This book is a packed with research and proven case study material on what education development can offer managers in higher education *Education Development and Leadership in Higher Education* Kym Fraser, 2005 In this book an international collection of leading contributors consider the above factors and provide accounts of how educational development can prove central to university policy and strategic planning covering areas such as teaching Education Development and Leadership in Higher Education Kym Fraser, 2004-11-10 In today's highly competitive and globalized higher education market leaders and managers find themselves considering the same issues of quality assurance increased participation the potential of new technologies and improving standards of teaching learning and leadership Education development has a central role to play in these areas and should be a core element in the strategic positioning of all higher education institutions This book is a packed with research and proven case study material on what education development can offer managers in higher education It draws from worldwide experiences of leading innovative educational developers and illustrates the numerous ways in which education development strategies structures and processes can make a difference to an institution's corporate strategy **Understanding Undergraduates** Celia Popovic, David A.

Green, 2012-08-06 Most university teachers have ideas about the typical good or not so good student in their classes but rarely do they share these thoughts with others By keeping quiet about the preconceptions or stereotypes they harbour teachers put themselves at risk of missing key evidence to help them revise their beliefs more importantly they may fail to notice students in real need of their support and encouragement In this unique work the authors explore UK and US university teachers beliefs about their students performance and reveal which beliefs are well founded which are mistaken which mask other underlying factors and what they can do about them So is it true for instance that British Asian students find medicine more difficult than their white counterparts or that American students with sports scholarships take their studies less seriously Is it the case that students who sit at the front of the lecture hall get better grades than those who sit at the back By comparing students demographic data and their actual performance with their teachers expectations the authors expose a complex picture of multiple factors affecting performance They also contrast students comments about their own study habits with their views on what makes a good learner For each preconception they offer clear advice on how university teachers can redesign their courses introduce new activities and assignments and communicate effective learning strategies that students will be able to put into practice Finally the authors explore the ramifications of teachers beliefs and suggest

actions that can be taken at the level of the institution department or programme and in educational development events designed to level the playing field so that students have a more equitable chance of success Ideal for both educational developers and university teachers this book reveals general tendencies and findings that will inform developers own work with university teachers provides practical guidance and solutions for university teachers to be able to identify and address students actual rather than assumed needs explores means of addressing and challenging people s natural tendency to rely on preconceived ideas and stereotypes and explains an action research method that educational developers can use on their own campuses to unravel some of the local preconceptions that may be hampering student success **Excellence in**

Teaching and Learning in Higher Education Isabel Huet,Teresa Pessoa,Fátima Sol,2021 The initial idea for the book emerged during the seminar Sharing of Innovative Pedagogical Practices that occurred at the University of Coimbra Portugal in 2018 Like all good ideas this one originated in a conversation between colleagues from the University of Coimbra and the University of West London in the United Kingdom The idea of this book was to move away from sharing experiences related to teaching and learning in higher education in just one or two countries but instead to organise a more European view about the policy research and teaching practices that are shaping the way our students learn academics teach and do research We have a total of 16 chapters from academics in Portugal the United Kingdom Ireland Sweden the Netherlands Spain Italy and the Czech Republic The book is organised in four interrelated themes 1 policy and quality 2 professionalisation of teaching and academic development 3 research and teaching nexus and 4 pedagogy and practice Enjoy reading the book

Conducting an Institutional Diversity Audit in Higher Education Edna Chun,Alvin Evans,2023-07-03 Implementing systematic diversity transformation requires embracing all aspects of diversity gender sexual orientation disability gender identification and other salient characteristics of difference as well as race and ethnicity This book lays out a framework for a systematic and sustained diversity process that first recognizes that too many diversity initiatives have generated more statements of intent than actual change and that audits conducted by outside bodies frequently fail to achieve buy in or long term impact and are costly endeavors The authors framework identifies nine dimensions that need to be addressed to achieve a comprehensive audit that leads to action describes the underlying research based practices and offers guidance on ensuring that all relevant voices are heard The process is designed to be implemented by and within the institution saving the considerable expense of outside consulting and design In addition it offers flexibility in the timing and sequence of implementation and provides the means for each institution to interrogate its

unique circumstances context and practices This book provides a concrete process for data gathering analysis and evaluation of institution wide diversity efforts through a progressive modular approach to diversity transformation It gives campuses the ability to audit evaluate and analyze diversity progress on the nine dimensions and prioritize areas of focus Its systematic research based approach supports continuous improvement and proactively addresses accreditation criteria The book is designed as a collaborative tool that will enable every constituency on campus from boards of trustees presidents provosts executive officers diversity officers deans department heads and chairs administrators HR officers faculty senates and staff councils diversity taskforces multicultural centers faculty and researchers to identify processes and relationships that need to change and implement practices that value and support the diversity on their campuses and undertake the transformation necessary for institutional success in a changing world The questions and guidelines set out in this book will enable all stakeholders to Audit the progress on each diversity dimension Identify gaps between research based practices and current approaches Tie diversity benchmarks to accreditation frameworks and strategic plans Chart the organization s overall progress in the development of comprehensive diversity initiatives leading toward Inclusive Excellence Prioritize institutional diversity initiatives based upon a comparison of the current state and the desired state availability of resources and the importance of each dimension in relation to institutional diversity goals Create a long term strategy for diversity transformation that provides a concrete research based method for auditing progress and future planning

Higher Education Transformation in Africa Emnet Tadesse Woldegiorgis, Logan Govender, Dennis Zami Atibuni, 2024-11-05 This book critically interrogates the notion of transformation in higher education focusing on epistemological and structural issues in postcolonial and contemporary Africa The book considers the multifaceted challenges facing higher education in the continent and uses the concept of transformation as a common thread weaving through a range of issues including epistemology identity relevance research collaboration and decoloniality Arguing for a holistic approach towards progressive and innovative education systems the book calls for a fundamental transformation that expands access enhances quality and competitiveness addresses past injustices and improves the capacity to act together for a more sustainable and just future Overall the book makes a powerful case for the power of transformation in higher education to shape the social economic and cultural fabric of society This book s critical evaluation of knowledge production in Africa will be an important read for researchers and policymakers involved in Africa s higher education sector

A Resilience Approach to Acceleration of Sustainable Development Goals Mika Shimizu, 2022-11-09 This is the first book to articulate how to address interlinkages among sustainable development goals SDGs which are keys to implementing those goals by 2030 At the heart of the book is a resilience approach to the enabling relevant systems practices and education and research While SDGs are well known at different levels from local to global spheres a major gap can be seen between goals and approaches as approaches are lacking for addressing interlinkages among SDGs The United Nations General Assembly in 2015 acknowledged interlinkages

as being of crucial importance in ensuring the purpose of the goals. However, few actual approaches have been specified to address the interlinkages or interconnections at both the policy and practical levels. Thus, it is urgent to face the question of how to address the interlinkages by stakeholders not only policy communities and researchers but also practitioners and students, especially innovators who can go beyond existing boundaries. By highlighting that challenge, this book lays out a path for addressing interlinkages among SDGs by applying a resilience approach to the issues of a sustainable society. The resilience approach has been developed from combinations of different modes of thinking and practices, including the systems approach, systems and design thinking, and resilience thinking and practices. Based on this overarching approach, innovators seek out the relevance of that approach to their SDGs-related practices at the system, local, and educational levels. The book therefore serves as a guide to how the resilience approach can contribute to accelerating implementation of SDGs by 2030.

Higher Education in Regional and City Development: Antioquia, Colombia 2012 OECD, 2012-07-19. Antioquia is one of Colombia's economic engines but suffers from low skills, poverty, inequity, and poor labour market outcomes. This publication explores a range of helpful policy measures and institutional reforms to mobilise higher education for regional development.

Sustainable Development Goals and Institutions of Higher Education Godwell Nhamo, Vuyo Mjimba, 2019-09-14. This volume brings together both theoretical and case study-based contributions to the implementation of the Sustainable Development Goals (SDGs) in Institutions of Higher Education (IHE), presenting an impactful combination of authors from both developing and developed countries. While most current publications addressing the SDGs and education focus on sustainable development in general and specific topics such as climate change or energy, this book attempts to accelerate the localisation of the SDGs by presenting opportunities and innovations offered in various universities and campuses regarding SDGs localisation. The book seeks to provide an important contribution to the global dialogue on IHE and the SDGs and will be of interest to academics and researchers engaged in the SDGs and education as well as government agencies and other interested stakeholders. The book focuses on curriculum and learning matters, research and development as well as community engagement. Case studies detail the integration of SDGs in academic and professional development, new approaches to implementing sustainability science instruction, improvements in teaching practices to enhance teacher competence, and responsible management education. Additional focus is placed on the alignment of the SDGs in higher education with the other goals, emphasizing technological innovation for improved human health and environmental management and climate change policies and action plans. Interdisciplinary solutions for pressing environmental problems are also provided, making sure that no one is left behind in realising these global development goals.
