Ego Self Person Context:

Ego, Self, Person, Context Robert Howard Roth, 1992-01-01 *Expressing the Self* Minyao Huang, Kasia M. Jaszczołt, 2018-02-24 This book addresses different linguistic and philosophical aspects of referring to the self in a wide range of languages from different language families including Amharic English French Japanese Korean Mandarin Newari Sino-Tibetan Polish Tariana Arawak and Thai In the domain of speaking about oneself languages use a myriad of expressions that cut across grammatical and semantic categories as well as a wide variety of constructions Languages of Southeast and East Asia famously employ a great number of terms for first person reference to signal honorification The number and mixed properties of these terms make them debatable candidates for pronounhood with many grammar driven classifications opting to classify them with nouns Some languages make use of egophors or logophors and many exhibit an interaction between expressing the self and expressing evidentiality qua the epistemic status of information held from the ego perspective The volume's focus on expressing the self however is not directly motivated by an interest in the grammar or lexicon but instead stems from philosophical discussions on the special status of thoughts about oneself known as de se thoughts It is this interdisciplinary understanding of expressing the self that underlies this volume comprising philosophy of mind at one end of the spectrum and cross cultural pragmatics of self expression at the other This unprecedented juxtaposition results in a novel method of approaching de se and de se expressions in which research methods from linguistics and philosophy inform each other The importance of this interdisciplinary perspective on expressing the self cannot be overemphasized Crucially the volume also demonstrates that linguistic research on first person reference makes a valuable contribution to research on the self tout court by exploring the ways in which the self is expressed and thereby adding to the insights gained through philosophy psychology and cognitive science Coaching Psychology: Meta-theoretical perspectives and applications in multicultural contexts Llewellyn E. van Zyl, Marius W. Self, Person, World Donald McIntosh, 1995 Presents a synoptic survey of human life in its personal social and mythical dimensions drawing from a variety of sources McIntosh asserts that no major aspect of human life can be adequately understood except in the context of the whole thus understanding the self others and the world requires an intermingling of conscious and unconscious levels of thought and awareness Annotation copyright by Book News Inc Portland OR

Shame in Context Susan Miller, 2013-05-13 In this enlightening and gracefully written study Susan Miller examines shame in a variety of clinical contexts en route to a richer understanding of shame dynamics Miller attends especially to the role of shame in creating and maintaining character pathology and devotes separate sections of the book to shame in the context of obsessive compulsive narcissistic and masochistic personality organizations Within each of these clinical contexts a chapter of theoretical discussion is followed by a chapter of engaging case examples Integral to Shame in Context is Miller's informed and thoughtful critique of current theories about shame including those of Broucek Morrison Schore Wurmser Nathanson and Kinston In reviewing the contributions of these and other writers she is most concerned with achieving a balanced comprehension of shame that incorporates the insights of different theoretical perspectives without embracing the selective emphases of any one investigator or school of thought Like Freud she appreciates the defensive utility of shame but she attends equally to the painful and at times pathogenic aspects of shame experiences In line with more recent shame literature she emphasizes the pathogenicity of early shaming but she is equally sensitive to the role of shame in sustaining character defenses And she goes beyond the purview of other shame researchers in examining the ways in which individuals unconsciously seek to maintain shame experiences when these experiences sustain their personality organizations Offering a critical evaluation and synthesis of contemporary shame theories and culminating in a balanced clinical understanding of shame in its various contexts Shame in Context takes its place as in the words of Frances Broucek the most sophisticated and definitive clinical study of shame to date

Confucius David L. Hall, Roger T. Ames, 1987-10-15 Thinking Through Confucius critically interprets the conceptual structure underlying Confucius philosophical reflections It also investigates thinking or philosophy from the perspective of Confucius Perhaps the philosophical question of our time is what is philosophy The authors suggest that an examination of the Chinese philosophy may provide an alternative definition of philosophy that can be used to address some of the pressing issues of the Western cultural tradition This book finds an appropriate language for the interpretation of traditional Chinese philosophical thought a language which is relatively free from the bias and presuppositions of Western philosophy *The Oxford Handbook of Self-determination Theory* Richard M. Understanding Mental Objects Meir Perlow,2003-09-02 The ways in which an individual the subject relates to and perceives other people his or her objects has always been a preoccupation of psychoanalysis and in recent years a plethora of concepts has grown up in the literature In this ground breaking study Meir Perlow sets out to clarify the changing meanings of the different concepts from context to context discussing in depth the theoretical issues underlying them The book begins with an historical survey of how mental objects have been understood in the various schools of psychoanalysis as they have developed These include Freud and his associates the object relations approaches of Klein Fairbairn and Bion orientations derived from ego psychology such as those of Schafer and Kernberg and the self orientation of Winnicott and Kohut In Part Two the author discusses the conceptual and clinical issues involved in the major differences between the concepts Finally in Part Three he delineates three basic meanings of the concepts of mental objects as they have emerged in the literature and shows how they are related to ongoing issues in contemporary psychoanalysis This long overdue clarification of a complex area with its wide ranging and imaginative grasp of the different theories about objects will be an invaluable reference for all psychoanalysts and psychologists

Textbook of Developmental Pediatrics Marvin I. Gottlieb,Janice E. Williams,2013-11-11 Child adolescent development and behavior have been a traditional concern of primary health care providers However it was not until the mid 1960s that attempts were made to consolidate developmental behavioral issues into an identifiably distinct fund of medical knowledge During the ensuing two decades developmental behavioral pediatrics was recognized as a clinical and research subspecialty within the framework of comprehensive health care for children The influence of public advocacy groups topic dedicated journals national professional specialty societies subject related continuing education programs and federal legislation PL94 142 has served to crystallize developmental behavioral pediatrics as a specialized field of study As a consequence during the past ten years significant modifications have restructured medical student and pediatric resident education providing an emphasis on developmental behavioral issues The focus on neurodevelopmental educational and psychosocial issues reflects changing

priorities in traditional health care for children The postgraduate training of pediatric fellows in two and three year training programs was initiated to accommodate professional manpower needs in both academic and practice settings Many of the problems in childhood development and behavior frequently span the traditional areas of child neurology child psychiatry and general pediatrics As a result there has been some confusion in demarcating professional responsibilities in diagnosis and management as well as poorly defined terminology and classification schemas With the birth of developmental pediatrics as a pediatric specialty a more cohesive fund of knowledge has been accumulated and more meaningful strategies have beendesigned for prevention diagnosis and management Psychiatry Allan Tasman,Jerald Kay,Jeffrey A.

Steve Odin,1996-01-10 The thesis of this work is that in both modern Japanese philosophy and American pragmatism there has been a paradigm shift from a monological concept of self as an isolated I to a dialogical concept of the social self as an I Thou relation including a communication model of self as an individual society interaction It is also shown that for both traditions all aesthetic moral and religious values are a function of the social self arising through communicative interaction between the individual and society However at the same time this work critically examines major ideological conflicts arising between the social self theories of modern Japanese philosophy and American pragmatism with respect to such problems as individualism versus collectivism freedom versus determinism liberalism versus communitarianism and relativism versus objectivism **HUMANISTIC PERSONOLOGY: A HUMANISTIC-ONTOLOGICAL THEORY OF THE PERSON &**
