Special Bibliography Series , 1957 **Market Power and the Economy** Wallace C. Peterson, 2012-12-06 A situation in economics that is little short of scandalous is the almost total neglect by mainstream economics of the importance of power in economic affairs Power in this context means the ability to bend market forces in one's favor influencing and shaping key economic variables such as prices wages and other income determinants As John Kenneth Galbraith aptly observes a dominant fact in economic life is the desire of people everywhere and in all circumstances to get control over their personal lives and their incomes to escape from the tyranny of the market Power is the means to this end Ever since Adam Smith economists have been fascinated by and lavish in their praise for the workings of the market All modern textbooks are built around Smithian ideas about markets and the way the invisible hand works through competition for society's betterment Yet one can search nearly in vain through leading texts under graduate and graduate alike for any reference to market or economic power This is the situation in spite of the fact that the drive for power the urge to get control over one's income permeates the economy as much as does competition This is a scandal For a discipline that claims for itself the mantle of a science one which wants to be accorded the same respect given the natural sciences it is almost incomprehensible that it should ignore a major force at work in the real economic world **Housing the Homeless** Jon Erickson, Charles Wilhelm, 2017-07-12 Homelessness has become a lasting issue of vital social concern As the number of the homeless has grown the complexity of the issue has become increasingly clear to researchers and private and public service providers The plight of the homeless raises many ethical anthropological political sociological and public health questions The most serious and perplexing of these questions is what steps private charitable and public organizations can take to alleviate and eventually solve the problem The concept of homelessness is difficult to define and measure Generally persons are thought to be homeless if they have no permanent residence and seek security rest and protection from the elements The homeless typically live in areas that are not designed to be shelters e.g. parks bus terminals under bridges in cars occupy structures without permission e.g. squatters or are provided emergency shelter by a public or private agency Some definitions of homelessness include persons living on a short term basis in single room occupancy hotels or motels or temporarily residing in social or health service facilities without a permanent address Housing the Homeless is a collection of case studies that bring together a variety of perspectives to help develop a clear understanding of the homelessness problem The editors

include information on the background and politics of the problem and descriptions of the current homeless population The book concludes with a resource section which highlights governmental policies and programs established to deal with the problem of homelessness **Afro-American Life, History and Culture** ,1985 **Technical Appendixes to the Report and Recommendations to the Secretary, U.S. Department of Health and Human Services** United States.
