The Education of Women Willystine Goodsell, 1923 *Better Than Rubies* Phyllis Stock, 1978 Though girls received little intellectual training until comparatively recently their education has been a cause of argument through the centuries. The advocates of education for girls have been few the enemies many and the arguments against have been variously women's immorality women's virtue women's fragile bodies women's feeble minds. One age fears that if you teach a girl to read she will give herself to unbridled sexual license another that if you let her go to college she will never be able to bear children. This book the first history of women's education charts its course in the Western world from the Renaissance to the present examining the curricula and institutions with their limitations and discriminations in favor of boys the intellectual arguments the social religious economic and political influences the pioneers the prodigies the breakthroughs the legislation the long struggle to obtain an equal education for women. It begins with a survey of women's education from antiquity to the Middle Ages and continues with a detailed account from the Renaissance through the Reformation Enlightenment and Industrial Revolution to the 20th century. The major countries covered are France Germany Russia England Italy and the United States. Dr Stock does two things with this hitherto neglected subject she disinters the historical facts and development country by country and century by century and she looks for answers to certain fundamental questions. What types of education have been available to women in the past. Under what conditions are women likely to be offered education and why. How is women's education related to the social structure and to women's relations with men. In conclusion Dr Stock sums up present conditions and points out the distance yet to go. It is her belief that women's education will come to full flower when it is realized that a society benefits from developing the abilities of all its members. Adapted from book jacket

does not adequately take into account the needs of girls and women There is undoubtedly some truth in both of the opposing views on the one hand that education of women should be determined principally by their function in perpetuating the life of the race and on the other hand that as the laws of mind are identical for the two sexes the education of women should be the same as that of men It is true that in the past the activities of women have been chiefly concerned with the provision of food and clothing and with the comfort and daily well being of the young of the group within the home Such duties now require not simply sound physical life and strong sex impulse but large capacity for administration the ability and the knowledge to enter the industrial and business life of the group and the power to utilize governmental agencies for constructive purposes of well being About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
