Fiction in the Quantum Universe Susan Strehle, 2000-11-09 In this outstanding book Susan Strehle argues that a new fiction has developed from the influence of modern physics. She calls this new fiction actualism, and within that framework she offers a critical analysis of major novels by Thomas Pynchon, Robert Coover, William Gaddis, John Barth, Margaret Atwood, and Donald Barthelme. According to Strehle, the actualists balance attention to questions of art with an engaged meditation on the external actual world. While these actualist novels diverge markedly from realistic practice, Strehle claims that they do so in order to reflect more acutely what we now understand as real. Reality is no longer realistic in the new physical or quantum universe; reality is discontinuous, energetic, relative, statistical, subjectively seen, and uncertainly known. All terms taken from new physics. Actualist fiction is characterized by incompleteness, indeterminacy, and open endings unsatisfying to the readerly wish for fulfilled promises and completed patterns. *Gravity's Rainbow*, for example, ends not with a period but with a dash. Strehle argues that such innovations in narrative reflect on twentieth-century history, politics, science, and discourse. *Novels of the Contemporary Extreme* Alain-Philippe Durand, Naomi Mandel, 2006-06-08 This book investigates a new form of fiction that is currently emerging in contemporary literature across the globe. Novels of the contemporary extreme from North and South America, from Europe and the Middle East, are set in a world both similar to and different from our own: a hyper-real, often apocalyptic world progressively invaded by popular culture permeated with technology and dominated by destruction. While their writing is commonly classified as hip or underground literature, authors of

contemporary extreme novels have often been the center of public controversy and scandal they and their work become international bestsellers This collection of essays identifies and describes this international phenomenon investigating the appeal of these novels styles and themes the reasons behind their success and the fierce debates they provoked
