Lehmann,Joachim Mugdan,2000 This series of HANDBOOKS OF LINGUISTICS AND COMMUNICATION SCIENCE is  
designed to illuminate a field which not only includes general linguistics and the study of linguistics as applied to specific  
languages but also covers those more recent areas which have developed from the increasing body of research into the  
manifold forms of communicative action and interaction For classic linguistics there appears to be a need for a review of the  
state of the art which will provide a reference base for the rapid advances in research undertaken from a variety of  
theoretical standpoints while in the more recent branches of communication science the handbooks will give researchers  
both an verview and orientation To attain these objectives the series will aim for a standard comparable to that of the leading  
handbooks in other disciplines and to this end will strive for comprehensiveness theoretical explicitness reliable  
documentation of data and findings and up to date methodology The editors both of the series and of the individual volumes  
and the individual contributors are committed to this aim The languages of publication are English German and French The  
main aim of the series is to provide an appropriate account of the state of the art in the various areas of linguistics and  
communication science covered by each of the various handbooks however no inflexible pre set limits will be imposed on the  
scope of each volume The series is open ended and can thus take account of further developments in the field This  
conception coupled with the necessity of allowing adequate time for each volume to be prepared with the necessary care  
means that there is no set time table for the publication of the whole series Each volume will be a self contained work  
complete in itself The order in which the handbooks are published does not imply any rank ordering but is determined by the  
way in which the series is organized the editor of the whole series enlist a competent editor for each individual volume Once  
the principal editor for a volume has been found he or she then has a completely free hand in the choice of co editors and  
contributors The editors plan each volume independently of the others being governed only by general formal principles The  
series editor only intervene where questions of delineation between individual volumes are concerned It is felt that this  
modus operandi is best suited to achieving the objectives of the series namely to give a competent account of the present  
state of knowledge and of the perception of the problems in the area covered by each volume      *The Works of Mr. Henry*
