Education Opportunity And Social Inequality Changing Prospects In Western Society:

Education, Opportunity, and Social Inequality Raymond Boudon, 1974 Monograph on the sociological aspects of the expansion of educational opportunities in developed countries since 1945 with particular reference to the social implications for social mobility analyses the mechanisms generating unequal opportunities examines trends in school enrolment particularly for higher education etc and presents a theoretical model for educational level attainment and social mobility References and statistical tables

Handbook of the Sociology of Education Maureen T. Hallinan, 2006-11-24 The aim of the Handbook of Sociology of Education is to present the most theoretically grounded and empirically rigorous sociological analyses of schools to date The authors are distinguished researchers in the field Their contributions to the Handbook offer major theoretical perspectives on the schooling process and describe significant empirical studies of schools and their effects on individuals and society The research presented in the Handbook is built on three fundamental tenets of sociology First the authors adopt the perspective that schools are a central institution in society An understanding of the function of schooling in social life is enhanced by viewing schools as interrelated with other societal institutions The study of how the context of schooling influences education processes is critical to an understanding of school outcomes Rather than being determined solely by ascribed and achieved characteristics an individual's cognitive and social development are influenced heavily by the structures and networks in which the individual is embedded Communities families schools and social groups are critical elements in the educative process By viewing the school as a societal institution and highlighting the interaction between context and individual behavior the Handbook chapters provide a broader and deeper understanding of the determinants of learning in contemporary society The second sociological insight that guides the research in the Handbook is that the school is a social system

Changes in Inequality of Educational Opportunity Pia Nicoletta Blossfeld, 2018-05-24 Pia Nicoletta Blossfeld provides a long term longitudinal analysis of the stepwise changes in transitions over the educational careers in East and West Germany using data from the National Educational Panel Study NEPS She examines how far reforms aimed to increase the permeability in the German educational system have changed the movements of children adolescents and young adults in Germany since the last four decades Her book contributes to the literature of educational sociology by studying the associations between various resources of family background and respondent's educational histories until final educational attainment A novelty of her book is the analysis of the role of intercohort changes in social background composition on final educational attainment

Education Systems and Inequalities Andreas Hadjar, Christiane Gross, 2016-06-08 EPUB and EPDF available Open Access under CC BY NC ND licence How do education systems shape educational inequalities and differences in educational outcomes And how do advantages and disadvantages in educational attainment translate into privileges and shortcomings in labour market and general life chances Education systems and inequalities compares different education systems and their impact on creating

and sustaining social inequalities The book considers key questions such as how education systems impact educational inequalities along such variables as social origin gender ethnicity migration background or ability and what social mechanisms are behind the links between education system and educational inequalities and provides vital evidence to inform debates in policy and reform *Sociology* Robert Van Krieken,Daphne Habibis,Philip Smith,Brett Hutchins,Greg Martin,Karl Maton,2013-09-12 Building upon the success of previous editions this fully revised edition of *Sociology* lays the foundations for understanding sociology in Australia The depth and breadth of the book ensures its value not only for first year students but for sociology majors requiring on going reference to a range of theoretical perspectives and current debates This fifth Australian edition continues to build on the book s reputation for coverage clarity and content drawing upon the work of leading Australian sociologists as well as engaging with global social trends and sociological developments

Neoliberalism and Education Kalwant Bhopal,Farzana Shain,2017-10-02 *Neoliberalism and Education* Rearticulating Social Justice and Inclusion offers a critical reflection on the establishment of neoliberalism as the new global orthodoxy in the field of education and considers what this means for social justice and inclusion It brings together writers from a number of countries who explore notions of inclusion and social justice in educational settings ranging from elementary schools to higher education Contributors examine policy practice and pedagogical considerations covering different dimensions of inequality including disability race gender and class They raise questions about what social justice and inclusion mean in educational systems that are dominated by competition benchmarking and target driven accountability and about the new forms of imperialism and colonisation that both drive and are a product of market driven reforms While exposing the entrenchment under current neoliberal systems of educational provision of longstanding patterns of racialised classed and gendered privilege and disadvantage the contributions presented in this book also consider the possibilities for hope and resistance drawing attention to established and successful attempts at democratic education or community organisation across a number of countries This book was originally published as a special issue of the *British Journal of Sociology of Education* **Agent-Based Modelling of Social Networks in Labour-Education Market System** Alexander

Tarvid,2015-11-27 This book covers the modelling of human behaviour in the education and labour markets which due to their interdependency are viewed as one system Important factors influencing the decision making of individuals and firms in this system are discussed The role of social environment and networks is stressed The approach of agent based modelling is presented and compared with standard economic modelling and other simulation techniques in the context of modelling complex adaptive systems Practical questions in building agent based models of labour education market system with social networks are discussed These questions include modelling the structure of education system and agent behaviour there modelling and calibrating the labour market without and with firms generating the social network defining its behaviour and calibrating it and embedding the resulting system into a larger model *Sociology, Gender and Educational Aspirations*

Carol Fuller,2011-07-07 Annotation **Lessons of Cross-national Comparison in Education** David Phillips,1992-01-01
This collection of articles is a contribution to the debate about two important questions in the study of comparative education
What lessons can be learned from cross national studies of issues in education and What problems of comparative method do
such studies have to address *The Anthem Companion to Raymond Boudon* Christian Robitaille,Robert Leroux,2024-06-04
This book seeks to identify the main threads of a resolutely complex course of thought which has contributed greatly to
sociology Although he founded no school Raymond Boudon certainly made original contributions to the discipline in his own
time including his theory of rationality his interpretation of the work of the founders of sociology and his explanation of
educational inequalities He also presented convincing arguments about how the overly narrow utilitarianism of mainstream
economists was incomplete and betrayed major theoretical gaps It is true in any case that his thought laid the groundwork
for many theoretical and empirical social studies Through an analysis of the most important parts of this thought each of the
chapters will not merely demonstrate the scientific rigor which can be associated to his work but also show how it remains
relevant to our understanding of contemporary society and how it can hence be used for future research projects There can
be no doubt Boudon s thought has for various reasons undergone new assessments Chapters of this book hence reflect a
variety of points of view on how his work can be understood criticized and used for future research endeavors **Research
in Education** ,1974 Bourdieu, Habitus and Social Research Cristina Costa,Mark Murphy,2015-07-17 This collection
brings together for the first time a set of researchers whose research methodologies centre on Bourdieu s concept of habitus
Full of insight and innovation the book is an essential read for anyone wanting to know more about approaches to social
theory and its application in research Education and National Development Ingemar Faegerlind,Lawrence J.
Saha,2016-06-03 Education and National Development A Comparative Perspective discusses the correlation between
education and national development The book is comprised of nine chapters that cover several concerns regarding the
subject matter such as the theoretical underpinning dimensions policies and practice The first chapter discusses the origins
of modern development thought while the second chapter talks about how formal schooling can serve as an agent of change
Chapters 3 4 and 5 cover the various dimension development which are economic growth employment quality of life and
political system Chapter 6 discusses strategies for educational reform while Chapter 7 deals with the evaluation of
development policy The eighth chapter provides a comparative discourse about education and development under capitalism
and socialism Chapter 9 talks about education the state and development The book will be of great interest to readers
concerned about how education correlates with national development **Handbook of the Economics of Education**
,2023-01-18 The Handbook of the Economics of Education describes the research frontier in key topical areas and sets the
agenda for further work Modern analysis in the economics of education has made tremendous strides in understanding
fundamental issues related to the production of human capital and the impact of varying institutional features of education

systems By bringing together some of the world's leading scholars this volume provides a unique view of scholarship in the area The international perspectives of the editors Hanushek at Stanford Machin at LSE and Woessmann at Munich leads to a volume with something for all researchers Topics range from the economics of early childhood education to inequality in society to cash transfers in developing countries Identification and evaluation of the state of the art Clear descriptions of the meaning of existing research and the most likely avenues for the future Insights into how policy interventions in education can help or hurt human capital outcomes *Radicalism and Education Reform in 20th-Century China* Suzanne
