**Bulletin - National Electric Light Association**, 1915 [Bulletin](#), 1915 *Boston Cooking-school Magazine of Culinary Science and Domestic Economics*, 1910 [The Vagabonds](#) Jeff Guinn, 2020-11-17 A fascinating slice of rarely considered American history Booklist the story of Henry Ford and Thomas Edison whose annual summer sojourns introduced the road trip to our culture and made the automobile an essential part of modern life In 1914 Henry Ford and naturalist John Burroughs visited Thomas Edison in Florida and toured the Everglades The following year Ford Edison and tire maker Harvey Firestone joined together on a summer camping trip and decided to call themselves the Vagabonds They would continue their summer road trips until 1925 when they announced that their fame made it too difficult for them to carry on Although the Vagabonds traveled with an entourage of chefs butlers and others this elite fraternity also had a serious purpose to examine the conditions of America's roadways and improve the practicality of automobile travel Cars were

unreliable and the roads were even worse But newspaper coverage of these trips was extensive and as cars and roads improved the summer trip by automobile soon became a desired element of American life The Vagabonds is a portrait of America s burgeoning love affair with the automobile NPR but it also sheds light on the important relationship between the older Edison and the younger Ford who once worked for the famous inventor The road trips made the automobile ubiquitous and magnified Ford s reputation even as Edison s diminished The automobile would transform the American landscape the American economy and the American way of life and Guinn brings this seminal moment in history to vivid life [MindLight](#)

**They Laughed at Galileo** Albert Jack, 2015-09-22 A humorous account of great inventors and their critics who predicted failure They Laughed at Galileo takes a humorous and reflective look at one thousand years of the development of humankind those who dreamt those who taught those who opposed and those who ultimately did At some point in modern history each and every one of our inventions and discoveries was first envisioned and then developed by a single person or a handful of people who dreamt of the seemingly impossible For them the future was clear and obvious but for the vast majority including the acknowledged experts of their days such belief was sheer folly For just about everything that has improved our modern lifestyles in a way that our ancestors could not possibly imagine there was once a lone dreamer proclaiming It can be done That dreamer was nearly always opposed by a team of enlightened contemporaries publicly declaring It cannot be done Well yes it could Marconi s wireless radio transmissions were initially deemed pointless Edward L Drake s eventual success on August 27 1859 was called the day the crazy man first struck oil Louis Pasteur s theory of germs was considered a ridiculous fiction Each of these inventions has had a profound effect on the course of human history and each one was rejected resisted and ridiculed in its day Ultimately the innovators who brought these into existence provided invaluable contributions to science and the culture of humankind
