Yoshiko Nozaki, 2008-06-23 The controversy over official state approved history textbooks in Japan which omit or play down many episodes of Japan's occupation of neighbouring countries during the Asia Pacific War 1931-1945 and which have been challenged by critics who favour more critical peace and justice perspectives goes to the heart of Japan's sense of itself as a nation The degree to which Japan is willing to confront its past is not just about history but also about how Japan defines itself at present and going forward This book examines the history textbook controversy in Japan It sets the controversy in the context of debates about memory and education and in relation to evolving politics both within Japan and in Japan's relations with its neighbours and former colonies and countries it invaded It discusses in particular the struggles of Ienaga Saburo who has made crucial contributions including through three epic lawsuits in challenging the official government position Winner of the American Educational Research Association 2009 Outstanding Book Award in the Curriculum Studies category **Educational Reform in Postwar Japan** David Maurice Berman, 1989 The Organisational Dynamics of University Reform in Japan Jeremy Breaden, 2012 For several decades internationalisation has been a cornerstone of both Japanese government higher education policy and approaches to reform at an institutional level but Japan has still not managed to lose its reputation as a somewhat reclusive member of the global academic community Consensus on the potential of internationalisation to reinvigorate Japanese higher education is matched by the depth of recognition that universities have to date failed to internationalise successfully This book offers a new approach to Japan's internationalisation conundrum by proceeding from the inside out It presents an extended case study one university organisation that has been changed through its adoption of a radical program of internationalisation Through this case study Jeremy Breaden identifies patterns by which internationalisation is situated in administrative discourse and individual action and determines how these patterns in turn shape organisational practice The result is a multi dimensional narrative of organisational change that advances our understanding of both the dynamics of university reform and the concept of internationalisation one of the most durable yet contentious themes in the study of contemporary Japanese society With detailed analysis and an in depth case study this book will be of interest to students and scholars of Japanese studies sociology and anthropology It will also prove valuable to professionals and policy makers working in higher education both in

Japan and around the world English Language Teaching during Japan's Post-war Occupation Mayumi Ohara, John Buchanan, 2018-06-27 In 1945 Japan had to adjust very rapidly to sudden defeat to the arrival of the American Occupation and to the encounter with the English language together with a different outlook on many aspects of society and government This scholarly book is based on in depth interviews with people now aged who were school students at the time of the Occupation and who experienced first hand this immense cultural change The book considers the nature of the changing outlook including democratization the new role for the Japanese Emperor and all this represented for the place of tradition in Japanese life and the growing emphasis on individualism away from collectivism It discusses the changing system of education itself including new structures and new textbooks and relates the feelings of the participants as they came to terms with defeat and the language and culture of the former enemy Overall the book provides a fascinating insight into a key period of Japanese history *History Education and International Relations* Hirano Mutsumi, 2009-02-12 This is the first in depth study to examine the implications of history education in the context of international relations interstate and transnational focusing on Japanese textbooks as the principal case study The author argues that despite a widespread recognition that our grasp of history has some relevance to our views and attitudes towards foreign countries and peoples ergo ultimately its impact on national policy there appears to be little coherent discussion of such a significant topic and its practical applications in the field of International Relations This study therefore develops a conceptual framework and directs attention to the factors which predetermine the perceptions and attitudes of the public and policy makers and in doing so searches for the roots of their world view The book addresses the following issues Government Influence on the Domestic Educational Environment The Domestic Environment and its Interaction with the External Environment History Education in Practice A case of Japan The Japanese History Textbook Disputes in the Asian Context Parts I and II Twenty five Years On The Task of Coming to Terms with the Past Women and Educational Reform in History Joyce Goodman, Setsuko Kagawa, 2025-06-27 This unique collection provides critical analyses of Japanese educational history by bringing together gender transnational and transcultural perspectives It illustrates how Japanese European and American women educators transcended national borders in seeking to reform and re shape Japanese education and society in the midst of social and political change from the Meiji era 1868 1912 to 1948 and beyond including during the American Occupation of Japan It demonstrates how educational practice from Europe and the United States not only flowed into Japan before and after the First and Second World Wars but also became entangled with Japanese perspectives as well as with nationalism colonialism imperialism and regionalism as some Japanese educators sought to reform education for Asian women beyond Japan s borders In an increasingly connected world where at the same time opportunities for women s education in some countries are declining the volume provides insights for readers into how women educators have co operated historically across national borders in pursuit of reform in education and society in periods of immense social and political change including at

The Post-1945 Internationalization of Economics Alfred William Coats, 1997 In addressing the internationalization of economics after 1945 these essays are concerned with aspects of economic education the economist's role in policymaking and the sociology and professionalization of the discipline These matters have rarely been considered in international terms While discussing organizations such as the World Bank International Monetary Fund and the European Community and presenting studies that are primarily concerned with the effect of these developments in particular countries this volume focuses on the situation of Latin America Arguably the post 1945 internationalization of economics has proceeded further more dramatically and with greater effect in that continent than in any other region of comparable size

American Crusades Jon DePriest, 2018-11-15 American Crusades details evangelical pursuits to unite God's purposes with American empires It argues that religious motivations contributed heavily to United States governmental policies and built sacred spaces in many attempts to influence American society These embedded ambitions form the core of Americanism yet somehow remain hidden right in front of our eyes In the action of caretaking they advanced their understanding of God's demand on their lives and purposes Evangelical and theologically conservative Americans linked the sacred and secular shaping the ethos of the American people The terminology of religious thinking quickly sacralized concepts like democracy and capitalism in an attempt to control and use them Once packaged as a sacred space in need of custody religious leadership sought to fulfill its kingdom responsibility and secure its future Eventually a combination of religiously defined secular components coalesced into the term known simply as Americanism Building on the success of the new nation and supporting the causes of Americanism throughout the world has imprinted a uniquely evangelical construct into the domestic and foreign policy structures of the United States The shifting landscape of American culture drove evangelicalism into the margins in the 1970s while most scholars think that the decline of religious conservatism in culture meant that secularization controlled foreign policy as well this is not true Removed from the whims of domestic politics Protestant evangelical patterns of action have resisted change in American foreign policy structures Over time however the movement lost its faith distinctives while embedding religious principles in foundations of U S foreign policy This book seeks to produce a reorganized narrative through a critical synthesis to locate white evangelicals' quest to be the foundational voice in America's shaping ideological lineage
