing a solid data base and perhaps as important making imagery and mnemonics acceptable research areas for experimental psychologists and educators After this initial surge of work however it seemed that subsequent contributions met with the attitude that mnemonic techniques and imagery help memory what else is new This attitude was not completely justified however given the theoretical insights from the work of such imagery and mnemonics pioneers as Gordon Bower Allan Paivio and William Rohwer In the 1980s this claim is completely unjustified Research on mnemonics and imagery has grown in exciting ways Researchers are tapping the area s theoretical potential both in terms of extending basic memory theories to account for the robust effects produced by mnemonic techniques and in terms of using explanations of mnemonic effects to understand basic memory processes Individual differences in the use of imagery and mnemonic encoding activities

are also being explored This research has provided valuable information for basic memory theories e g *The Oxford Handbook of Modern Irish Poetry* Fran Brearton, Alan Gillis, 2012-10-25 Forty chapters written by leading scholars across the world describe the latest thinking on modern Irish poetry The Handbook begins with a consideration of Yeats's early work and the legacy of the 19th century The broadly chronological areas which follow covering the period from the 1910s through to the 21st century allow scope for coverage of key poetic voices in Ireland in their historical and political context From the experimentalism of Beckett MacGreevy and others of the modernist generation to the refashioning of Yeats's Ireland on the part of poets such as MacNeice Kavanagh and Clarke mid century through to the controversially titled post 1969 Northern Renaissance of poetry this volume will provide extensive coverage of the key movements of the modern period The Handbook covers the work of among others Paul Durcan Thomas Kinsella Brendan Kennelly Seamus Heaney Paul Muldoon Michael Longley Medbh McGuckian and Ciaran Carson The thematic sections interspersed throughout chapters on women's poetry religion translation painting music stylistics allow for comparative studies of poets north and south across the century Central to the guiding spirit of this project is the Handbook's consideration of poetic forms and a number of essays explore the generic diversity of poetry in Ireland its various manipulations reinventions and sometimes repudiations of traditional forms The last essays in the book examine the work of a new generation of poets from Ireland concentrating on work published in the last two decades by Justin Quinn Leontia Flynn Sinead Morrissey David Wheatley Vona Groarke and others
