National Research Council, Division on Earth and Life Studies, Commission on Geosciences, Environment and Resources, Panel on Effects of Past Global Change on Life, 1995-02-01 What can we expect as global change progresses Will there be thresholds that trigger sudden shifts in environmental conditions or that cause catastrophic destruction of life **Effects of Past Global Change on Life** explores what earth scientists are learning about the impact of large scale environmental changes on ancient life and how these findings may help us resolve today s environmental controversies Leading authorities discuss

historical climate trends and what can be learned from the mass extinctions and other critical periods about the rise and fall of plant and animal species in response to global change The volume develops a picture of how environmental change has closed some evolutionary doors while opening others including profound effects on the early members of the human family An expert panel offers specific recommendations on expanding research and improving investigative tools and targets historical periods and geological and biological patterns with the most promise of shedding light on future developments This readable and informative book will be of special interest to professionals in the earth sciences and the environmental community as well as concerned policymakers

The Science of Regional and Global Change National Research Council,Policy and Global Affairs,Policy Division,Committee on Global Change Research,2000-01-19 This report is intended to promote a dialogue between the scientific community and the government officials who will lead our nation in the coming years on global change research The first section of the report is a brief description of the challenges and proposed responses needed from the highest levels of the government and the second provides more detailed discussion and is directed to agency level issues and responses The last section is a detailed bibliography that lists many of the specific reports on which the views outlined here are ultimately based

Catastrophism Richard J. Huggett,1997 One of the most dramatic intellectual events of the last decade has been the stunning re emergence of the catastrophist paradigm in the biological and earth sciences From killer asteroids to emergent viruses it has become evident that the history of life on earth has been shaped far more than previous orthodoxies would allow by extreme events and non linear processes The old uniformitarian dogma of steady rate evolution has been decisively challenged by the research of contemporary neo catastrophists like Stephen Jay Gould David Raup Stuart Ross Taylor Ursula Marvin and Kenneth Hsu Whether debating the origin of the moon or the current human impact on the biosphere they urge us to recognize the radically event or chance driven structure of natural history Surveying these various theories of uniformitarian and neo catastrophist thought in a clear and accessible fashion and seeking a path towards a new and workable synthesis Richard Hugget provides a superb introduction to the ideas which have defined the way we look at the world

Palaeoecology P.J. Brenchley,D.A.T Harper,2023-07-14 The first palaeoecology book to focus on evolutionary palaeoecology in both marine and terrestrial environments Discusses reconstruction of the past ecological world at population community and biogeographic levels A well illustrated and substantial volume giving accessible coverage of the full range of subjects within palaeoecology Reviews and summarises all the major mass extinctions

Understanding the Antioxidant Controversy Paul E. Milbury,Alice C. Richer,2007-11-30 Current scientific evidence suggests that free radicals unstable by products produced by normal human metabolic processes damage the body resulting in chronic health disorders and degenerative changes associated with aging Nutritional products on the market today promise antioxidants can reduce possibly even reverse damage caused by these free radicals If true that would mean less chronic disease and premature aging at the very least But are antioxidants indeed the new Fountain of

Youth Media reports extol antioxidants as the solution to disease and aging and some studies do seem to back up those reports Yet the studies that have been completed are far from conclusive and taking antioxidant supplements can be dangerous This book explores current thinking analyzes studies and answers the questions What are antioxidants What do they do Is there any real benefit to taking them as supplements Are there real dangers for me Media report preliminary and conflicting scientific studies on antioxidants notwithstanding the fact that the final analysis about their effectiveness and safety is incomplete The result is increasing sales of dietary supplements and so called functional foods or nutraceuticals that are not regulated nor proven and a possible public safety crisis from hypersupplementation Milbury and Richer bring us up to date sharing nuances and emerging news regarding antioxidants and their dangers Understanding the Antioxidant Controversy is an educated consumers and health professionals guide to this controversial topic **Earth System**

Responses to Global Change Harold A. Mooney, Eduardo R. Fuentes, Barbara I. Kronberg, 1993-10-06 This book examines the differences and similarities in the earth system components the ocean atmosphere and the land between western portions of the northern and southern Western Hemispheres past present and projected The book carefully examines the physical and biological patterns and responses of given biomes or ecological communities in the two regions Special emphasis is placed on the relationship of physical and biotic systems to biogeochemistry and the evolving biota patterns of land margins and surfaces The text concludes with an assessment of the direct impact on humans on these biomes giving full consideration to the land use drivers of global change Integrated view of earth system processes on the west coasts of North and South America **Acid Mine Drainage, Rock Drainage, and Acid Sulfate Soils** James A. Jacobs, Jay H. Lehr, Stephen M. Testa, 2014-04-10 Provides the tools needed to analyze and solve acid drainage problems Featuring contributions from leading experts in science and engineering this book explores the complex biogeochemistry of acid mine drainage rock drainage and acid sulfate soils It describes how to predict prevent and remediate the environmental impact of acid drainage and the oxidation of sulfides offering the latest sampling and analytical methods Moreover readers will discover new approaches for recovering valuable resources from acid mine drainage including bioleaching Acid Mine Drainage Rock Drainage and Acid Sulfate Soils reviews the most current findings in the field offering new insights into the underlying causes as well as new tools to minimize the harm of acid drainage Part I Causes of Acid Mine Drainage Rock Drainage and Sulfate Soils focuses on the biogeochemistry of acid drainage in different environments Part II Assessment of Acid Mine Drainage Rock Drainage and Sulfate Soils covers stream characterization aquatic and biological sampling evaluation of aquatic resources and some unusual aspects of sulfide oxidation Part III Prediction and Prevention of Acid Drainage discusses acid base accounting kinetic testing block modeling petrology and mineralogy studies It also explains relevant policy and regulations Part IV Remediation of Acid Drainage Rock Drainage and Sulfate Soils examines both passive and active cleanup methods to remediate acid drainage Case studies from a variety of geologic settings highlight various

approaches to analyzing and solving acid drainage problems Replete with helpful appendices and an extensive list of web resources Acid Mine Drainage Rock Drainage and Acid Sulfate Soils is recommended for mining engineers and scientists regulatory officials environmental scientists land developers and students

How Overfishing Handicaps Resilience of Marine Resources Under Climate Change Maria Lourdes D. Palomares,Rashid Sumaila,Charlotte De Fontaubert,2024-11-26 Life Below Water LBW is in decline partly due to overfishing and partly because climate change is disrupting the biophysics of the ocean Fish is a central part of LBW where predator prey relationships keep the ocean alive An ocean full of life is an important source of food and livelihoods for humans worldwide LBW is now facing two ominous threats overfishing and climate change In this Research Topic we address how the reduction of overfishing can increase the ability of LBW to withstand the impacts of climate change Thus we encourage the submission of contributions that relate the fishing down marine food webs phenomenon i e the truncation of marine food webs by the extraction of high trophic level species the destruction of marine habitats e g through harmful fishing gears and the continued unsustainable extraction of these resources with climate related impacts on marine environments species populations and ecosystems We particularly encourage papers that discuss mitigation of climate change and the positive effect that this will have to make LBW resilient We would like to encourage an active discussion of future actions and policies to support this mitigation and provide the elements that might help in building a multidimensional and interactive framework to build LBW resilience

Climate Change 2022 – Impacts, Adaptation and Vulnerability Intergovernmental Panel on Climate Change (IPCC),2023-06-22 The Working Group II contribution to the Sixth Assessment Report of the Intergovernmental Panel on Climate Change IPCC provides a comprehensive assessment of the scientific literature relevant to climate change impacts adaptation and vulnerability The report recognizes the interactions of climate ecosystems and biodiversity and human societies and integrates across the natural ecological social and economic sciences It emphasizes how efforts in adaptation and in reducing greenhouse gas emissions can come together in a process called climate resilient development which enables a liveable future for biodiversity and humankind The IPCC is the leading body for assessing climate change science IPCC reports are produced in comprehensive objective and transparent ways ensuring they reflect the full range of views in the scientific literature Novel elements include focused topical assessments and an atlas presenting observed climate change impacts and future risks from global to regional scales Available as Open Access on Cambridge Core
