adaptability have positioned robotics to be an important field in both engineering and science. One of the most highly visible applications of robotics has been the robotic automation of many industrial tasks in factories. In the future, a new era will come in which we will see a greater success for robotics in non-industrial environments. In order to anticipate a wider deployment of intelligent and autonomous robots for tasks such as manufacturing, healthcare, entertainment, search and rescue, surveillance, exploration, and security missions, it is essential to push the frontier of robotics into a new dimension, one in which motion and intelligence play equally important roles. The 2010 International Conference on Intelligent Robotics and Applications (ICIRA 2010) was held in Shanghai, China, November 10-12, 2010. The theme of the conference was "Robotics Harmonizing Life," a theme that reflects the ever-growing interest in research, development, and applications in the dynamic and exciting areas of intelligent robotics. These volumes of Springer's Lecture Notes in Artificial Intelligence and Lecture Notes in Computer Science contain 140 high-quality papers which were selected at least for the papers in general sessions with a 62% acceptance rate. Traditionally, ICIRA 2010 holds a series of plenary talks, and we were fortunate to have two such keynote speakers who shared their expertise with us in diverse topic areas spanning the range of intelligent robotics and application activities.

An Immense World Ed Yong, 2022-06-21 NEW YORK TIMES BESTSELLER A thrilling The New York Times dazzling The Wall Street Journal tour of the radically different ways that animals perceive the world that will fill you with wonder and forever alter your perspective by Pulitzer Prize-winning science journalist Ed Yong. One of this year's finest works of narrative nonfiction. Oprah Daily ONE OF THE TEN BEST BOOKS OF THE YEAR The Wall Street Journal The New York Times Time People The Philadelphia Inquirer Slate Reader's Digest Chicago Public Library Outside Publishers Weekly BookPage ONE OF THE BEST BOOKS OF THE YEAR Oprah Daily The New Yorker The Washington Post The Guardian The Economist Smithsonian Magazine Prospect UK Globe Mail Esquire Mental Floss Marginalian She Reads Kirkus Reviews Library Journal The Earth teems with sights and textures, sounds and vibrations, smells and tastes, electric and magnetic fields. But every kind of animal, including humans, is enclosed within its own unique sensory bubble, perceiving but a tiny sliver of our immense world. In *An Immense World*, Ed Yong coaxes us beyond the confines of our own senses, allowing us to perceive the skeins of scent, waves of electromagnetism, and pulses of pressure that surround us. We encounter beetles that are drawn to fires, turtles that can track the Earth's magnetic fields, fish that fill rivers with electrical messages, and even humans who wield sonar like bats. We discover that a crocodile's scaly face is as sensitive as a lover's fingertips, that the eyes of a giant squid evolved to see sparkling whales, that plants thrum with the inaudible songs of courting bugs, and that even simple scallops have complex vision. We learn what bees see in flowers, what songbirds hear in their tunes, and what dogs smell on the street. We listen to stories of pivotal discoveries in the field while looking ahead at the many mysteries that remain unsolved. Funny, rigorous, and suffused with the joy of discovery, *An Immense World* takes us on what Marcel Proust called the only true voyage: not to visit strange lands but to possess other eyes.
