From Ancient Cham To Modern Dialects:

From Ancient Cham to Modern Dialects Graham Thurgood, 1999-01-01 Based on a reconstruction of ancient Chamic with care taken to identify inherited Austronesian words as well as loan words and their sources this text points out what the linguistic evidence tells us about the history of the region and sketches the major consequences of historical contact on linguistic change in the history of Chamic

The Oxford Handbook of Historical Phonology Patrick Honeybone, Joseph Salmons, 2015-11-26 This book presents a comprehensive and critical overview of historical phonology as it stands today. Scholars from around the world consider and advance research in every aspect of the field. In doing so they demonstrate the continuing vitality and some continuing themes of one of the oldest sub disciplines of linguistics. The book is divided into six parts. The first considers key current research questions the early history of the field and the structuralist context for work on segmental change. The second examines evidence and methods including phonological reconstruction typology and computational and quantitative approaches. Part III looks at types of phonological change including stress tone and morphophonological change. Part IV explores a series of controversial aspects within the field including the effects of first language acquisition the status of lexical diffusion and exceptionless change and the role of individuals in innovation. Part V considers theoretical perspectives on phonological change including those of evolutionary phonology and generative historical phonology. The final part examines sociolinguistic and exogenous factors in phonological change including the study of change in real time the role of second language acquisition and loanword adaptation. The authors who represent leading proponents of every theoretical perspective consider phonological change over a wide range of the world's language families. The handbook is in sum a valuable resource for phonologists and historical linguists and a stimulating guide for their students.

Lost Kingdoms: Hindu-Buddhist Sculpture of Early Southeast Asia Guy, John, 2014-04-07 A fresh and exciting exploration of Southeast Asian history from the 5th to 9th century seen through the lens of the region's sculpture.

Deconstructing Creole Umberto Ansaldi, Stephen Matthews, Lisa Lim, 2007-06-22 Deconstructing Creole is a collection of studies aimed at critically assessing the idea of creole languages as a homogeneous structural type with shared and peculiar patterns of genesis. Following up on the critical discussion of notions of creole exceptionalism as historical and ideological constructs this volume tests the basic assumptions that underlie current attempts to present creole structure as a special type from typological as well as sociohistorical perspectives. The sum of the findings presented here suggests that careful empirical investigation of input varieties and contact environments can explain the structural output without recourse to an exceptional genesis scenario. Echoing calls to dissolve the notion of creolization as a special diachronic process this volume proposes that theoretically grounded approaches to the notions of simplicity complexity transmission etc do not warrant considering so called creole languages as a special synchronic type.

The Oxford Handbook of Language Contact Anthony P. Grant, 2020-01-10 Every language has been influenced in some way by other languages. In many cases

this influence is reflected in words which have been absorbed from other languages as the names for newer items or ideas such as perestroika manga or intifada from Russian Japanese and Arabic respectively In other cases the influence of other languages goes deeper and includes the addition of new sounds grammatical forms and idioms to the pre existing language For example English s structure has been shaped in such a way by the effects of Norse French Latin and Celtic though English is not alone in its openness to these influences Any features can potentially be transferred from one language to another if the sociolinguistic and structural circumstances allow for it Further new languages pidgins creoles and mixed languages can come into being as the result of language contact In thirty three chapters The Oxford Handbook of Language Contact examines the various forms of contact induced linguistic change and the levels of language which have provided instances of these influences In addition it provides accounts of how language contact has affected some twenty languages spoken and signed from all parts of the world Chapters are written by experts and native speakers from years of research and fieldwork Ultimately this Handbook provides an authoritative account of the possibilities and products of contact induced linguistic change

Languages of Mainland Southeast Asia N.J. Enfield, Bernard Comrie, 2015-03-30 The studies in this book represent the rich diverse and substantial research being conducted today in the linguistics of Mainland Southeast Asia The chapters cover a broad scope Several studies address questions of language relatedness often challenging conventional assumptions about the status of language contact as an explanatory factor in accounting for linguistic similarities Several address the question of Mainland Southeast Asia as a linguistic area exploring new ways to imagine and define the boundaries and indeed the boundedness of a Mainland Southeast Asia area Two contributions rethink the received notion of the sesquisyllable with new empirical and theoretical angles And a set of chapters explores topics in the morphology and syntax of the region s languages sometimes challenging orthodox assumptions and claims about what a typical language of Mainland Southeast Asia is like Written by leading researchers in the field and with a substantial overview of current knowledge and new directions by the volume editors N J Enfield and Bernard Comrie this book will serve as an authoritative source on where the linguistics of Mainland Southeast Asia is at and where it is heading History Without Borders

Geoffrey C. Gunn, 2011-08-01 Astride the historical maritime silk routes linking India to China premodern East and Southeast Asia can be viewed as a global region in the making over a long period Intense Asian commerce in spices silks and ceramics placed the region in the forefront of global economic history prior to the age of imperialism Alongside the correlated silver trade among Japanese Europeans Muslims and others China s age old tributary trade networks provided the essential stability and continuity enabling a brilliant age of commerce Though national perspectives stubbornly dominate the writing of Asian history even powerful state centric narratives have to be re examined with respect to shifting identities and contested boundaries This book situates itself in a new genre of writing on borderland zones between nations especially prior to the emergence of the modern nation state It highlights the role of civilization that developed along with global trade in rare and

everyday Asian commodities raising a range of questions regarding unequal development intraregional knowledge advances the origins of globalization and the emergence of new Asian hybridities beyond and within the conventional boundaries of the nation state Chapters range over the intra Asian trade in silver and ceramics the Chinese junk trade the rise of European trading companies as well as diasporic communities including the historic Japan towns of Southeast Asia and many types of technology exchanges While some readers will be drawn to thematic elements this book can be read as the narrative history of the making of a coherent East Southeast Asian world long before the modern period *First Islanders* Peter Bellwood,2017-03-16 Incorporating research findings over the last twenty years *First Islanders* examines the human prehistory of Island Southeast Asia This fascinating story is explored from a broad swathe of multidisciplinary perspectives and pays close attention to migration in the period dating from 1.5 million years ago to the development of Indic kingdoms late in the first millennium CE *Early Civilizations of Southeast Asia* Dougald J. W. O'Reilly,2007 Using the archaeological record O'Reilly traces the rise of the state in Southeast Asia in a general synthesis *Southeast Asia* Peter Bellwood,Dr Ian Glover,2023-05-09 This comprehensive and absorbing book traces the cultural history of Southeast Asia from prehistoric especially Neolithic Bronze Iron age times through to the major Hindu and Buddhist civilizations to around AD 1300 Southeast Asia has recently attracted archaeological attention as the locus for the first recorded sea crossings as the region of origin for the Austronesian population dispersal across the Pacific from Neolithic times as an arena for the development of archaeologically rich Neolithic and metal using communities especially in Thailand and Vietnam and as the backdrop for several unique and strikingly monumental Indic civilizations such as the Khmer civilization centred around Angkor Southeast Asia is invaluable to anyone interested in the full history of the region *Lost Tongues of the Red River* John D. Phan,2025-03-04 Among the world's languages Vietnamese provides unique insight into the cosmopolitan dynamism of premodern Asia Modern notions of language history are often constrained by nationalist narratives focused on bolstering a particular nation's social cultural or political identities A closer look at the Vietnamese language reveals a rich record of interaction and transformation that does not fit easily within modern nation state lines or boundaries By employing philological textual and comparative linguistic methodologies John D. Phan uncovers the history of a Sinitic language rooted in the Red River Plain of northern Vietnam which he calls Annamese Middle Chinese The life and death of this language stimulated dramatic transformations in the speech of the region ultimately giving rise to a new and alloyed language over the early centuries of the second millennium Vietnamese Drawing connections among linguistic demographic intellectual and cultural realities over time Phan traces the story of the emergence of Vietnamese within the broader context of a cosmopolitan East and Southeast Asia *Lost Tongues of the Red River* demonstrates how language forms a surprisingly intimate record of human interaction one with unique potential to enrich and expand our understanding of the distant past

Compensatory Lengthening Darya Kavitskaya,2014-06-03 First Published in 2002 This volume is part of the

Outstanding Dissertations in Linguistics series and focuses on phonetics phonology and diachrony of compensatory lengthening The term compensatory lengthening CL refers to a set of phonological phenomena wherein the disappearance of one element of a representation is accompanied by a corresponding lengthening of another element This study focuses on descriptive and formal similarities and divergences between CL of vowels triggered by consonant and by vowel loss [The Languages and Linguistics of Mainland Southeast Asia](#) Paul Sidwell, Mathias Jenny, 2021-08-23 The handbook will offer a survey of the field of linguistics in the early 21st century for the Southeast Asian Linguistic Area The last half century has seen a great increase in work on language contact work in genetic theoretical and descriptive linguistics and since the 1990s especially documentation of endangered languages The book will provide an account of work in these areas focusing on the achievements of SEAsian linguistics as well as the challenges and unresolved issues and provide a survey of the relevant major publications and other available resources We will address Survey of the languages of the area organized along genetic lines with discussion of relevant political and cultural background issues Theoretical descriptive and typological issues Genetic classification and historical linguistics Areal and contact linguistics Other areas of interest such as sociolinguistics semantics writing systems etc Resources major monographs and monograph series dictionaries journals electronic data bases etc Grammar sketches of languages representative of the genetic and structural diversity of the region

Imagined Racial Laboratories, 2023-05-08 Imagined Racial Laboratories reveals the watermarks of science in the dynamics of racialisation in Southeast Asia during and after the colonial period Bringing together a set of critical histories of race sciences it illuminates the racialised dimensions of colony and nation in the region It demonstrates that racialisation took and continues to take mutable and multiple forms that often connect perhaps more than differentiate colonial and national periods across a variety of Southeast Asian settings Thus imagined races have contributed as much to the invention of modern Southeast Asia as have other fabled imagined communities [China's Lonely Revolution](#) Jeremy A.

Murray, 2017-03-27 Presents a new view of the Chinese revolution through the lens of the local Communist movement in Hainan between 1926 and 1956 Jeremy A Murray s study of local Communist revolutionaries in Hainan between 1926 and 1956 provides a window into the diversity and complexity of the Chinese revolution Long at the margins of the Chinese state Hainan was once known by mainlanders only for its malarial climate and fierce indigenous people In spite of efforts by the Chinese Nationalists and the Japanese to exterminate Hainan s Communists the movement survived because of an alliance with the indigenous Li For years it persevered though in complete isolation from Communist headquarters on the mainland Using Chinese language sources archival materials and interviews Murray draws a vivid picture of this movement from the Hainanese perspective and broadens our understanding of how patriotism Party loyalty and Chinese identity have been experienced and interpreted in modern China [Quantitative Approaches to Linguistic Diversity](#) Søren Wichmann, Anthony P. Grant, 2012-09-26 Quantitative methods in linguistics which the protean American structuralist linguist Morris Swadesh

introduced in the 1950s have become increasingly popular and have opened the world of languages to interdisciplinary approaches. The papers collected here are the work not only of descriptive and historical linguists but also statisticians, physicists and computer scientists. They demonstrate the application of quantitative methods to the elucidation of linguistic prehistory on an unprecedented world wide scale, providing cutting edge insights into issues of the linguistic correlates of subsistence strategies, rates of birth and extinction of languages, lexical borrowability, the identification of language family homelands, the assessment of genealogical relationships and the development of new phylogenetic methods appropriate for linguistic data. Originally published in *Diachronica* 27.2, 2010. *Typological Hierarchies in Synchrony and Diachrony* Sonia Cristofaro, Fernando Zúñiga, 2018-07-15. Typological hierarchies are widely perceived as one of the most important results of research on language universals and linguistic diversity. Explanations for typological hierarchies, however, are usually based on the synchronic properties of the patterns described by individual hierarchies, not the actual diachronic processes that give rise to these patterns cross linguistically. This book aims to explore in what ways the investigation of such processes can further our understanding of typological hierarchies. To this end, diachronic evidence about the origins of several phenomena described by typological hierarchies is discussed for several languages by a number of leading scholars in typology, historical linguistics and language documentation. This evidence suggests a rethinking of possible explanations for typological hierarchies as well as the very notion of typological universals in general. For this reason, the book will be of interest not only to the broad typological community but also historical linguists, cognitive linguists and psycholinguists. **The Blackwell Companion to Phonology, 5 Volume Set** Marc van Oostendorp, 2011-04-04.
