Playhouse to Powerhouse Kerry L. Goldmann, 2025-09-29 The rise of Black cultural nationalism in the 1960s came with resounding promises of assertive new methods to achieve Black liberation in America especially through art Nowhere were these efforts more impactful or lasting than in the Black theatres founded or led by Black women between 1960 and 1990 Prior to the 1960s most Black theatre was barred from mainstream white venues limiting public access Black artistic and economic opportunity and cultural ownership Playhouse to Powerhouse Locating Black Power Women and Their Movement in the Black Theatre examines the revolutionaries who brought about this change merging arts and entrepreneurship to embed theatres in Black communities from California to New York to Texas In Playhouse to Powerhouse Kerry L. Goldmann explores the Black theatre movement through the lens of three significant women led theatres that are still in operation today Nora Vaughn's Black Repertory Group in Berkeley Barbara Ann Teer's National Black Theatre in Harlem and George Hawkins and Eileen Morris's Ensemble Theatre in Houston Goldmann concludes with a discussion of the current moment examining contemporary obstacles such as gentrification the co-opting of Black theatres and the impact of COVID-19 This remarkable work sheds light on the foundational role that Vaughn Teer and Morris played in the Black cultural revolution of the mid to late twentieth century securing theatre houses that thrived in multiple capacities as sites for revolution organizing revenue generation for communal uplift and unapologetic Black cultural representation

Alphabetically arranged entries from A to C that explores significant events major persons organizations and political and social movements in African American history from 1896 to the twenty first century The Cambridge History of American Theatre Don B. Wilmeth, Christopher Bigsby, 1998 This is an authoritative and wide ranging history of American theatre in all its dimensions from theatre building to playwriting directors performers and designers Engaging the theatre as a performance art a cultural institution and a fact of American social and political life the history addresses the economic context that conditioned the drama presented The history approaches its subject with a full awareness of relevant developments in literary criticism cultural analysis and performance theory At the same time it is designed to be an accessible challenging narrative All volumes include an extensive overview and timeline followed by chapters on specific aspects of theatre Volume Three examines the development of the theatre after World War II through the productions of Broadway and beyond and into regional theatre across the country Contributors also analyze new directions in theatre design directing and acting as well as key plays and playwrights through the 1990s *Continuum Companion to Twentieth Century Theatre* Colin Chambers, 2006-05-14 International in scope this book is designed to be the pre eminent reference work on the English speaking theatre in the twentieth century Arranged alphabetically it consists of some 2500 entries written by 280 contributors from 20 countries which include not only top level experts but uniquely leading professionals from the world of theatre A fascinating resource for anyone interested in theatre it includes Overviews of major concepts topics and issues Surveys of theatre institutions countries and genres Biographical entries on key performers playwrights directors designers choreographers and composers Articles by leading professionals on crafts skills and disciplines including acting design directing lighting sound and voice **Top Down** Karen Ferguson, 2013-06-27 At first glance the Ford Foundation and the black power movement would make an unlikely partnership After the Second World War the renowned Foundation was the largest philanthropic organization in the United States and was dedicated to projects of liberal reform Black power ideology which promoted self determination over color blind assimilation was often characterized as radical and divisive But Foundation president McGeorge Bundy chose to engage rather than confront black power's challenge to racial liberalism through an ambitious long term strategy to foster the social development of racial minorities The Ford Foundation not only bankrolled but originated many of the black power era's hallmark legacies community control of public schools ghetto based economic development initiatives and race specific arts and cultural organizations In *Top Down* Karen Ferguson explores the consequences of this counterintuitive and unequal relationship between the liberal establishment and black activists and their ideas In essence the white liberal effort to reforge a national consensus on race had the effect of remaking racial liberalism from the top down a domestication of black power ideology that still flourishes in current racial politics Ultimately

this new racial liberalism would help foster a black leadership class including Barack Obama while accommodating the intractable inequality that first drew the Ford Foundation to address the race problem **Going There** Richard J. Powell, 2020-10-02 A kaleidoscopic survey of black satire in 20th and 21st century American art In this groundbreaking study Richard J Powell investigates the visual forms of satire produced by black artists in 20th and 21st century America Underscoring the historical use of visual satire as antiracist dissent and introspective critique Powell argues that it has a distinctly African American lineage Taking on some of the most controversial works of the past century in all their complexity humor and provocation Powell raises important questions about the social power of art Expansive in both historical reach and breadth of media presented *Going There* interweaves discussions of such works as the midcentury cartoons of Ollie Harrington the installations of Kara Walker the paintings of Robert Colescott and the movies of Spike Lee Other artists featured in the book include David Hammons Arthur Jafa Beverly McIver Howardena Pindell Betye Saar and Carrie Mae Weems Thoroughly researched and rich in context *Going There* is essential reading in the history of satire racial politics and contemporary art **The Lever of Riches** Joel Mokyr, 1992-04-09 In a world of supercomputers genetic engineering and fiber optics technological creativity is ever more the key to economic success But why are some nations more creative than others and why do some highly innovative societies such as ancient China or Britain in the industrial revolution pass into stagnation Beginning with a fascinating concise history of technological progress Mokyr sets the background for his analysis by tracing the major inventions and innovations that have transformed society since ancient Greece and Rome What emerges from this survey is often surprising the classical world for instance was largely barren of new technology the relatively backward society of medieval Europe bristled with inventions and the period between the Reformation and the Industrial Revolution was one of slow and unspectacular progress in technology despite the tumultuous developments associated with the Voyages of Discovery and the Scientific Revolution What were the causes of technological creativity Mokyr distinguishes between the relationship of inventors and their physical environment which determined their willingness to challenge nature and the social environment which determined the openness to new ideas He discusses a long list of such factors showing how they interact to help or hinder a nation's creativity and then illustrates them by a number of detailed comparative studies examining the differences between Europe and China between classical antiquity and medieval Europe and between Britain and the rest of Europe during the industrial revolution He examines such aspects as the role of the state the Chinese gave up a millennium wide lead in shipping to the Europeans for example when an Emperor banned large ocean going vessels the impact of science as well as religion politics and even nutrition He questions the importance of such commonly cited factors as the spill over benefits of war the abundance of natural resources life expectancy and labor costs Today an ever greater number of industrial economies are competing in the global market locked in a struggle that revolves around technological ingenuity *The Lever of Riches* with its keen analysis derived from a sweeping survey of creativity throughout history offers

telling insights into the question of how Western economies can maintain and developing nations can unlock their creative potential
