Celebrity and the American Political Process Jennifer Brubaker, 2020-11-10 Integrated Marketing Communication Celebrity and the American Political Process uses an integrated marketing communication perspective to examine the brand of the celebrity as it is brought into the American political system primarily in the form of celebrity endorsements and branding as candidates causes and movements use celebrities as a strategy to reach voters Jennifer Brubaker posits that while the relationship between celebrities and political issues is hardly new it has evolved into a significant connection in the past it was a novelty to see a politically active celebrity today it's becoming an expectation related to fame Using integrated marketing communication and persuasion theory Brubaker argues that establishing candidates brand identity is a critical factor in determining whether they win or lose an election and celebrity politics relationships are a central tool in building a candidates brand identity Scholars of political science communication marketing and history will find this book particularly useful **Friends and Celebrities** Paul F. Longoria, 2022-09-02 Using a case study approach *Celebrities in American Elections* contends that celebrities have the talent, fame, and resources to succeed in electoral politics. These factors account for the electoral victories of Ronald Reagan, Clint Eastwood, Fred Grandy, Sonny Bono, Jesse Ventura, Arnold Schwarzenegger, Al Franken, and Donald Trump. However, the author argues that these items are insufficient without a favorable political environment, as many celebrities have lost elections as have won them. They lose because their persona does not match the politics of their time or they represent the minority party in a one-party dominated district or state or they advocate for unpopular policies. Among those that won, nearly half were elected by a plurality, not a majority, of voters. This does not suggest overwhelming public support for celebrity candidates despite their many advantages. With a few exceptions, celebrities that won tended to also win the fundraising battle, while celebrities that lost tended to raise less than their opponent. The normal laws of politics still apply. The celebrity factor, while helpful, does not fully explain why celebrities win or lose elections. Understanding media: The celebrity in the text The Open University, This 12-hour free course explored techniques that can be used to analyse media texts and see celebrity in a new light. *Celebrities of the Century* Lloyd Charles Sanders, 1887 **Celebrities of the century, ed. by**

L.C. Sanders *Celebrities*, 1887 *The Mirror Effect* Drew Pinsky, S. Mark Young, 2010-03-09 The face of entertainment has changed radically over the last decade and dangerously so. Stars like Britney, Paris, Lindsay, Amy Winehouse, and their media enablers have altered what we consider normal behavior. According to addiction specialist Dr. Drew Pinsky and business and entertainment expert Dr. S. Mark Young, a high proportion of celebrities suffer from traits associated with clinical narcissism: vanity, exhibitionism, entitlement, exploitativeness, and the rest of us, especially young people, are mirroring what we witness nightly on our TV and computer screens. A provocative eye-opening study, *The Mirror Effect*, sounds a timely warning, raising important questions about our changing culture and providing insights for parents, young people, and anyone who wonders what the cult of celebrity is really doing to America. Celebrity Capital Barrie Gunter, 2014-09-25 Celebrities attract the attention of commercial interests and other public figures. They receive payments from sponsors to endorse brands. They are sought out to appear with politicians during election campaigns. They are used to promote health messages. In other words, celebrities are often perceived to possess qualities that give them special value or what we will refer to here as celebrity capital. This means that celebrities are regarded as being able to add premium value to specific objects, events, and issues and hence render these items more valuable or effective. Employing an interesting and new approach to the growing scholarly interest in celebrity culture, Barrie Gunter uses the idea of value as expressed through the term capital. Capital usually refers to the monetary worth of something. Celebrity capital, however, can be measured in economic terms but also in social, political,

and psychological terms Research from around the world has been collated to provide an evidence based analysis of the value of celebrity in the 21st century and how it can be systematically assessed Including further reading for students key points and end of chapter discussion questions Gunter creates the first methodology to assess the value of fame
