**Pedagogies of Globalization** Joel Spring, 2012-10-12 In this ground breaking book Joel Spring examines globalization and its worldwide effects on education A central thesis is that industrial consumerism is the dominant paradigm in the integration of education and economic planning in modern economic security states In the twenty first century national school systems have similar grades and promotion plans instructional methods curriculum organization and linkages between secondary and higher education Although there are local variations the most striking feature is the sameness of educational systems How did this happen How was education globalized Spring explains and analyzes this phenomenon and its consequences for human life and the future improvement of social and economic organizations Central themes include the elements of the educational security state and the industrial consumer paradigm in relationship to classical forms of education such as Confucianism Islam and Christianity and their concerns with creating a just and ethical society the role of the other in the globalization of educational structures as international military and economic rivalries spark competition between educational systems the transition from the Confucian village school to Western forms of education as exemplified in the lives of Ho Chi Minh and Mao Zedong the effect of the cultural and economic rivalry between the Soviet Union and the United States and its impact on schooling in both countries the rise of the educational security state in China the Soviet Union and the United States as these countries focus their educational efforts on military and economic development the evolution of progressive education as it appeared in revolutionary movements in South America Cuba Nicaragua and El Salvador the transition from traditional to Westernized forms of Islamic education against the background of European imperialism Arab nationalism and wars of liberation and the uneasy tension between Western educational ideals and Islamic religious values socialist education in the Democratic People s Republic of Korea current developments in educational security states such as China Japan the United States the new Russia and the European Union and the consequences of English as the global language and the global spread of the industrial consumer paradigm Readership for this book includes scholars and students in comparative international and multicultural education educational policy and politics historical social and philosophical foundations of education and curriculum studies It is a particularly

timely informative engaging text for courses in all of these areas      The Intersection of Cultures Joel Spring, 2017-09-29 The Intersection of Cultures Multicultural Education in the United States and the Global Economy Fourth Edition offers a unique problem solving approach to the complex issues involved in educating culturally and linguistically diverse students Perfect for any course devoted wholly or in part to the study of multicultural education this text addresses a wealth of topics A particular focus in this edition is the current global migration of peoples and the tension between local and global cultures Part One Multiculturalism includes chapters on cultural differences and schooling dominated cultures and immigrant cultures Chapters in Part Two Cultural Frames of Reference address monoculturalism biculturalism and ethnic identity multicultural minds history gender and social class and the intersection of school culture with dominated and immigrant cultures Part Three Perspectives on Teaching Multicultural Education includes chapters on teaching about racism teaching about sexism and teaching to protect and preserve cultures All chapters include model multicultural lessons for elementary through college classes These lessons serve a dual function first they can be used to help teach the content of the chapter and second elementary middle school and high school teachers can use these lessons in their own classes Each chapter concludes with a Personal Frames of References section designed to engage students in relating multiculturalism to their own lives New in the Fourth Edition cultural differences in ways of seeing knowing and interrelating with the world recent research findings from cross cultural psychology and the psychology of immigration and methods for educating multicultural minds      **Math Education for America?** Mark Wolfmeyer, 2013-12-04 Math Education for America analyzes math education policy through the social network of individuals and private and public organizations that influence it in the United States The effort to standardize a national mathematics curriculum for public schools in the U S culminated in 2010 when over 40 states adopted the Common Core State Standards for Mathematics Rather than looking at the text of specific policy documents this book complements existing critical reviews of the national math education curriculum by employing a unique social network analysis Breaking new ground in detailing and theorizing the politics of math education Wolfmeyer argues that the private interests of this network are closely tied to a web of interrelated developments human capital education policy debates over traditional and reform pedagogy the assumed content knowledge deficit of math teachers and the proliferation of profit driven educational businesses By establishing the interconnectedness of these interests with the national math education curriculum he shows how the purported goals of math education reform are aligned with the prevailing political agendas of this social network rather than the national interest      *Wheels in the Head* Joel Spring, 2012-08-21 In this popular text Joel Spring provocatively analyzes the ideas of traditional and non traditional philosophies from Confucianism to human rights regarding the contribution of education to the creation of a democratic society The goal is to explore how governments use education to control and manage their populations and to examine forms of education that claim to free people from authoritarian control A critically original work it is widely used as a text for

**Knowledge & Power in the Global Economy** David Gabbard, 2017-07-05 Advancing a three fold political agenda this volume illuminates how the meanings assigned to a whole vocabulary of words and phrases frequently used to discuss the role and reform of U S public schools reflect an essentially economic view of the world contends that education or educational reform conducted under an economized worldview will only intensify the effects of the colonial relations of political and economic domination that it breeds at home and abroad and offers a set of alternative concepts and meanings for reformulating the role of U S public schools and for considering the implications of such a reformulation more generally for the underlying premises of all human relationships and activities Toward these ends the authors in Part I critically examine many of the most commonly used terms within the rhetoric of educational reform since the early 1980s and before Part II links today s economized worldview to curricular and instructional issues These essays are especially important for comprehending how the organization of school curriculum privileges those disciplines deemed most central to market expansion math and science and how the political centrality of the economic sphere influences the nature of the knowledge presented in specific content areas Given that language constrains as well as advances human thought the twin tasks of de economizing education and decolonizing society will require a vocabulary that transcends the familiar terminologies addressed in Parts I and II The entries in Part III cultivate the beginnings of such a vocabulary as the authors elucidate innovative concepts which they view as central to the creation of truly alternative educational visions and practices

Reagan, 2004-09-22 This text provides a brief yet comprehensive overview of a number of non Western approaches to educational thought and practice Its premise is that understanding the ways that other people educate their children as well as what counts for them as education may help us think more clearly about some of our own assumptions and values and to become more open to alternative viewpoints about important educational matters The value of this informative mind opening text for preservice and in service teacher education courses is enhanced by Questions for Discussion and Reflection and Recommended Further Readings included in each chapter New in the Third Edition Chapter 2 Conceptualizing Culture I We and The Other is new to this edition It is a response to feedback about the problems inherent in our general discourse about culture and in addition provides an example of a culture that is near to us but nevertheless alien the culture of the Deaf World Chapter 9 which deals with Islam and traditional Muslim education has been substantially revised The subtitle of the Third Edition has been changed to Indigenous Approaches to Educational Thought and Practice reflecting not so much a change in the emphases found in the book but rather a recognition of the growing scholarly interest in indigenous peoples their languages cultures and histories Various points throughout the text have been expanded and clarified and chapters have been updated as needed
