From Enlightenment To Risk:

World at Risk Ulrich Beck, 2009 This is a collection of key essays by Beck analyzing the structural dynamics of the modern world the global nature of risk and the future of global policies **An Anthropology of the Enlightenment** Huon Wardle, Nigel Rapport, 2020-05-15 In a time of intellectual uncertainty the question of how we know what we do about human lives becomes ever more pressing The essays collated in this volume argue that anthropology can be used to acknowledge explore and interpret divergence and ideological conflict over human meaning Using questions raised as part of the Enlightenment movement this volume is structured around some of the key themes the Enlightenment fostered including human nature time Earth and the Cosmos beauty order harmony and design moral sentiments and the query of whether wealthy nations make for healthy publics The volume focuses in particular on how moral sentiment offered a guiding idea in Enlightenment thought The idea of moral sentiment is central to the essays grappling with the ethical anxieties of contemporary anthropology The essays therefore trace historical connections and fissures and focus on Adam Smith's attempts toward an understanding of what would later be called modernity With an afterword from Marilyn Strathern this volume will be a strong addition to the Association of Social Anthropologists conference proceedings **X-Risk** Thomas Moynihan, 2020-10-20 How humanity came to contemplate its possible extinction From forecasts of disastrous climate change to prophecies of evil AI superintelligences and the impending perils of genome editing our species is increasingly concerned with the prospects of its own extinction With humanity's future on this planet seeming more insecure by the day in the twenty-first century existential risk has become the object of a growing field of serious scientific inquiry But as Thomas Moynihan shows in *X Risk* this preoccupation is not exclusive to the post-atomic age of global warming and synthetic biology Our growing concern with human extinction itself has a history Tracing this untold story Moynihan revisits the pioneers who first contemplated the possibility of human extinction and stages the historical drama of this momentous discovery He shows how far from being a secular reprise of religious prophecies of apocalypse existential risk is a thoroughly modern idea made possible by the burgeoning sciences and philosophical tumult of the Enlightenment era In recollecting how we first came to care for our extinction Moynihan reveals how today's attempts to measure and mitigate existential threats are the continuation of a project initiated over two centuries ago which concerns the very vocation of the human as a rational responsible and future-oriented being **Risk Society** Professor Ulrich Beck, 1992-07-01 This panoramic analysis of the condition of Western societies has been hailed as a classic This first English edition has taken its place as a core text of contemporary sociology alongside earlier typifications of society as postindustrial and current debates about the social dimensions of the postmodern Underpinning the analysis is the notion of the risk society The changing nature of society's relation to production and distribution is related to the environmental impact as a totalizing globalizing economy based on scientific and technical knowledge becomes more central to social organization and social conflict **NATO, Security and**

Risk Management M.J. Williams, 2008-10-08 This new volume explores the crisis in transatlantic relations and analyses the role of NATO following the collapse of the Soviet Union The book offers a unified theory of cooperation in the new security paradigm to explain the current state of transatlantic relations and NATO's failure to adequately transform itself into a security institution for the 21st century It argues that a new preoccupation with risk filled the vacuum left by the collapse of the Soviet Union and uses the literature of the Risk Society to analyse the strained politics of the North Atlantic community Using case studies to show how the West has pursued a strategy of risk management and the effect this has had on NATO's politics the book argues that a better understanding of how risk affects Western political cohesion will allow policy makers a way of adapting the structure of NATO to make it more effective as a tool for security Having analysed NATO's recent failings the book offers a theory for the way in which it can become an active risk manager through the replacement of its established structure by smaller ad hoc groupings

Risk, Uncertainty and Rational Action Carlo C. Jaeger, Thomas Webler, Eugene A. Rosa, Ortwin Renn, 2013-11-05 Risk as we now know it is a wholly new phenomenon the by product of our ever more complex and powerful technologies In business policy making and in everyday life it demands a new way of looking at technological and environmental uncertainty In this definitive volume four of the world's leading risk researchers present a fundamental critique of the prevailing approaches to understanding and managing risk the rational actor paradigm They show how risk studies must incorporate the competing interests values and rationalities of those involved and find a balance of trust and acceptable risk Their work points to a comprehensive and significant new theory of risk and uncertainty and of the decision making process they require The implications for social political and environmental theory and practice are enormous Winner of the 2000-2002 Outstanding Publication Award of the Section on Environment and Technology of the American Sociological Association

Guide to Country Risk The Economist, Mina Toksöz, 2014-12-09 Country risk explains the things that can go wrong when business is conducted across borders It's not just multinational companies with factories worldwide and complex operations that need to understand sudden changes in business conditions These can affect any small firm that may be looking to expand sales abroad or work with a foreign supplier The 2008-09 global financial crisis and the Arab Spring showed us how quickly and dramatically business conditions in any country can worsen and spread But a thorough understanding and careful management of country risk will help a company survive a crisis and even open up new opportunities The Economist Guide to Country Risk explains What risks foreign investors face and how to measure and manage them in a systematic way Why political and economic shocks are so hard to predict Where economies are vulnerable and how existing risk models spot or miss signs of impending disaster The typical bad habits of managers who ignore the warning signs How and where the next crisis will emerge

The New Technocracy Anders Esmark, 2020-04-08 Setting a new benchmark for studies of technocracy this book shows that a solution to the challenge of populism will depend as much on a technocratic retreat as democratic innovation Esmark examines the development since the 1980s of a new post

industrial technocratic regime and its complicity in the populist backlash against politics and political elites that is visible today. The new technocracy, a combination of network governance, risk management and performance management, has the author argues abandoned the overtly anti democratic sentiments of its industrial predecessor and proclaimed a new partnership with democracy. The rise of populism however is a clear sign that the inherent problems of this partnership have been exposed and that technocracy posing as democracy will only serve to exacerbate existing problems. Science in Environmental Policy Ann Campbell Keller, 2009. In the later more structured legislative and implementation phases scientists working hard to give the appearance of neutral expertise cede the role of persuader to others. *OECD Reviews of Risk Management Policies Trends in Risk Communication Policies and Practices* OECD, 2016-10-20. This OECD report surveys current trends in risk communication policies and practices across OECD and partner countries. It seeks to understand why risk communication tools have failed and what OECD countries can do to improve the effectiveness of their risk communication policies. *Society and Culture* Bryan S Turner, Chris Rojek, 2001-06-04. Society and Culture reclaims the classical heritage, provides a clear eyed assessment of the promise of sociology in the 21st century and asks whether the cultural turn has made the study of society redundant. Sociologists have objected to the rise of cultural studies on the grounds that it produces cultural relativism and lacks a stable research agenda. This book looks at these criticisms and illustrates the relevance of a sociological perspective in the analysis of human practice. The book argues that the classical tradition must be treated as a living tradition rather than a period piece. It analyzes the fundamental principles of belonging and conflict in society and provides a detailed critical survey of the p. Legal Risks in EU Law Emilia Mišćenić, Aurélien Raccach, 2016-04-13. This book takes a completely new and innovative approach to analysing the development of EU law. Within the framework of different important areas of EU law such as the internal market, consumer protection law, social law, investment law, environment law, migration law, legal translation and terminology, it examines the Union's approach to the regulation and management of legal risks. Over the years the Union has come to a point where it is becoming increasingly difficult to justify its authority to regulate in various areas of law. In managing legal risks deriving from the diversity of Member States laws which create barriers to trade and hinder the Union's economy, the Union itself has actually produced new legal risks that now have to be addressed. This failure on the part of EU institutions to manage legal risks has contributed to legal uncertainty for actors operating on the internal market. This book intends to contribute to the Union's smoother functioning and continuing development by proposing effective concrete solutions for managing the legal risks distorting the development of various areas of EU law. It pursues an innovative and effective approach to identify legal risks, their causes at the EU level and their impacts on the functioning of the Union and its Member States. By presenting new approaches in this context, the first book on legal risk management in the EU will actively promote the improvement of the EU lawmaking process and the application of EU law in practice. **Disaster Risks and Hazards** Rosemary

Kasimba, Innocent Chirisa, 2025-07-18 This book discusses disaster risks and hazards as well as measures to increase people's resilience. The 21st Century has experienced a number of disasters that resulted in hampering socio-economic development, the loss of lives and property; hence they are a threat to sustainable development. Disaster risk management efforts and practices have failed to arrest the underlying drivers of increased global risk. No country is immune to disaster risk; thus resilience has become a critical component of disaster management. It provides an opportunity to confront the social-ecological foundations of disasters. However, it has been vaguely conceptualised and lacks a concrete approach to operationalization. Some developing countries are gradually coming to realise that preparedness, hazard mapping, prediction, risk and vulnerability assessment and planning are critical for increasing resilience and reducing losses following disasters. A paradigm shift is required from reactionary to proactive measures in disaster management as the latter focuses more on increasing the resilience of the community. Zimbabwe's disaster management policy of 1979 is in the process of review following Cyclone Idai in March 2019 and the Corona Virus 19 COVID 19. Furthermore, the consequences of climate change disasters are being felt worldwide, particularly in developing countries whose preparatory measures for such disasters are inadequate. Disasters have become inevitable, and every country is vulnerable to them. In the event of these disasters, the vulnerable people are at risk and are affected more as a majority of them are not able to cope. In developed countries, measures are in place to assist the vulnerable in the event that a disaster strikes. However, Zimbabwe, being a developing country, is not able to deal with unpredictable disasters due to lack of resources; hence the need for it to adopt mitigatory and transformative measures to reduce the impact of any form of disasters.

Developing Transformative Spaces in Higher Education Sue Jackson, 2018-03-19 Higher education has been presented as a solution to a host of local and global problems despite the fact that learning and assessment can also be used as mechanisms for exclusion and social control. *Developing Transformative Spaces in Higher Education: Learning to Transgress* demonstrates that even when knowledge may appear to be the solution, it can be partial and disempowering to all but the dominant groups. The book shows the need to contest such knowledge claims and to learn to transgress rather than to conform. It argues that transformative spaces need to be found and that these should be about the creation of new opportunities, ways of knowing and ways of being. Working in and through spaces of transgression, the contributors to this volume develop frameworks for the possibilities of transformative spaces in learning and teaching in higher education. The book critiques the ways in which Western higher education culture determines the academic agenda in relation to dialogue on social differences, minority groups and hierarchical structures, including issues of representation among different groups in the population. It also explores the personal and political costs of transgression and outlines ways in which transitions can be transformative. The book should be of interest to academics, researchers and postgraduate students engaged in the study of higher education, education studies, teacher training, social justice and transformation. It should also be essential reading for practitioners working in post
