

“The Adolescent Brain VS. the Adult”

Frontal Lobe is the part of our brain that controls impulse, emotion, judgment and empathy in an adult like fashion. Limbic system controls impulse, sexual behavior, emotion and risk/reward. There is a temporary imbalance in the rate of development of the two systems in the adolescent brain which causes a challenge when it comes to making the right decision. Teens and adults possess the same capacity to see between right and wrong, but teens have trouble making the correct decision in the moment.

Teens think with the amygdala,
the emotional part of the limbic system

The emotional center of the brain and decision-making part are developing at different rates, leading to more emotions and less thinking when making decisions

Teens are more likely to

Be impulsive,
quick-tempered,
unpredictable, flaky,
emotional, self-destructive,
mischievous, irritable,
troublesome

Adults think
with the
prefrontal
cortex

Leading to rational
decision making and being
aware of consequences
