From A Biological Point Of View Essays In Evolutionary Philosophy:

From a Biological Point of View Elliott Sober, 1994-11-25 This new collection of essays will appeal to a readership that extends well beyond the frontiers of the philosophy of science Sober shows how ideas in evolutionary biology bear in significant ways on traditional problems in philosophy of mind and language epistemology and metaphysics Among the topics addressed are psychological egoism solipsism and the interpretation of belief and utterance empiricism Ockham's razor causality essentialism and scientific laws

Evidence and Evolution Elliott Sober, 2008-03-27 How should the concept of evidence be understood And how does the concept of evidence apply to the controversy about creationism as well as to work in evolutionary biology about natural selection and common ancestry In this rich and wide ranging book Elliott Sober investigates general questions about probability and evidence and shows how the answers he develops to those questions apply to the specifics of evolutionary biology Drawing on a set of fascinating examples he analyzes whether claims about intelligent design are untestable whether they are discredited by the fact that many adaptations are imperfect how evidence bears on whether present species trace back to common ancestors how hypotheses about natural selection can be tested and many other issues His book will interest all readers who want to understand philosophical questions about evidence and evolution as they arise both in Darwin's work and in contemporary biological research

Alasdair MacIntyre's Views and Biological Ethics Sherel Jeevan Joseph Mendonsa, 2022-11-29 Some of the most fundamental questions which moral philosophers have been grappling with include What makes us moral beings Is morality a product of culture or nature or both Are ethical norms and principles universal and unchanging or are they relative being rooted in specific socio political and historical contexts Can ethical conclusions be derived from descriptive statements This book addresses these and similar questions through a comparative study between Alasdair MacIntyre's views and biological ethics It discusses how both MacIntyre's views and biological ethics highlight the importance of human biology for human morality Based on this discussion the book proposes that both the rational and the biological including the emotional dimensions of humans have to be considered in order to understand the complex and multi layered phenomenon of human morality As such it will prove to be a valuable resource for undergraduate and postgraduate students of moral philosophy especially those interested in studying the biological approach toward ethics Thomistic Aristotelian ethics and metaethics

The Biology and Psychology of Moral Agency William Andrew Rottschaefer, 1998 Brings findings and theories in biology and psychology to bear on ethics

A Realist Metaphysics of Race Jeremy Pierce, 2014-12-11 In *A Realist Metaphysics of Race* A Context Sensitive Short Term Retentionist Long Term Revisionist Approach Jeremy Pierce defends a social kind view of racial categories On this view the biological features we use to classify people racially do not make races natural kinds Rather races exist because of contingent social practices single out certain groups of people as races give them social importance and allow us to name them as races Pierce also identifies several kinds of context sensitivity as central to how racial categorization works and

argues that we need racial categories to identify problems in how our racial constructions are formed including the harmful effects of racial constructions Hence rather than seeking to eliminate such categories Pierce argues that we should also make efforts to change the conditions that generate their problematic elements with an eye toward retaining only the unproblematic aspects A Realist Metaphysics of Race contains insights relevant not just to professional philosophers in metaphysics philosophy of race social philosophy philosophy of language and philosophy of science but also to students and scholars working in sociology biology anthropology ethnic studies and political science **Handbook of**

Paleoanthropology Winfried Henke,Ian Tattersall,2007-05-10 This 3 volume handbook brings together contributions by the world s leading specialists that reflect the broad spectrum of modern palaeoanthropology thus presenting an indispensable resource for professionals and students alike Vol 1 reviews principles methods and approaches recounting recent advances and state of the art knowledge in phylogenetic analysis palaeoecology and evolutionary theory and philosophy Vol 2 examines primate origins evolution behaviour and adaptive variety emphasizing integration of fossil data with contemporary knowledge of the behaviour and ecology of living primates in natural environments Vol 3 deals with fossil and molecular evidence for the evolution of Homo sapiens and its fossil relatives

The Philosophy of Biology Kostas Kampourakis,2013-06-18 This book brings together for the first time philosophers of biology to write about some of the most central concepts and issues in their field from the perspective of biology education The chapters of the book cover a variety of topics ranging from traditional ones such as biological explanation biology and religion or biology and ethics to contemporary ones such as genomics systems biology or evolutionary developmental biology Each of the 30 chapters covers the respective philosophical literature in detail and makes specific suggestions for biology education The aim of this book is to inform biology educators undergraduate and graduate students in biology and related fields students in teacher training programs and curriculum developers about the current state of discussion on the major topics in the philosophy of biology and its implications for teaching biology In addition the book can be valuable to philosophers of biology as an introductory text in undergraduate and graduate courses

From Truth to Reality Heather Dyke,2009-06-02 Questions about truth and questions about reality are intimately connected One can ask whether numbers exist by asking Are there numbers But one can also ask what arguably amounts to the same question by asking Is the sentence There are numbers true Such semantic ascent implies that reality can be investigated by investigating our true sentences This line of thought was dominant in twentieth century philosophy but is now beginning to be called into question In *From Truth to Reality* Heather Dyke brings together some of the foremost metaphysicians to examine approaches to truth reality and the connections between the two This collection features new and previously unpublished material by JC Beall Mark Colyvan Michael Devitt John Heil Frank Jackson Fred Kroon D H Mellor Luca Moretti Alan Musgrave Robert Nola J J C Smart Paul Snowdon and Daniel Stoljar *Modeling Rationality, Morality, and Evolution* Peter Danielson,1998-10-29 This collection focuses on questions that arise when morality is considered from

the perspective of recent work on rational choice and evolution Linking questions like Is it rational to be moral to the evolution of cooperation in The Prisoners Dilemma the book brings together new work using models from game theory evolutionary biology and cognitive science as well as from philosophical analysis Among the contributors are leading figures in these fields including David Gauthier Paul M Churchland Brian Skyrms Ronald de Sousa and Elliot Sober **Unto Others** Elliott Sober, David Sloan Wilson, 1999-10-01 The authors demonstrate that unselfish behavior is in fact an important feature of both biological and human nature Their book provides a panoramic view of altruism throughout the animal kingdom from self sacrificing parasites to the human capacity for selflessness even as it explains the evolutionary sense of such behavior

Relational Agency and Environmental Ethics Suvielise Nurmi, 2023-04-11 Why does ethics only weakly contribute to the most crucial problems of the current world Relational Agency and Environmental Ethics A Journey Beyond Humanism as We Know It explores how the concept of moral agency embedded in modern humanist ethics in its reliance on environmentally harmful and scientifically implausible presuppositions prevents ethics from efficiently supporting a sustainability transition The modernist individualist notion of agency includes conceptual dichotomies between moral agency and human nature mind and body reason and emotion and knowledge and will yet it should be revised without dismissing responsibility normativity and a shared ground for critical assessment Suvielise Nurmi proposes an agential shift resting on a relational concept of agency combining ecofeminist and evolutionary criticisms of modernism together with various interdisciplinary discussions involving philosophy of mind cognitive science anthropology social ontology and developmental biology and psychology This book argues that the relational shift can resolve the dilemma and bring environmental relationships to the core of ethical discourse there is no ethics distinct from environmental ethics Environmental responsibilities can be justified as responsibilities for one's relationally considered agency *Resistance to Evidence* Mona Simion, 2024-02-15 We have increasingly sophisticated ways of acquiring and communicating knowledge but efforts to spread this knowledge often encounter resistance to evidence The phenomenon of resistance to evidence while subject to thorough investigation in social psychology is acutely under theorised in the philosophical literature Mona Simion's book is concerned with positive epistemology it argues that we have epistemic obligations to update and form beliefs on available and undefeated evidence In turn our resistance to easily available evidence is unpacked as an instance of epistemic malfunctioning Simion develops a full positive integrated epistemological picture in conjunction with novel accounts of evidence defeat norms of inquiry permissible suspension and disinformation Her book is relevant for anyone with an interest in the nature of evidence and justified belief and in the best ways to avoid the high stakes practical consequences of evidence resistance in policy and practice This title is also available as Open Access on Cambridge Core *The Bloomsbury Encyclopedia of Philosophers in America* John R. Shook, 2016-02-11 For scholars working on almost any aspect of American thought The Bloomsbury Encyclopedia to Philosophers in America presents an indispensable reference work Selecting over

700 figures from the Dictionary of Early American Philosophers and the Dictionary of Modern American Philosophers this condensed edition includes key contributors to philosophical thought From 1600 to the present day entries cover psychology pedagogy sociology anthropology education theology and political science before these disciplines came to be considered distinct from philosophy Clear and accessible each entry contains a short biography of the writer an exposition and analysis of his or her doctrines and ideas a bibliography of writings and suggestions for further reading Featuring a new preface by the editor and a comprehensive introduction The Bloomsbury Encyclopedia to Philosophers in America includes 30 new entries on twenty first century thinkers including Martha Nussbaum and Patricia Churchland With in depth overviews of Waldo Emerson Margaret Fuller Noah Porter Frederick Rauch Benjamin Franklin Thomas Paine and Thomas Jefferson this is an invaluable one stop research volume to understanding leading figures in American thought and the development of American intellectual history

Ghosts R. C. Finucane,1996-06 Throughout history people have reported seeing ghosts But a Victorian ghost is in many respects a very different phenomenon from a ghost in Classical Greece or in medieval Europe Finucane surveys reports of ghosts from ancient Greece the early Christian era the Reformation the Victorian age and through the twentieth century He asks such questions as How have the physical aspects claimed for ghosts varied from age to age What differences are there in the functions and intentions ascribed to ghosts How have the changes in more general beliefs in religion and science in particular influenced the perception of ghosts Drawing on primary sources from all periods and cultures Finucane addresses this topic in its full breadth R C Finucane Rochester MI is chairperson of the Department of History at Oakland University highly recommended Magonia UK a useful book for those readers interested in the history of the supernatural Extrapolation

The Ghost in the Universe Taner Edis,2009-12-02 Emphasizing the results of natural science physicist Taner Edis takes a fresh look at an age old question Is there a God or a spiritual reality beyond nature

Journal of Biblical and Theological Studies, Issue 2.2 Daniel S. Diffey,Ryan A. Brandt,Justin McLendon,2017-11-03 The Journal of Biblical and Theological Studies JBTS is an academic journal focused on the fields of Bible and Theology from an inter denominational point of view The journal is comprised of an editorial board of scholars that represent several academic institutions throughout the world JBTS is concerned with presenting high level original scholarship in an approachable way Academic journals are often written by scholars for other scholars They are technical in nature assuming a robust knowledge of the field There are fewer journals that seek to introduce biblical and theological scholarship that is also accessible to students JBTS seeks to provide high level scholarship and research to both scholars and students which results in original scholarship that is readable and accessible As an inter denominational journal JBTS is broadly evangelical We accept contributions in all theological disciplines from any evangelical perspective In particular we encourage articles and book reviews within the fields of Old Testament New Testament Biblical Theology Church History Systematic Theology Practical Theology Philosophical Theology Philosophy and Ethics

Why Think? Ronald de Sousa,2007-06-25 In this short and

accessible book Ronald de Sousa shows us that in order to understand what is truly important about our reasoning capacity we need to change our thinking about what rationality actually is *Readings in Health Care Ethics - Second Edition*

Elisabeth (Boetzkes) Gedge, Wilfrid J. Waluchow, 2012-03-14 *Readings in Health Care Ethics* provides a wide ranging selection of important and engaging contributions to the field of health care ethics The second edition adds a chapter on health care in Canada and the introduction has been expanded to include discussion of a new direction in feminist naturalized ethics The book presupposes no prior knowledge only an interest in the bioethical issues that are shaping our world **Humanity's Footprint** Walter K Dodds, 2008-02-06 For the first time in history humans have exceeded the

sustaining capacity of Earth's global ecosystems Our expanding footprint has tremendous momentum and the insidious explosion of human impact creates a shockwave that threatens ecosystems worldwide for decades possibly centuries Walter K Dodds depicts in clear nontechnical terms the root causes and global environmental effects of human behavior He describes trends in population growth resource use and global environmental impacts of the past two centuries such as greenhouse effects ozone depletion water pollution and species extinctions and introductions Dodds also addresses less familiar developments such as the spread of antibiotic resistant genes in bacteria and the concentration of pesticides in the Arctic and other remote ecosystems He identifies fundamental human activities that have irreversible effects on the environment and draws on recent social science and game theory results to explain why people use more than their share Past behavior indicates that as resources grow scarce humans will escalate their use of what remains instead of managing their consumption Humanity's Footprint paints a lively but ultimately sobering picture of our environmental predicament Dodds calls for a consilient approach to socioenvironmental restoration that draws on new thinking from across disciplines to develop sustainable solutions to global environmental problems *The Journal of Philosophy*, 1921 Covers topics in philosophy psychology and scientific methods Vols 31 include A Bibliography of philosophy 1933
