International Relations in France Henrik Breitenbach, 2013-06-19 Why is the French International Relations IR discipline different from the transnational American discipline By analysing argument structures in research articles across time this book shows how the discipline in France is caught between the American character of the discipline and the French state as regulator of legitimate forms of expression Concretely French research arguments are less explicit about what their propositions are and what academic discussions they draw on and add to than their transnational American counterparts Based on a comparative case study of French and American IR research from 1950 to 2011 the book is a major contribution to the meta IR literature on global regional and national traditions of IR The challenge to the French discipline of whether and how to position itself in relation to the evolving American discipline is in many ways exemplary for other non American national IR disciplines and the choices as well as the structural conditions underlying the French case are relevant to all non Western disciplines The comparative analysis moreover reveals that the modern American discipline what is considered as recognisable social science takes shape only during the 1970s The book thus offers new knowledge about the discipline s international development as such Both case and methodology are interesting to larger audiences outside IR in the history and sociology of social science contrastive rhetoric as well as French and cultural studies

The Changing Geopolitics of Eastern Europe Dr A H Dawson, Rick Fawn, 2013-11-05 This work covers the uncertain geopolitical situation of some countries of Central and Eastern Europe including some of those which are hoping to enter the European Union in the near future some for which entry is far off and some which may never seek or be eligible for membership

Making Political Geography John Agnew, Luca Muscarà, 2012-02-16 Dating from its inception in the late nineteenth century political geography as a field has been heavily influenced by global events of the time Thus rather than trying to impose a single fashionable theory leading geographers John Agnew and Luca Muscar consider the underlying role of changing geopolitical context as their framework for understanding the evolution of the discipline The authors trace the development of key thinkers and theories during three distinct periods 1875 1945 the Cold War and the post Cold War emphasizing the ongoing struggle between theoretical monism and pluralism or one path to knowledge versus many The world has undergone dramatic shifts since the book s first publication in 2002 and this thoroughly revised and updated second edition focuses especially on reinterpretations of the

post Cold War period Agnew and Muscar explore the renewed questioning of international borders the emergence of the Middle East and displacement of Europe as the center of global geopolitics the rise of China and other new powers the reappearance of environmental issues and the development of critical geopolitics With its deeply knowledgeable and balanced history and overview of the field this concise work will be a valuable and flexible text for all courses in political geography

Partitions Stefano Bianchini, Sanjay Chaturvedi, Rada Ivekovic, Ranabir Samaddar, 2004-08-02 Studies of partitions have usually focused on individual cases These innovative volumes use comparative analysis to fill the gap in partition studies

European Approaches to International Relations Theory Jörg Friedrichs, 2004-03 Jorg Friedrich presents an important new introduction to the existence and relevance of European approaches to IR theory and sets an agenda for the progressive development of a Eurodiscipline of IR studies

The European Union and Global Social Change József Böröcz, 2009-09-10 This book provides an historical analysis of what the European Union is Examining the development of the EU in a global context the book draws on long term processes of change in historical depth to developing a deeper understanding of global social change

Illicit Flows and Criminal Things Willem van Schendel, Itty Abraham, 2005-11-04 Illicit Flows and Criminal Things offers a new perspective on illegal transnational linkages international relations and the transnational The contributors argue for a nuanced approach that recognizes the difference between organized crime and the thousands of illicit acts that take place across national borders every day They distinguish between the illegal prohibited by law and the illicit socially perceived as unacceptable which are historically changeable and contested Detailed case studies of arms smuggling illegal transnational migration the global diamond trade borderland practices and the transnational consumption of drugs take us to Asia Africa Latin America Europe and North America They allow us to understand how states borders and the language of law enforcement produce criminality and how people and goods which are labeled illegal move across regulatory spaces

Governing Societies: Political Perspectives On Domestic And International Rule Dean, Mitchell, 2007-06-01 What structures of power are involved in governing societies and how are they connected How is the liberal idea of governing through freedom linked to the increasing control of marginalised populations Have we reached the end of history in which governing largely concerns self governing individuals networks and communities Should we dispense with the container view of society and contemplate the death of the social Today many people in academia politics and business question the idea of being able to govern society The nation state and sovereign government are displaced by globalization and individualization

Mitchell Dean focuses on governing societies as a distinctive project that continues to define political life today The book offers a critical analysis of contemporary liberal approaches to governing societies both in domestic and international affairs Governing Societies provides an overview of current perspectives and theories and examines recent transformations in techniques and rationalities of rule It presents a new argument for the importance and transformation of sovereignty and powers of life and death and how they are integral to governing liberal democratic societies The book is key reading for undergraduate and postgraduate students of sociology and politics as well as researchers and academics

Cultural Political Economy Jacqueline Best, Matthew Paterson, 2010-01-21 This book examines the multitude of ways in which the political the cultural and the economic interconnect and intersect and provides case studies focusing on finance tourism contemporary business discourse the war on terror and migration

The Marshall Plan Today John Agnew, J. Nicholas Entrikin, 2004-06-24 This volume has as its focus the role of the Marshall Plan as both a force in the transformation of European Economic practices and a stimulus to political integration in Europe This organizing theme is framed in terms of two other issues that are central to contemporary debates in international political economy and geopolitical studies the origins and development of the Cold War and the growing globalisation of the world economy In relating the Marshall Plan to these issues this book goes beyond the typical diplomatic history approach to place the Plan in the context of both the political economy of late twentieth century Europe and the impact of American models of business and government that came with the Plan

Civil-Military Cooperation in Post-Conflict Operations Christopher Ankersen, 2007-10-04 Civil Military Cooperation CIMIC is the relationship between militaries and humanitarians Largely conducted in post conflict environments CIMIC has become a key characteristic of military operations in the twenty first century However the field is mostly understood through stereotype rather than clear comprehensive analysis The range and sc

How the Essay Film Thinks Laura Rascaroli, 2017-05-05 This book offers a novel understanding of the epistemological strategies that are mobilized by the essay film and of where and how such strategies operate Against the backdrop of Adorno s discussion of the essay form s anachronistic anti systematic and disjunctive mode of resistance and capitalizing on the centrality of the interstice in Deleuze s understanding of the cinema as image of thought the book discusses the essay film as future philosophy as a contrarian political cinema whose argumentation engages with us in a space beyond the verbal A diverse range of case studies discloses how the essay film can be a medium of thought on the basis of its dialectic use of audiovisual interstitiality The book shows how the essay film s disjunctive method comes to be realized at the level of medium montage genre temporality sound narration and framing all of these emerging as interstitial spaces of intelligence that illustrate how essayistic meaning can be sustained often in contexts of political historical or cultural extremity The essayistic urge is not to be identified with a fixed generic form but is rather situated within processes of filmic thinking that thrive in gaps

The SAGE Handbook of Human Geography, 2v Roger Lee, Noel Castree, Rob Kitchin, Vicky Lawson, Anssi Paasi, Chris Philo, Sarah Radcliffe, Susan M.

Roberts, Charles Withers, 2014-05-22 Superb How refreshing to see a Handbook that eschews convention and explores the richness and diversity of the geographical imagination in such stimulating and challenging ways Peter Dicken University of Manchester Stands out as an innovative and exciting contribution that exceeds the genre Sallie A Marston University of Arizona Captures wonderfully the richness and complexity of the worlds that human beings inhabit This is a stand out among handbooks Lily Kong National University of Singapore This wonderfully unconventional book demonstrates human geography's character and significance not by marching through traditional themes but by presenting a set of geographical essays on basic ideas practices and concerns Alexander B Murphy University of Oregon This SAGE Handbook stands out for its capacity to provoke the reader to think anew about human geography essays that offer some profoundly original insights into what it means to engage geographically with the world Eric Sheppard UCLA Published in association with the journal Progress in Human Geography edited and written by the principal scholars in the discipline this Handbook demonstrates the difference that thinking about the world geographically makes Each section considers how human geography shapes the world interrogates it and intervenes in it It includes a major retrospective and prospective introductory essay with three substantive sections on Imagining Human Geographies Practising Human Geographies Living Human Geographies The Handbook also has an innovative multimedia component of conversations about key issues in human geography as well as an overview of human geography from the Editors A key reference for any scholar interested in questions about what difference it makes to think spatially or geographically about the world this Handbook is a rich and textured statement about the geographical imagination , *The Philosophy of Geography* Timothy Tambassi, Marcello Tanca, 2021-08-23 The relationship between geography and philosophy is still largely in need of being explored Geographers and philosophers share the responsibility for that On the one hand geographers have considered as a dangerous deviation any attempt to elaborate an image of the Earth which was not a mere replica of a cartographic representation On the other hand philosophers have generally been uninterested in a discipline offering little chance for critical reflection In light of these considerations the purpose of this book is to identify some fundamental philosophical issues involved in the reflection of geography by adopting a perspective which looks at the discipline with a specific focus on its fundamental concepts and distinctions **Space, Knowledge and Power** Stuart Elden, 2016-04-01 Michel Foucault's work is rich with implications and insights concerning spatiality and has inspired many geographers and social scientists to develop these ideas in their own research This book the first to engage Foucault's geographies in detail from a wide range of perspectives is framed around his discussions with the French geography journal *Hérodote* in the mid 1970s The opening third of the book comprises some of Foucault's previously untranslated work on questions of space a range of responses from French and English language commentators and a newly translated essay by Claude Raffestin a leading Swiss geographer The rest of the book presents specially commissioned essays which examine the remarkable reception of Foucault's work in English and French language geography situate Foucault's

project historically and provide a series of developments of his work in the contemporary contexts of power biopolitics governmentality and war Contributors include a number of key figures in social spatial theory such as David Harvey Chris Philo Sara Mills Nigel Thrift John Agnew Thomas Flynn and Matthew Hannah Written in an open and engaging tone the contributors discuss just what they find valuable and frustrating about Foucault's geographies This is a book which will both surprise and challenge

A Subjective Approach to International Relations Bertrand Badie, 2025-02-05 China's growing power and Russia's invasion of Ukraine have thrust geopolitics back to the centre of the global stage but the old geopolitical frameworks with their positivist methods and their emphasis on structural determinants will not enable us to understand the increasingly dangerous world in which we are living today Bertrand Badie argues that states and the many other actors now operating in the international arena are products of their cultural contexts and political traditions Their perspectives and motivations are shaped by the narratives memories and emotions that constitute people's everyday realities they are therefore profoundly subjective in character and cannot be reduced to the categories of behaviour posited by traditional geopolitical frameworks like realist IR theory In Badie's view international disputes in the twenty first century are better understood through the concept of the battle for meaning confrontations between different modes of understanding the world His judgement is that peace and stability depend on greater sensitivity to the worldview and international perspective of other actors in the international arena A willingness to try to see the world from the subjective perspective of one's friends rivals and even one's enemies is vital This timely and engaging book by one of the world's leading scholars of international relations will be of great interest to students and scholars in politics and IR and to anyone concerned about the growing tensions in the world today
