The Race Talk Pierre W. Orelus,2013-02-01 Drawing on critical race theory this book critically examines race through a mosaic lens pointing out various issues directly connected to it such as racial identity politics racism multiracialism interracial relationships and the hegemony of whiteness This book goes further to analyze the

manner in which socially constructed racial stereotypes contribute to and are used to justify the poor socio economic situation and marginalization of People of Color particularly the poor ones Designed for a broad range of readers this book aims to open up democratic spaces for genuine discussions about racial issues Leading under Pressure Stephanie Chitpin, Robert E. White, 2022-08-15 Divided into three sections this volume firstly seeks to explore social contexts of educational leadership The second section explores the experiences of educational leaders in various contexts while the third section of this volume looks at the consequences unintended and otherwise of the neoliberal commodification of education

Discerning Critical Hope in Educational Practices Vivienne Bozalek, Brenda Leibowitz, Ronelle Carolissen, Megan Boler, 2013-12-04 How can discerning critical hope enable us to develop innovative forms of teaching learning and social practices that begin to address issues of marginalization privilege and access across different contexts At this millennial point in history questions of cynicism despair and hope arise at every turn especially within areas of research into social justice and the struggle for transformation in education While a sense of fatalism and despair is easily recognizable establishing compelling bases for hope is more difficult This book addresses the absence of sustained analyses of hope that simultaneously recognize the hard edges of why we despair The volume posits the notion of critical hope not only as conceptual and theoretical but also as an action oriented response to despair Our notion of critical hope is used in two ways it is used firstly as a unitary concept which cannot be disaggregated into either hopefulness or criticality and secondly as an analytical concept where critical hope is engaged and diversely theorized in ways that recognize aspects of individual and collective directions of critical hope The book is divided into four sub sections Critical Hope in Education Critical Hope and a Critique of Neoliberalism Critical Race Theory Postcolonial Perspectives on Critical Hope Philosophical Overviews of Critical Hope Education can be a purveyor of critical hope but it also requires critical hope so that it as a sector itself can be transformative With contributions from international experts in the field the book will be of value to all academics and practitioners working in the field of education *Adolescent Education* Joseph L. DeVitis, Linda Irwin-DeVitis, 2010 This book elucidates the complexities contradictions and confusion surrounding adolescence in American culture and education

Market Movements Thomas C. Pedroni, 2013-01-11 Winner of the 2009 Critics Choice Book Award of the American Educational Studies Association AESA Through careful ethnographic research Market Movements represents community leaders school officials and most importantly African American working class families who have used vouchers as a means of removing their children from public schools they deemed unacceptable The book works to discern the overlaps and tensions between the educational visions of African American voucher families and those of powerful conservative educational forces in U S society which purport to be allied with them To the extent that there are points of divergence with the educational right and points of convergence with educational progressives this book provides a hopeful message and a practical vision It seeks to accomplish some of the critical empirical and conceptual groundwork that is necessary in order to renew the

increasingly fractious relations between those social actors teachers communities of color critical researchers and labor unions most likely to defend and expand previous social democratic victories

Inequality, Power and School Success Gilberto Conchas, Michael Gottfried, 2015-04-10 This volume highlights issues of power inequality and resistance for Asian African American and Latino students in distinct U S and international contexts Through a collection of case studies it links universal issues relating to inequality in education such as Asian Latino and African American males in the inner city neighborhoods Latina teachers and single mothers in California undocumented youth from Mexico and El Salvador immigrant Moroccan youth in Spain and immigrant Afro Caribbean and Indian teenagers in New York and in London The volume explores the processes that keep students thriving academically and socially and outlines the patterns that exist among individuals students teachers parents to resist the hegemony of the dominant class and school failure With emphasis on racial formation theory this volume fundamentally argues that education despite inequality remains the best hope of achieving the American dream

The Oppositional Culture Theory Paul C. Mocombe, Carol Tomlin, 2010-10-11 Mocombe and Tomlin explore the black white achievement gap in America and Great Britain gaining understanding through black bourgeois living and the labeled pathologies of the black underclass Within the class dualism of capitalist social relations blacks throughout the Diaspora attempt to exist in the world Furthermore blacks must construct their identities and be in the world by choosing between the discursive practices of the Protestant and capitalist ideology of the black Protestant bourgeoisie or the beliefs of the black underclass which appear to dismiss these practices as acting white John Ogburn's term Presently the practical consciousness constituted as hip hop culture of the black underclass supported by finance capital have dominated the American and global social structure and one of its dysfunctions is the black white achievement gap which is a global phenomenon emanating from black America and affecting blacks around the globe Although the histories of blacks in America and in Great Britain are fundamentally different Mocombe and Tomlin argue in this work that during the age of globalization the social functions of the dominating black consciousness hip hop culture coming out of America are the locus of causality for the black white achievement gap in America and Great Britain Tomlin highlights this problematic by analyzing effective strategies employed by high achieving blacks in Great Britain and Mocombe does the same through an analysis of an effective reading curriculum in an American inner city after school program

Condition or Process? Researching Race in Education Adrienne D. Dixon, Gloria J. Ladson-Billings, Cecilia E. Suarez, William T. Trent, James D. Anderson, 2021-01-18 The question of why we need to think about how we research race demands a conceptualization of race that captures both its social construction and its temporal evolution We need both an understanding of race and clarity about how we talk about it in our design and conduct of research and in how we interpret and apply it in our findings As a field we can use research on race and racism in education to help construct social change Our purpose with this volume is to underscore the persistence of the discriminatory actions processes and the normalization of the use of race and class

conditions to justify the existing and growing disparity between the quality of life and opportunity for middle class and more affluent Whites and that for people of color and people of color who live in poverty As editors of this volume we wonder what more we could learn and understand about the process and condition of race if we dare to ask bold questions about race and racism and commit to methods and analyses that respect the experiences and knowledges of our research participants and partners

Making Mixed Race Karis Campion,2021-11-23 By examining Black mixed race identities in the city through a series of historical vantage points Making Mixed Race provides in depth insights into the geographical and historical contexts that shape the possibilities and constraints for identifications Whilst popular representations of mixed race often conceptualise it as a contemporary phenomenon and are couched in discourses of futurity this book dislodges it from the current moment to explore its emergence as a racialised category and personal identity over time In addition to tracing the temporality of mixed race the contributions show the utility of place as an analytical tool for mixed race studies The conceptual framework for the book place time and personal identity offers a timely intervention to the scholarship that encourages us to look outside of individual subjectivities and critically examine the structural contexts that shape Black mixed race lives The book centres around the life histories of 37 people of Mixed White and Black Caribbean heritage born between 1959 and 1994 in Britain s second largest city Birmingham The intimate life portraits of mixed identity reveal how colourism family school gender whiteness racism and resistance have been experienced against the backdrop of post war immigration Thatcherism the ascendancy of Black diasporic youth cultures and contemporary post race discourses It will be of interest to researchers postgraduate and undergraduate students who work on mixed race and ethnicity studies in academic areas including geographies of race youth identities cultures gender colonial legacies intersectionality racism and colourism

Bonner II,2023-07-03 How do we fix the leaky educational pipeline into a conduit of success for Black males That the issue is critical is demonstrated by the statistics that only 10% of Black males in the United States are proficient in 8th grade reading only 52% graduate from high school within four years and only 35 percent graduate from college This book uniquely examines the trajectory of Black males through the educational pipeline from pre school through college In doing so it not only contributes significantly to the scholarship on the experiences of this population but bridges the gap between theory and practice to provide frameworks and models that will improve these young men s educational outcomes throughout their educational journeys A compelling feature of the book is that that it does not treat Black males as homogeneous but recognizes the diversity that exists among Black males in various educational settings It demonstrates the

need to recognize students intersectionalities and individual characteristics as an essential preliminary to developing practices to improve outcomes at every educational stage Throughout the contributing authors also focus on the strategies and experiences of Black males who achieve academic excellence examining growth producing and asset based practices that can be sustained and that build upon the recognition that these males have agency and possess qualities such as resilience that are essential to their learning and development The frameworks and models that conclude each chapter are equally commendable to K 12 educators and administrators higher education faculty student affairs practitioners and administrators and policymakers for whom templates are provided for rectifying the continuing inequities of our educational system
