## **From Here To Sustainability Politics In The Real World:**

From Here to Sustainability Ian Christie, 2010-09-23 For a large proportion of the electorate national politics misses the real issues. As a result membership of campaigning organizations has soared whilst party numbers have declined. This work distils the principles and priorities of many of the leading voluntary groups into a strong and coherent programme of political aims and actions. The problem can be measured as a sustainability gap between official policies and achievements and actual democratic participation, environmental restoration and the eradication of poverty. With examples and short case studies the book translates the gap into practical and realistic recommendations for progress. The Politics of Childhoods Real and Imagined Priscilla Alderson, 2015-11-23

The second volume of Priscilla Alderson's popular and renowned book *Childhoods Real and Imagined* relates dialectical critical realism to childhood. By demonstrating their relevance and value to each other Alderson presents a practical introductory guide for applying critical realism to research about children and young people. Each chapter summarises key themes from several academic disciplines and policy areas ranging from climate change and social justice between generations to neoliberalism, social reform and imagining utopias. Children's and adults' views and experiences are reviewed and whereas the first volume deals with more personal and local aspects of childhood this volume widens the scope into debates about global politics which so seldom mention children. Each chapter demonstrates how children and young people are an integral part of the whole of society and are often especially affected by policies and events. This book is written for everyone who is researching, studying or teaching about childhood or who cares for and works with children and young people as well as those interested in critical realist approaches. **Politics and the Environment** James Connelly, School of Human Sciences and Communication James Connelly, Dr Graham Smith, David Benson, Clare Saunders, 2003-09-02

Drawing on the latest research in futures studies this book provides new insights into ways of helping both students and teachers think more critically and creatively about their own future and that of wider society. It acknowledges the crucial role of education in helping young people understand the nature of local and global change and the social and environmental impacts such change will have on their future. Setting out a clear educational rationale for promoting global and futures perspective in education it provides helpful and stimulating examples of futures orientated classroom activities. It also includes fascinating research into children's views of the future. **Governing Sustainable Cities** Bob Evans, Marko Joas, Susan Sundback, Kate Theobald, 2013-06-17
