From Fire to Flood Henry F. Dobyns, 1981 **Chiricahua National Monument (N.M.), Fire Management Plan**, 2005 **Apache Adaptation to Hispanic Rule** Matthew Babcock, 2016-09-26 This book reinterprets Southwestern history before the US Mexican War through a case study of the poorly understood Apaches de paz and their adaptation to Hispanic rule *Riparian Research and Management: Past, Present, Future: Volume 1* U.S. Department of Agriculture, 2019-04-06 Fifty years ago riparian habitats were not recognized for their extensive and critical contributions to wildlife and the ecosystem function of watersheds This changed as riparian values were identified and documented and the science of riparian ecology developed steadily Papers in this volume range from the more mesic northwestern United States to the arid Southwest and Mexico More than two dozen authors most with decades of experience review the origins of riparian science in the western United States document what is currently known about riparian ecosystems and project future needs Topics are widespread and include interactions with fire climate change and declining water impacts from exotic species unintended consequences of biological control the role of small mammals watershed response to beavers watershed and riparian changes changes below large dams water birds of the Colorado River Delta and terrestrial vertebrates of mesquite bosques

General Technical Report PSW., 1978 **Proceedings of the California Riparian Systems Conference, September 22-24, 1988, Davis, California**, 1990 Protection, Management, and Restoration for the 1990's, 1990

General Technical Report INT., 1985 **Traders and Raiders** Natale A. Zappia, 2014-08-25 The Colorado River region looms large in the history of the American West vitally important in the designs and dreams of Euro Americans since the first Spanish journey up the river in the sixteenth century But as Natale A Zappia argues in this expansive study the Colorado River basin must be understood first as home to a complex Indigenous world Through 300 years of western colonial settlement Spaniards Mexicans and Americans all encountered vast Indigenous borderlands peopled by Mojaves Quechans Southern Paiutes Utes Yokuts and others bound together by political economic and social networks Examining a vast cultural geography including southern California Nevada Utah Arizona Sonora Baja California and New Mexico Zappia shows how this interior world pulsed throughout the centuries before and after Spanish contact solidifying to create an autonomous interethnic Indigenous space that expanded and adapted to an ever encroaching global market economy Situating the Colorado River basin firmly within our understanding of Indian country Traders and Raiders investigates the borders and borderlands created during this period connecting the coastlines of the Atlantic and Pacific worlds with a vast Indigenous continent

Plant Associations of Arizona and New Mexico: Forests, 1997 Plant Associations of Arizona and New Mexico: Woodlands, 1997 **Contested Ground** Donna J. Guy, Thomas E. Sheridan, 1998-04 The Spanish empire in the Americas spanned two continents and a vast diversity of peoples and landscapes Yet intriguing parallels characterized conquest colonization and indigenous resistance along its northern and southern frontiers from the role played by Jesuit

missions in the subjugation of native peoples to the emergence of livestock industries with their attendant cowboys and gauchos and threats of Indian raids In this book nine historians three anthropologists and one sociologist compare and contrast these fringes of New Spain between 1500 and 1880 showing that in each region the frontier represented contested ground where different cultures and politics clashed in ways heretofore little understood The contributors reveal similarities in Indian white relations military policy economic development and social structure and they show differences in instances such as the emergence of a major urban center in the south and the activities of rival powers The authors also show how ecological and historical differences between the northern and southern frontiers produced intellectual differences as well In North America the frontier came to be viewed as a land of opportunity and a crucible of democracy in the south it was considered a spawning ground of barbarism and despotism By exploring issues of ethnicity and gender as well as the different facets of indigenous resistance both violent and nonviolent these essays point up both the vitality and the volatility of the frontier as a place where power was constantly being contested and negotiated

Once a River Amadeo M. Rea, 2021-11-09 Like many rivers of the arid Southwest the Gila is for much of its length a dry bed except after seasonal rains Yet a mere century ago it hosted a thriving biological community and two centuries ago American Indians fished from its banks It is no mystery how the desert swallowed up the Gila Beaver trapping overgrazing and woodcutting first ruined natural watersheds then damming confined the last drops of its surface flow Historical sources and archaeological data inform us of the Gila's past but its bird life further testifies to the changes Amadeo Rea traces the decline of bird life on the Middle Gila in a book that addresses the broader issue of habitat deterioration Bird lovers will find it a storehouse of data on avian migration patterns and on ornithological classification based on skeletal structure Anthropologists can draw on its Piman ethnoclassification of birds which links the Gila River tribe with various other Uto Aztec peoples of Mexico's west coast But for all concerned with protecting our environment Once a River offers evidence of change that might be apprehended elsewhere It is a case history of a loss that perhaps need never have occurred

The Late Archaic across the Borderlands Bradley J. Vierra, 2010-01-01 Why and when human societies shifted from nomadic hunting and gathering to settled agriculture engages the interest of scholars around the world One of the most fruitful areas in which to study this issue is the North American Southwest where Late Archaic inhabitants of the Sonoran and Chihuahuan Deserts of Mexico Arizona and New Mexico turned to farming while their counterparts in Trans Pecos and South Texas continued to

forage By investigating the environmental biological and cultural factors that led to these differing patterns of development we can identify some of the necessary conditions for the rise of agriculture and the corresponding evolution of village life The twelve papers in this volume synthesize previous and ongoing research and offer new theoretical models to provide the most up to date picture of life during the Late Archaic from 3 000 to 1 500 years ago across the entire North American Borderlands Some of the papers focus on specific research topics such as stone tool technology and mobility patterns Others study the development of agriculture across whole regions within the Borderlands The two concluding papers trace pan regional patterns in the adoption of farming and also link them to the growth of agriculture in other parts of the world

Pilgrimage in Latin America N. Ross Crumine, Alan Morinis, 1991-02-07 In every region of Latin America there are sacred shrines that draw tens of thousands of pilgrims At present most of these pilgrimages are overtly Catholic but the roots of the contemporary practice are numerous European Christian indigenous pre Columbian African slave and other religious traditions have all contributed to Latin American pilgrimage This book explores the historical development range of diversity and the structure and impacts of this widespread religious practice This volume among the first to focus on pilgrimage in Latin America in general creates a general framework for understanding Latin American pilgrimage Although the contributors focus is predominantly anthropological analytical perspectives are drawn from numerous disciplines including archaeology geography and religious and literary history This diversity reflects the fact that pilgrimage is a multifaceted institution that incorporates geographical social cultural religious historical literary architectural artistic and other dimensions It is this complexity that is responsible for the previous general neglect of the study of pilgrimage by scholars The interdisciplinary collaboration that characterizes this volume is one of the most sensible ways to investigate pilgrimages All of the essays in this book treat pilgrims the pilgrimage center the ritual performances and the audience as major components and examine the interrelationships among these dimensions This volume will interest anthropologists sociologists of religion and others interested in aspects of religious practices

The Sociopolitical Structure Of Prehistoric Southwestern Societies Steadman Upham, Kent G Lightfoot, Roberta A. Jewett, 2019-06-26 This book examines current archaeological approaches for studying the organizational structure of prehistoric societies in the American Southwest It presents the historical background of the divergent theoretical models that have been used to interpret Southwestern socio political organizations
