From Media To Metaphor:

From Media to Metaphor Robert Atkins, Independent Curators Incorporated, 1991 *Metaphor and Gender in Business Media Discourse* V. Koller, 2004-05-25 This new study reconciles cognitive metaphor theory with Critical Discourse Analysis to offer a fresh approach to the study of metaphor In applying this framework to a substantial corpus of texts from business magazines the author shows how metaphors of war sports and evolutionary struggle are used to construct business as a masculinized social domain In view of the subtle but pervasive socio cognitive impact of these metaphors the study raises the question of possible alternatives and the scope for change in business media discourse **Digital Media Metaphors** Johan Farkas, Marcus Maloney, 2024-11-11 Bringing together leading scholars from media studies and digital sociology this edited volume provides a comprehensive introduction to digital media metaphors unpacking their power and limitations Digital technologies have reshaped our way of life To grasp their dynamics and implications people often rely on metaphors to provide a shared frame of reference Scholars journalists tech companies and policymakers alike speak of digital clouds bubbles frontiers platforms trolls and rabbit holes Some of these metaphors distort the workings of the digital realm and neglect key consequences This collection structured in three parts explores metaphors across digital infrastructures content and users Within these parts each chapter examines a specific metaphor that has become near ubiquitous in public debate Doing so the book engages not only with the technological but also the social political and environmental implications of digital technologies and relations This unique collection will interest students and scholars of digital media and the broader fields of media and communication studies sociology and science and technology studies [Digital Media and the Dynamics of Civil Society](#) Maria Bakardjieva, Stina Bengtsson, Göran Bolin, Kjell Engelbrekt, 2021-10-18 This book advances the theoretical normative and practical understanding of civil society under the conditions of digital mediatization and in relation to a set of particular historical and geopolitical circumstances **Learning From Media 2nd Ed.** Richard E. Clark, 2012-06-01 Richard Clark s observation that media are mere vehicles that deliver instruction but do not influence student achievement any more than the truck that delivers our groceries causes changes in our nutrition is as misunderstood today as it was when first published in the Review of Educational Research in 1983 The convincing if little read scientific evidence presented by Clark has divided the field and caused considerable concern especially among the providers of newer media for learning A collection of writings about the media effects debate as it has come to be called was published in 2001 Edited by Clark Learning From Media was the first volume in the series Perspectives in Instructional Technology and Distance Education The series editors are convinced that the writings of Clark and those who take issue with his position are of critical importance to the field of instructional technology Thus a revised second edition of Learning From Media is now being offered The debate about the impact of media on learning remains a fundamental issue as new mediated approaches to teaching and learning are developed and Clark s work should be at the center of the discussion The critical articles on both

sides of this debate are contained in Learning From Media 2nd Edition

Metaphor Studies: Theories, Methods, Approaches, and Future Perspectives Ilaria Rizzato, Valentina Cuccio, Aletta Gesina Dorst, 2024-12-12 Metaphor has been studied as a linguistic conceptual and communicative phenomenon in a wide range of disciplines including linguistics literary studies philosophy education political science media studies communication science psychology and neurosciences While the Cognitive Theory of Metaphor has dominated the field since the cognitive turn in the 1980s alternatives have been proposed including the Neural Theory of Metaphor the Relevance Theory Approach the Complex Systems Approach and the Dynamic Systems Approach Though studies are still often text based there is a growing body of research on visual metaphor multimodal metaphor and gestural metaphor as well as experimental research ranging from studies on metaphor processing and comprehension to studies in NLP and machine learning Metaphor Studies is thus a highly interdisciplinary field that

encompasses a myriad of theories approaches and methods In current metaphor research each of these strands is facing new challenges and offering new venues of cutting edge research using state of the art technologies Researchers tend to focus on their own research areas and provide in depth views within the scope of their own disciplines Metaphor Studies do not seem to escape this phenomenon in spite of the large number of disciplines they draw on ranging from linguistics to psychology to the theory of science Hence there seem to be little cooperation and communication across different fields methods and approaches having metaphors and figurative language as their main object of investigation This Research Topic aims to promote cross fertilization among the many research areas involved in Metaphor Studies thus bringing together different methods and perspectives and offering a comprehensive overview of the possible research scenarios **Exploring**

At War with Metaphor Erin Steuter, Deborah Wills, 2009-07-15 When photographs documenting the torture and humiliation of prisoners at Abu Ghraib came to the attention of a horrified public national and international voices were raised in shock asking how this happened At War with Metaphor offers an answer arguing that the abuses of Abu Ghraib were part of a systemic continuum of dehumanization This continuum has its roots in our public discussions of the war on terror and the metaphors through which they are repeatedly framed Arguing earnestly and incisively that these metaphors if left unexamined bind us into a cycle of violence that will only be intensified by a responsive violence of metaphor Steuter and Wills examine compelling examples of the images of animal insect and disease that inform shape and limit our understanding of the war on terror Tying these images to historical and contemporary uses of propaganda through a readable accessible analysis of media filters At War with Metaphor vividly explores how news media including political cartoons and talk radio are enmeshed in these damaging dehumanizing metaphors Analyzing media through the lenses of race and Orientalism it invites us to hold our media and ourselves accountable for the choices we make in talking war and making enemies
