## **Froissart Historian:**

**Chronicles** Jean Froissart, 1378-1400 The Chronicles of Froissart 1378 1400 are one of the greatest contemporary records of fourteenth century England and France Depicting the great age of Anglo French rivalry from the deposition of Edward II to the downfall of Richard II Froissart powerfully portrays the deeds of knights in battle at Sluys Crecy Calais and Poitiers during the Hundred Years War Yet they are only part of this vigorous portrait of medieval life which also vividly describes the Peasants Revolt trading activities and diplomacy against a backdrop of degenerate nobility Written with the same sense of curiosity about character and customs that underlies the works of Froissart s contemporary Chaucer the Chronicles are a magnificent evocation of the age of chivalry *Froissart, Historian* John Joseph Norman Palmer, 1981

Short History of French Literature George Saintsbury, 1897 *A Cumulative Bibliography of Medieval Military History and Technology* Kelly DeVries, 2001-11-01 There is perhaps no other more lively area for study in medieval history than medieval military history with its attendant and complementary field the history of medieval military technology In the past twenty years it seems that more major scholarly inroads have been made in this field than in any other historical genre of medieval studies or chronological period of military history What this has meant is that it is now more difficult to keep up with all of

the trends and sources in the field than ever before Hence the need for a reference work which covers what has previously been written and which in turn can assist the scholar both the more experienced academic and the beginner to improve his or her work in medieval military history or the history of medieval military technology Utilizing library catalogues bibliographies and footnotes this bibliography has compiled the most complete list of secondary references to works in medieval military history and the history of military technology It keeps fairly strictly to a geography which centers on conventional medieval boundaries Europe Byzantium and the Middle East However the chronology does differ from the conventional medieval dates Because of its influence on the early Middle Ages references to Late Antiquity especially to the military history and technology of the third and fourth century Roman Empire have been included For the opposite reason the influence of the Middle Ages on the sixteenth and early seventeenth centuries references to military history and technology up to 1648 have been included as well This is especially important in the study of the Ottoman Turkish Wars and Arms and Armor where the end of the fifteenth century as a chronological terminus makes little sense
