From Empire To Europe:

From Roman Empire to Renaissance Europe Denys Hay, 2019-07-02 Originally published in 1953 From Roman Empire to Renaissance Europe looks at the broader picture of the Middle Ages drawn in terms of the men and women and the situations that they had to face The constant theme of change is revealed not by detailed narrative of elements but by commentary and examples that show how ideas and systems developed and how theses affected the patterns of everyday life The book looks at how the Roman Empire of the West gave way to a decentralized society vigorous brutal and inventive for which the only unifying factor was a universal acceptance of Latin Christianity In turn Christendom began to lose its coherence during the 13th and 14th centuries and by the fifteenth century Europe had emerged as a rival term a Europe in which the landed magnates had capitulated to the omnipotent and ubiquitous prince commerce as well as land now being a source of wealth This is not a static picture of the Middle Ages with fixed characteristics but of real men and women facing genuine situations

From Empire to Republic Taner Akçam, 2013-07-18 Taner Akçam is one of the first Turkish academics to acknowledge and discuss openly the Armenian Genocide perpetrated by the Ottoman Turkish government in 1915 This book discusses western political policies towards the region generally and represents the first serious scholarly attempt to understand the Genocide from a perpetrator rather than victim perspective and to contextualize those events within Turkey's political history By refusing to acknowledge the fact of genocide successive Turkish governments not only perpetuate massive historical injustice but also pose a fundamental obstacle to Turkey's democratization today

China from Empire to Nation-State Hui Wang, 2014-10-14 This translation of the Introduction to Wang Hui's Rise of Modern Chinese Thought 2004 makes part of his four volume masterwork available to English readers for the first time A leading public intellectual in China Wang charts the historical currents that have shaped Chinese modernity from the Song Dynasty to the present day and along the way challenges the West to rethink some of its most basic assumptions about what it means to be modern China from Empire to Nation State exposes oversimplifications and distortions implicit in Western critiques of Chinese history which long held that China was culturally resistant to modernization only able to join the community of modern nations when the Qing Empire finally collapsed in 1912 Noting that Western ideas have failed to take into account the diversity of Chinese experience Wang recovers important strains of premodern thought Chinese thinkers theorized politics in ways that do not line up neatly with political thought in the West for example the notion of a Heavenly Principle that governed everything from the ordering of the cosmos to the structure of society and rationality itself Often dismissed as evidence of imperial China's irredeemably backward culture many Neo Confucian concepts reemerged in twentieth century Chinese political discourse as thinkers and activists from across the ideological spectrum appealed to ancient precedents and principles in support of their political and cultural agendas Wang thus enables us to see how many aspects of premodern thought contributed to a distinctly Chinese vision of modernity

The Limits of Empire:

European Imperial Formations in Early Modern World History William Reger, 2016-03-03 This volume published in honor of historian Geoffrey Parker explores the working of European empires in a global perspective focusing on one of the most important themes of Parker's work the limits of empire which is to say the centrifugal forces sacral dynastic military diplomatic geographical informational that plagued imperial formations in the early modern period 1500 1800 During this time of wrenching technological demographic climatic and economic change empires had to struggle with new religious movements incipient nationalisms new sea routes new military technologies and an evolving state system with complex new rules of diplomacy Engaging with a host of current debates the chapters in this book break away from conventional historical conceptions of empire as an essentially western phenomenon with clear demarcation lines between the colonizer and the colonized These are replaced here by much more fluid and subtle conceptions that highlight complex interplays between coalitions of rulers and ruled In so doing the volume builds upon recent work that increasingly suggests that empires simply could not exist without the consent of their imperial subjects or at least significant groups of them This was as true for the British Raj as it was for imperial China or Russia Whilst the thirteen chapters in this book focus on a number of geographic regions and adopt different approaches each shares a focus on and interest in the working of empires and the ways that imperial formations dealt with or failed to deal with the challenges that beset them Taken together they reflect a new phase in the evolving historiography of empire They also reflect the scholarly contributions of the dedicatee Geoffrey Parker whose life and work are discussed in the introductory chapters and we're proud to say in a delightful chapter by Parker himself an autobiographical reflection that closes the book

British Writing from Empire to Brexit Robert Spencer, Howard J. Booth, Anastasia Valassopoulos, 2025-02-27 This introduction to British literature from 1900 to 2021 looks at British writing from the perspective of the 2016 Brexit vote and its seismic repercussions The book covers a wide variety of British literature in order to expose the cultural and political history of Britain its repeated challenges and highly class bound patriarchal structure British Writing from Empire to Brexit Writing Identity and Nation offers a stark view of what British culture has come to represent and the repercussions Not shying away from discussions around imperialism nationalism and racism Robert Spencer Howard J Booth and Anastasia Valassopoulos offer a radical deconstruction of what Britishness can and should mean promoting a convincing and accessible way to rethink the texts and field The authors analyse novels poetry and prose which amplify the dissentient and dissident perspectives of women gender non conforming and queer authors as well as the varied viewpoints and insights of working class immigrant postcolonial Black and Asian writers showing how these works open up post national futures after empire and after Brexit Ultimately offering a model to rescue Britain from its current crises and anxieties this book is an essential read for anyone approaching the study of British literature and culture as well as those working on postcolonial studies decolonisation recent British history and politics or with an interest in empire and Brexit

Thirteenth Century [chapters I-XV] Earle Wilbur Dow, 1908 *China Transformed* Roy Bin Wong, 1997 Wong compares the growth of capitalism and the formation of national states in modern Europe with economic and political changes in China and explains that a crucial rupture occurred when European industrialization set new conditions for material and social life He contrasts Chinese and European political changes and explores the implications of social protest economic change and state making by comparing grain seizures tax resistance and revolution as they occurred in both areas Only by evaluating where China and Europe appear to converge or diverge and by analyzing whether convergence reflects similar underlying processes he argues can we successfully situate the trajectories of both realms in world historical development BOOK

Empire in Asia: A New Global History Brian P. Farrell, Donna Brunero, 2018-09-20 Asia was the principle focus of empire builders from Alexander and Akbar to Chinggis Khan and Qianlong and yet until now there has been no attempt to provide a comprehensive history of empire in the region Empire in Asia addresses the need for a thorough survey of the topic This volume covers the long 19th century commonly seen in terms of high imperialism and the global projection of Western power This volume explores the dynamic volatile and often contested processes by which by the early years of the 20th century Asian states space and peoples became deeply integrated into the wider dynamics of global reordering Drawing on case studies from across Asia the contributors discuss key themes including ideology concepts of identity religion and politics state building and state formation the relationships between space people and sovereignty the movements of goods money people and ideas and the influence and impact of conflict and military power The two volumes of Empire in Asia offer a significant contribution to the theory and practice of empire when considered globally and comparatively and are essential reading for all students and scholars of global imperial and Asian history *Europe and the Other and Europe as the Other* Bo Str  th, 2010 This book contributes to the debate on what Europe means by demonstrating the complexities and contradictions inherent in the concept They are seen most clearly when Europe is viewed from a long historical perspective During the closing decades of the twentieth century Europe emerged as one of the main points of reference in both the cultural and the political constructs of the global community An obsession with the concept of European identity is readily discernible This process of identity construction provokes critical questions which the book aims to address At the same time

the book explores the opportunities offered by the concept of Europe to see how it may be used in the construction of the future. The approach is one of both deconstruction and reconstruction. The issue of Europe is closely related in the book to more general issues concerning the cultural construction of community. The book should therefore be seen as the companion of *Myth and Memory in the Construction of Community* which is also published by PIE Peter Lang in the series *Multiple Europes*. The book appears within the framework of a research project on the cultural construction of community in modernisation processes in comparison. This project is a joint enterprise of the European University Institute in Florence and the Humboldt University in Berlin sponsored by the Bank of Sweden Tercentenary Fund.

Bound to Cooperate - Europe and the Middle East Sven Behrendt, Christian-Peter Hanelt, 2010-07-30

Regional integration and the organisation of cross regional relations have been some of the most prominent features of international relations. By further strengthening the institutions of the European Union, Europe is taking steps to become a capable international actor. Only in few world regions such as the Middle East, integration has not been a driving force moving political and economic relations. Given these structural imbalances between Europe and the Middle East but also geographical proximity, economic interdependencies and shared historical experiences, what interests does Europe pursue in the Middle East? And if the goal of European policies is to establish stable political, economic and social relations with its neighbouring region, how could inter regional relations best be organised?

Defining Neighbors Jonathan Marc Gribetz, 2014

How religion and race not nationalism shaped early encounters between Zionists and Arabs in Palestine. As the Israeli-Palestinian conflict persists, aspiring peacemakers continue to search for the precise territorial dividing line that will satisfy both Israeli and Palestinian nationalist demands. The prevailing view assumes that this struggle is nothing more than a dispute over real estate. *Defining Neighbors* boldly challenges this view, shedding new light on how Zionists and Arabs understood each other in the earliest years of Zionist settlement in Palestine and suggesting that the current singular focus on boundaries misses key elements of the conflict. Drawing on archival documents as well as newspapers and other print media from the final decades of Ottoman rule, Jonathan Gribetz argues that Zionists and Arabs in pre-World War I Palestine and the broader Middle East did not think of one another or interpret each other's actions primarily in terms of territory or nationalism. Rather, they tended to view their neighbors in religious terms as Jews, Christians or Muslims, or as members of scientifically defined races: Jewish, Arab, Semitic, or otherwise. Gribetz shows how these communities perceived one another not as strangers vying for possession of a land that each regarded as exclusively their own but rather as deeply familiar, if at times mythologized or distorted others. Overturning conventional wisdom about the origins of the Israeli-Palestinian conflict, Gribetz demonstrates how the seemingly intractable nationalist contest in Israel and Palestine was at its start conceived of in very different terms. Courageous and deeply compelling, *Defining Neighbors* is a landmark book that fundamentally recasts our understanding of the modern Jewish-Arab encounter and of the Middle East.
