Bogle,2008 A closer look into the new sexual culture on college campuses It happens every weekend In a haze of hormones and alcohol groups of male and female college students meet at a frat party a bar or hanging out in a dorm room and then hook up for an evening of sex first questions later As casually as the sexual encounter begins so it often ends with no strings attached after all it was just a hook up While a hook up might mean anything from kissing to oral sex to going all the way the lack of commitment is paramount Hooking Up is an intimate look at how and why college students get together what hooking up means to them and why it has replaced dating on college campuses In surprisingly frank interviews students reveal the circumstances that have led to the rise of the booty call and the death of dinner and a movie Whether it is an expression of postfeminist independence or a form of youthful rebellion hooking up has become the only game in town on many campuses In Hooking Up Kathleen A Bogle argues that college life itself promotes casual relationships among students on campus The book sheds light on everything from the differences in what young men and women want from a hook up to why freshmen girls are more likely to hook up than their upper class sisters and the effects this period has on the sexual and romantic relationships of both men and women after college Importantly she shows us that the standards for young men and women are not as different as they used to be as women talk about friends with benefits and one and done hook ups Breaking through many misconceptions about casual sex on college campuses Hooking Up is the first book to understand the new sexual culture on its own terms with vivid real life

Rosenbury, 2015 Family law has

long been intensely interested in certain adult intimate relationships namely marriage and marriage like relationships and silent about other adult intimate relationships namely friendship This Article examines the effects of that focus illustrating how it frustrates one of the goals embraced by most family law scholars over the past forty years the achievement of gender equality within the family and without Part I examines the current scope of family law doctrine and scholarship highlighting the ways that the home is still the organizing structure for family Despite calls for increased legal recognition of diverse families few scholars have considered whether family law should recognize care provided outside of the home and no scholar has considered whether family law should recognize the care provided and received by friends Part II turns to friendship

considering the practices of people who self identify as friends and the ways that such practices are already influenced by the law's maintenance of a divide between friendship and family That divide amounts to state support of the types of domestic caregiving that traditionally played vital roles in maintaining state supported patriarchy and that still largely follow gendered patterns today Family law thereby reinforces traditional gender role expectations rather than alleviating them Part III then explores how simultaneous legal recognition of friendship and family could lead to greater opportunities to structure life free from state supported gender role expectations By supporting more pluralistic personal relationships and conceptions of care family law could transform not just friendship and marriage but gender itself
